- 79 Company statement of changes in equity
- **80** Company statement of cash flows
- **81** Notes to the company financial statements
- 88 Formulae and definitions
- 90 Administration

The directors of Transaction Capital are responsible for the preparation and fair presentation of the annual financial statements of the group and the company in accordance with International Financial Reporting Standards ('IFRS') and the Financial Reporting Guides as issued by the Accounting Practices Board and in the manner required by the Companies Act, 71 of 2008, of South Africa ('Companies Act'). The directors' responsibilities include designing, implementing and maintaining internal controls relevant to the preparation and fair presentation of these annual financial statements to ensure that they are free from material misstatement whether due to fraud or error, selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in the circumstances. The responsibilities also include maintaining adequate accounting records and an effective system of risk management. The directors have made an assessment of Transaction Capital Limited's ('the company'), and the company and its subsidiaries' ('the group') ability to continue as a going concern and have no reason to believe the business will not be a going concern in the year ahead. The auditors are responsible for reporting on whether the annual financial statements are fairly presented in accordance with the applicable financial reporting framework.

# APPROVAL OF CONSOLIDATED ANNUAL FINANCIAL STATEMENTS AND ANNUAL FINANCIAL STATEMENTS

The annual financial statements on pages 2 to 87 were approved by the board of directors on 24 November 2015, and are signed on their behalf.

David M Hurwitz

Chief executive officer

Mark D Herskovits

Chief financial officer

FOR THE YEAR ENDED 30 SEPTEMBER 2015

In terms of section 88(2)(e) of the Companies Act, I certify that, to the best of my knowledge and belief, the company has filed all required returns and notices in terms of that Act, in respect of the year under review, with the Companies and Intellectual Property Commission and that all such returns and notices appear to be true, correct and up to date. Approval of consolidated annual financial statements and annual financial statements

### Ronen Goldstein

Company secretary

### **NATURE OF BUSINESS**

The company is an investment holding company owning a portfolio of operating subsidiaries.

The company's issued ordinary shares are listed on the JSE Limited.

The group operates in two principal areas: asset-backed lending and risk services. The nature of the business of the main operating subsidiaries and a review of each is set out in the group profile on the company website. The segmental report can also be found on the company website as part of the audited financial results.

### **FINANCIAL RESULTS**

The results of the company and the group are set out in the annual financial statements.

### **DIRECTORATE AND COMPANY SECRETARY**

The names and a brief curriculum vitae of the directors and company secretary in office at the date of this report are set out in the directorate section on the company website (www.transactioncapital.co.za).

The following changes took place during the financial year:

■ With effect from 1 December 2014, Ronen Goldstein was appointed as company secretary.

### INTEREST OF DIRECTORS IN THE COMPANY'S SHARES

The direct and indirect interest of the directors in the ordinary shares of the company at the end of the financial year, categorised as beneficial and non-beneficial, is as follows:

2015

2014

	2015 ′000	% Shareholding	201 <i>4</i> ′000	% Shareholding
	000	Snarenolaling	000	Snarenolaling

Percentage of issued shares	53.6%		54.1%	

<sup>\*</sup> Representing Ethos Technology Fund I and Ethos Private Equity Fund V comprising various private equity investors on whose behalf he is a partner

There have been no changes in the above holdings between the end of the financial year and the date of issue of the annual report.

### **DIVIDENDS**

A final dividend of 12 cents (2014: 10 cents) per share for the year ended 30 September 2015 has been declared, payable on or about 21 December 2015 to shareholders registered at 18 December 2015.

An interim dividend of 10 cents (2014: 6 cents) per share was paid to shareholders registered on 5 June 2015.

### DIRECTORS' REPORT CONTINUED

FOR THE YEAR ENDED 30 SEPTEMBER 2015

### **CONSOLIDATED SHARE CAPITAL AND PREMIUM**

The following changes took place during the year under review

	2015		20	14
	Number of shares '000	R′000	Number of shares '000	R′000
Beginning of year	569 629	482 931	582 581	1 779 495
Issued in settlement of the Transaction Capital Limited Share				
Appreciation Rights Plan obligation	1 214	12 099	_	-
Shares repurchased from participants of the Transaction				
Capital Limited General Share Scheme:				
Repurchased and cancelled	-	-	(6 790)	(50 164)
Held as treasury shares	_	_	(2 643)	(15 071)
Shares repurchased on the open market and cancelled	(2 788)	(26 974)	(3 519)	(22 168)
Capital distribution to shareholders	-	-	-	(1 209 161)
	568 055	468 056	569 629	482 931

In terms of specific authority received from shareholders on the adoption of the Transaction Capital Share Appreciation Rights Plan, a total of 1 213 949 shares were issued to participants/employees ("good leavers") at an average price of 996 cents per share.

All shares repurchased and cancelled reverted to authorised unissued shares:

- The average purchase price of the 2 788 030 shares repurchased on the open market was 967 cents per share; and
- As approved by the shareholders, the treasury shares were repurchased and cancelled in the period under review at a price of 839 cents per share, being the 30-day volume weighted average price per share on date of repurchase. This has a nil impact on the consolidated share capital and premium account.

### **BORROWINGS**

The memorandum of incorporation of the company does not place any restrictions on the borrowing powers of the company or the group. Details of borrowings at the end of the financial year are set out in note 15 to the consolidated annual financial statements.

### LITICATION

There are no current or pending legal proceedings against the group which are anticipated to materially affect its financial position.

### **SUBSIDIARIES**

Details of subsidiaries and of changes in holdings are set out in note 15 of the company financial statements.

### **SUBSEQUENT EVENTS**

No material events took place subsequent to year-end.

### DIRECTORS' REPORT CONTINUED

FOR THE YEAR ENDED 30 SEPTEMBER 2015

### **EMPLOYEE INCENTIVE SCHEMES**

The group operates share incentive initiatives for employees, including directors.

### TRANSACTION CAPITAL SHARE APPRECIATION RIGHTS PLAN (THE "PLAN")

Further disclosure relating to the Plan is set out in note 24 of the group financial statements.

### TRANSACTION CAPITAL GENERAL SHARE SCHEME (THE "SCHEME")

The purpose of the Scheme is to provide employees of the group with loans to acquire shares in Transaction Capital Limited.

The Scheme was largely wound down in March 2014.

The following is a summary of movements during the current year:

	No of shares ′000	R′000
Balances at September 2013	16 050	119 045
Payments	(5 345)	(31 002)
Dividends	_	(1 611)
Capital distribution	_	(12 665)
Interest charged	_	2 405
Withdrawals/repurchases	(9 433)	(69 905)
Balances at September 2014	1 272	6 267
Dividends	-	(216)
Interest charged	_	374
Balances at September 2015	1 272	6 425
Shares held by directors under the scheme included above:		
30 September 2015	1 272	6 425
30 September 2014	1 272	6 267

No shares were held by prescribed officers under the scheme as at 30 September 2014 and 30 September 2015.

All the shares have vested in the participants. The balances outstanding bear interest at prime overdraft rate less 2% (or prime overdraft rate less 5% for grants prior to 30 September 2010).

### **ASSISTED OFFERS**

The following is a summary of movements for the previous financial year:

	No of shares	
	′000	R′000
Balances at September 2013	5 186	24 301
Payments	(5 067)	(13 913)
Dividends	_	(543)
Capital distribution	_	(9 354)
Interest charged	_	389
Withdrawals	(119)	(880)
Balances at September 2014	-	-
Shares held by directors under the scheme included above:		
30 September 2014	-	-

There were no additional assisted offer issues.

The responsibilities of the audit, risk and compliance committee ('the committee') are set out in the Companies Act, ('the Act'), Transaction Capital's Memorandum of Incorporation, the King Code on Corporate Governance ('King III') and the JSE Limited Listings Requirements. The committee's terms of reference are reviewed annually and approved by the board.

### **COMPOSITION**

The committee comprises three independent non-executive directors, all of whom are financially literate and have adequate financial and commercial experience to fulfil their roles as members. Two members of the committee form a quorum.

The committee comprised the following members during the year and to the date of this report:

- D Woollam (Chairperson)
- C Seabrooke
- P Langeni

The board approved the appointment of the chairman of the board as a member of the ARC committee, as it believed that his skills and knowledge would enhance the committee. Permanent invitees include: chief executive officer David Hurwitz, chief financial officer Mark Herskovits, executive director Jonathan Jawno and non-executive director Shaun Zagnoev.

The external auditors attend all committee meetings and separate meetings may be held with the committee to afford the external auditors the opportunity to meet with the committee without the presence of management.

Representatives from internal audit attend all committee meetings and are similarly afforded the opportunity of separate meetings with the committee. The group internal audit executive has a functional reporting line to the committee chairman and an administrative reporting line to the CFO.

The effectiveness of the committee and its members is assessed on an annual basis.

Members of the committee are elected annually by the group's shareholders on recommendation from the board and nominations committee. The board may remove members of the committee and must fill vacancies within 40 days.

Access to training is provided on an ongoing basis to assist members in discharging their duties.

### **ROLE AND RESPONSIBILITIES**

The key functions and responsibilities of the committee as outlined in the committee's terms of reference include oversight of:

The preparation of the integrated report:

- Comment on the annual financial statements, accounting practices and internal financial controls;
- Review the annual financial statements and other financial reports; and
- Ensure the integrity of the integrated report.

### Combined assurance:

- Monitor the appropriateness of the intended combined assurance model to provide a coordinated approach to all assurance activities;
- Review the skills, resources and experience of the company's finance function annually and report the results in the integrated report; and
- Review the suitability of the skills and experience of the CFO.

### Internal audit:

- Review the independence, performance and effectiveness of the internal audit process and ensure that it has the necessary resources, budget, standing and authority to discharge its functions; and
- Ensure that the internal audit function is periodically, but at least every five years, subjected to an independent quality review to ensure that it remains effective.
- Review the suitability of the skills and experience of the internal audit executive.

### AUDIT, RISK AND COMPLIANCE COMMITTEE REPORT CONTINUED

FOR THE YEAR ENDED 30 SEPTEMBER 2015

### Risk management:

- The committee oversees the management of:
  - > Financial reporting risks;
  - > Internal financial controls;
  - > Fraud risks relating to financial reporting;
  - Tax risk;
  - > IT risks;
  - > Compliance risks; and
  - > the group's capital and funding requirements with oversight over the asset and liability committee and its policies.

### External audit:

- Recommend/nominate the external auditor for appointment by the shareholders;
- Approve the external auditor's engagement terms, including remuneration;
- Monitor the relationship between the external auditor and management;
- Report on the independence of the external auditor in the annual financial statements;
- Define a policy for non-audit services provided by the external auditor and pre-approve contracts for non-audit services outside this policy; and
- Review the performance and effectiveness of the external audit process.

### Reporting line - whistleblowing:

- Review the arrangements by which stakeholders may in confidence and with total anonymity raise concerns about possible improprieties;
- Ensure that arrangements are in place to independently investigate such matters and that adequate controls are implemented to prevent recurrence; and
- Consider significant findings of investigations and management's response thereto.

### Governance:

- In liaison with external and internal audit, review the developments in corporate governance and surrounding best practices and consider their impact and implication for the businesses' processes and structures;
- Review the disclosure of the role of the committee as included in the integrated annual report;
- Be available at all times to advise the chairperson of the board on queries relating to the financial affairs and internal controls;
- Receive and deal with concerns or complaints relating to accounting practices, internal control, content or auditing of the financial statements, internal financial controls and any related matters.

■ Make submissions to the board on accounting policies, financial controls, records and reporting.

### Risk:

- Oversee the development and annual review of a policy and plan for risk management for recommendation to the board;
- Monitors implementation of the policy and plan for risk management; and
- Ensure that continuous risk monitoring by management takes place within the levels of risk tolerance approved by the board.

■ The committee has oversight over the compliance with applicable laws and regulations.

### Requirements of the Act:

Responsibility for all subsidiary companies that do not have their own audit committees, which responsibilities includes reviewing the formalised process used for performing functions on behalf of subsidiaries.

The committee confirms that it has adopted appropriate formal terms of reference to discharge its responsibilities, has regulated its affairs and has discharged all of its responsibilities as contained therein.

### AUDIT, RISK AND COMPLIANCE COMMITTEE REPORT CONTINUED

FOR THE YEAR ENDED 30 SEPTEMBER 2015

### CONCLUSIONS

Having considered, analysed, reviewed and debated information provided by management, internal and external audit the committee confirms that:

- It considered and approved the early adoption of IFRS 9: Financial Instruments classification and measurement (replacement of IAS 39) in 2015 and reviewed the effect thereof in the annual financial statement.
- The internal controls of the group have been effective in all material aspects throughout the year under review;
- These controls have ensured that the group's assets have been safeguarded;
- Proper accounting records have been maintained;
- Resources have been utilised efficiently; and
- The skills, independence, audit plan, reporting and overall performance of the external auditors are acceptable and it recommends their re-appointment in 2016.

### **CHIEF FINANCIAL OFFICER**

The audit committee has satisfied itself to the appropriateness of the expertise and experience of the CFO and the finance function.

### **INTEGRATED REPORT**

On an annual basis the committee oversees and reviews the integrated report, and recommends the approval thereof to the board. The board subsequently approves the integrated report.

### **EXTERNAL AUDIT**

The committee has satisfied itself through enquiry that the auditors of the group are independent as defined by the Act.

The committee, in consultation with executive management, agreed to an audit fee for the year under review. The fee is considered appropriate for the work that could reasonably have been foreseen at that time. Audit fees are disclosed in note 21 to the annual financial statements.

### INTERNAL AUDIT

The committee has satisfied itself of the independence, performance and effectiveness of the internal audit process. The committee has considered and recommended the internal audit charter for approval by the board, which has so approved it.

### WHISTLE BLOWING

The committee dealt with any concern or complaints, whether from within or outside the company, relating to the accounting practices and internal audit of the company, the content or auditing of the company's financial statements, the internal financial controls of the company and related matters.

### **GOING CONCERN**

The going concern assertion of the company and the group, as prepared by management, was reviewed by the committee and recommended to the board.

### **ANNUAL FINANCIAL STATEMENTS**

The committee has:

- Reviewed and discussed the audited annual financial statements with the external auditors, the internal auditors, the CEO and the CFO;
- Reviewed the external auditors' management letter and management's response thereto;
- Reviewed significant adjustments resulting from external audit queries and accepted any unadjusted audit differences; and
- Received and considered reports from the internal auditors.

The committee concurs with and accepts the external auditor's report on the annual financial statements and has recommended the approval thereof to the board, which has subsequently approved the annual financial statements. These will be open for discussion at the forthcoming annual general meeting.

### CONCLUSION

The committee is satisfied that it has met its statutory requirements and those of its terms of reference.

### David F. Woollam

Audit, Risk and Compliance Committee chairman

The Social and Ethics Committee (the 'committee') comprised the following members during the year and to the date of this report:

- Phumzile Langeni (chairman)
- David Hurwitz
- Mark Herskovits

The committee has adopted terms of reference as its charter and has regulated its affairs in compliance with this and has discharged all of the responsibilities set out therein.

The committee was established to assist the Board of Directors in ensuring that Transaction Capital is and remains a good and responsible corporate citizen. The committee performs the statutory functions required of a Social and Ethics Committee in terms of the Companies Act, 71 of 2008.

The committee monitors and is satisfied that the group complies with relevant legislation and other legal requirements or prevailing codes of best practice, specifically with regard to matters relating to social and economic development, good corporate citizenship, transformation, the environment, health and public safety, as well as labour and employment. The committee met twice during this financial year.

### Phumzile Langeni

Social and Ethics Committee chairman

### TO THE SHAREHOLDERS OF TRANSACTION CAPITAL LIMITED

We have audited the consolidated and separate financial statements of Transaction Capital Limited, set out on pages 10 to 87 which comprise the statements of financial position as at 30 September 2015, the income statements, statements of comprehensive income, statements of changes in equity and statements of cash flows for the year then ended and the notes, comprising a summary of significant accounting policies and other explanatory information.

## DIRECTORS' RESPONSIBILITY FOR THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

The company's directors are responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards and the requirements of the Companies Act of South Africa, and for such internal control as the directors determine is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

### **AUDITOR'S RESPONSIBILITY**

Our responsibility is to express an opinion on these consolidated and separate financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### **OPINION**

In our opinion, the consolidated and separate financial statements present fairly, in all material respects, the consolidated and separate financial position of Transaction Capital Limited, as at 30 September 2015 and its consolidated and separate financial performance and its consolidated and separate cash flows for the year then ended in accordance with International Financial Reporting Standards, and the requirements of the Companies Act of South Africa.

### OTHER REPORTS REQUIRED BY THE COMPANIES ACT

As part of our audit of the consolidated and separate financial statements for the year ended 30 September 2015, we have read the Directors' Report, the Audit Committee's Report and the Company Secretary's Certificate for the purpose of identifying whether there are material inconsistencies between these reports and the audited consolidated and separate financial statements.

These reports are the responsibility of the respective preparers. Based on reading these reports we have not identified material inconsistencies between these reports and the audited consolidated and separate financial statements. However, we have not audited these reports and accordingly do not express an opinion on these reports.

Total cash and cash equivalents at the end of the year**	1 117	1 244

<sup>\*\*</sup> The amounts in the 2014 statement of cash flows relating to Paycorp Holdings Proprietary Limited and its subsidiaries and Bayport Financial Services 2010 Proprietary Limited and its subsidiaries were reclassified from continuing to discontinued operations.

The financial statements of Transaction Capital Limited ('the company'), and the company and its subsidiaries ('the group') are prepared in accordance with International Financial Reporting Standards ('IFRS'), interpretations issued by the International Financial Reporting Interpretations Committee ('IFRIC'), the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee and Financial Pronouncements as issued by the Financial Reporting Standards Council, the Johannesburg Stock Exchange ('JSE') Listings Requirements, the going-concern principle and the requirements of the South African Companies Act 71 of 2008.

The consolidated financial statements have been prepared on the historical cost basis except for the derivative financial instruments which are measured at fair value.

The company and group statements of financial position are presented in order of liquidity. Reference to the current maturities of these financial assets and liabilities are disclosed in the statement of financial position notes and in the analysis of financial assets and liabilities. The accounting policies are consistent with the previous year with the exception of the adoption of IFRS 9 which is set out in note 1 below.

The group has made the following accounting policy elections in terms of IFRS, with reference to the detailed accounting policies shown in brackets:

- property and equipment are accounted for using the cost model (accounting policy 5);
- intangible assets are accounted for using the cost model (accounting policy 7);
- regular way purchases or sales of financial assets are recognised and derecognised using trade date accounting (accounting policy 9); and
- cumulative gains and losses recognised in other comprehensive income ('OCI') in terms of a cash flow hedge relationship are transferred from OCI and included in the initial measurement of the non-financial asset or liability (accounting policy 9.6).

All monetary information and figures presented in these consolidated financial statements are stated in millions of South African Rand (Rm), unless otherwise indicated.

The principal accounting policies are set out below:

### 1. CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES

During the year the group elected to early adopt IFRS 9, Financial Instruments (as revised in July 2014 to replace IAS 39, Financial Instruments: Recognition and measurement).

The significant change as a result of the adoption is an increase in provisions against loans and advances, a decrease in loans and advances and a resultant decrease in equity. There is a decrease in interest income with an offsetting decrease in the impairment charge, however a negligible impact on profit after tax, and there is no impact on the statement of cash flows.

The following balance sheet illustrates the impact of the above-mentioned adjustments. The group has elected not to restate comparative numbers in accordance with paragraphs 7.2.15 and 7.2.17 of IFRS 9. It was considered impracticable to restate the 2013 and 2014 financial statements as they included the unsecured lending division which was disposed of during the 2014 financial year. The 2015 opening retained income was restated as follows:

FOR THE YEAR ENDED 30 SEPTEMBER 2015

	Opening balance IAS 39 2015	IFRS 9 initial application 2015	Opening balance IFRS 9	Changes to c	ategorisation

### 2. BASIS OF CONSOLIDATION

### 2.1 SUBSIDIARY COMPANIES AND OTHER CONTROLLED ENTITIES

The consolidated financial statements incorporate the financial statements of the company and entities controlled by the company.

Control is achieved where the company has the power to govern the financial and operating policies of an investee entity so as to obtain benefits from its activities and the ability to use its power over the investee to affect the amount of the investor's returns. In assessing control, potential voting rights which presently are exercisable or convertible are taken into account.

Total comprehensive income is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Intra-group transactions, balances and unrealised gains or losses are eliminated on consolidation.

### Special purpose entities

Special purpose entities ('SPEs') are entities that are created to accomplish a narrow and well-defined objective such as the securitisation of particular asset, or the execution of a specific borrowing or lending transaction. A SPE is consolidated if, based on an evaluation of the substance of its relationship with the group and the SPE's risks and rewards, the group concludes that it controls the SPE including SPEs that are owned by trusts.

The assessment of whether the group has control over an SPE is carried out at inception and normally no further reassessment of control is carried out in the absence of changes in the structure or terms of the SPE, or additional transactions between the group and the SPE. Day-to-day changes in market conditions normally do not lead to a reassessment of control. However, sometimes changes in market conditions may alter the substance of the relationship between the group and a SPE and in such instances the group determines whether the change warrants a reassessment of control based on the specific facts and circumstances. Where the group's voluntary actions change the relationship between the group and a SPE, the group performs a reassessment of control over the SPE.

### 2.2 BUSINESS COMBINATIONS

Business combinations are accounted for in accordance with the acquisition method of accounting. Subsidiaries are consolidated from the date on which the group acquires effective control of the entity. Consolidation ceases from the date control no longer exists.

On acquisition the identifiable assets and liabilities and contingent liabilities of a subsidiary are measured at their fair values. The cost of an acquisition is the fair value of the assets given, liabilities incurred or assumed and equity instruments issued. Any costs directly relating to the acquisition are expensed to profit and loss.

The consideration for the acquisition includes any asset or liability resulting from a contingent consideration arrangement, measured at its acquisition-date fair value. Subsequent changes in such fair values are adjusted against the cost of acquisition where they qualify as measurement period adjustments. All other subsequent changes in the fair value of contingent consideration classified as an asset or liability are accounted for in accordance with the relevant IFRS. Changes in the fair value of contingent consideration classified as equity are not recognised. Where a business combination is achieved in stages, previously held interests in the acquired entity are re-measured to fair value at the acquisition date (i.e. the date the group attains control) and the resulting gain or loss, if any, is recognised in profit or loss.

The acquiree's identifiable assets, liabilities and contingent liabilities that meet the conditions for recognition under IFRS 3 are recognised at their fair value at the acquisition date, except that:

- deferred tax assets or liabilities and liabilities or assets related to employee benefit arrangements are recognised and measured in accordance with IAS 12 Income Taxes ('IAS 12') and IAS 19 Employee Benefits ('IAS 19') respectively;
- assets (or disposal groups) of the acquiree that are classified as held for sale in accordance with IFRS 5 Noncurrent Assets Held for Sale and Discontinued Operations ('IFRS 5') are measured in accordance with that standard.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period, or additional assets or liabilities are recognised, to reflect new information obtained about facts and circumstances that existed as of the acquisition date that, if known, would have affected the amounts recognised as of that date.

The measurement period is the period from the date of acquisition to the date the group obtains complete information about facts and circumstances that existed as of the acquisition date and is subject to a maximum of one year.

The non-controlling interest in the acquiree is measured at acquisition date at either at fair value or at the noncontrolling interest's proportionate share of the acquiree's identifiable net assets (applied on a transaction by transaction basis for all business combinations). The treatment is not an accounting policy choice but is selected for each business combination, and disclosed in the note for business combinations.

Premiums or discounts arising on the acquisition of subsidiaries are treated in terms of the group's accounting policy for goodwill.

FOR THE YEAR ENDED 30 SEPTEMBER 2015

### 3. INVESTMENTS IN JOINT VENTURES AND SUBSIDIARIES

### 3.1 JOINT VENTURES

Investments in operations, which are not subsidiaries, but over which the group has the ability to exercise significant influence, are classified as joint ventures and initially recognised at cost. The group's investment in joint ventures includes goodwill identified on acquisition, net of any accumulated impairment loss.

The group's share of the results for the year of the joint ventures is included in the consolidated statement of comprehensive income according to the equity method. In the absence of a legal or constructive obligation to make payments on behalf of a joint venture, losses are recognised only to the extent they reduce the carrying value to zero. Equity accounted results represents the group's proportionate share of the profits or losses of these entities.

Attributable income or losses and movements on reserves since acquisition, less dividends received, are included in the carrying value of these investments. The requirements of IFRS 9: Financial Instruments ('IFRS 9') are applied to determine whether it is necessary to recognise any impairment loss with respect to the group's investment in a joint venture. When necessary, the entire carrying amount of the investment (including goodwill) is tested for impairment by comparing its recoverable amount with its carrying amount. Any impairment loss forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognised to the extent that the recoverable amount of the investment subsequently increases.

Upon disposal of part of a joint venture that result in the group losing significant influence over that associate, any retained investment is measured at fair value at that date and the fair value is regarded as its fair value on initial recognition as a financial asset in accordance with IFRS 9. The difference between the previous carrying amount of the joint venture attributable to the retained interest and its fair value is included in the determination of the gain or loss on disposal of the joint venture. In addition, the group accounts for all amounts previously recognised in other comprehensive income in relation to that associate on the same basis as would be required if that associate had directly disposed of the related assets or liabilities.

Unrealised gains on transactions between the group and its joint ventures are eliminated to the extent of the group's interest in the joint ventures. Unrealised losses are not eliminated if the transaction provides evidence of an impairment of the asset transferred.

Accounting policies of the joint ventures have been changed where necessary to ensure consistency with the policies adopted by the group.

### 3.2. FINANCIAL STATEMENTS OF THE COMPANY

Investments in subsidiaries and joint ventures are accounted for at cost less accumulated impairment.

### 4. GOODWILL

The group measures goodwill as the fair value of the consideration transferred including the recognised amount of any non-controlling interest in the acquiree, less the net fair value of the identifiable assets acquired and liabilities assumed, all measured as of the acquisition date. When the excess is negative, a bargain purchase gain is recognised immediately in profit or loss.

At the acquisition date, goodwill acquired is allocated to cash-generating units ('CGU's) that are expected to benefit from the synergies of the combination.

A CGU to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the CGU is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amounts of assets in the unit. Any impairment loss for goodwill is recognised directly in profit or loss. Any impairment loss for goodwill is not reversed in subsequent periods.

On disposal of a subsidiary, associate, jointly controlled entity or a CGU, the amount of goodwill attributable is included in the determination of the profit or loss on disposal.

### 5. PROPERTY AND EQUIPMENT

Property and equipment is stated at cost less accumulated depreciation and impairment losses.

Cost includes expenditures that are directly attributable to the acquisition of the asset. Subsequent costs are recognised to the extent that it is probable that the future economic benefits that are associated with them will flow to the entity, and the cost can be measured reliably. If a replacement part is recognised in the carrying amount of equipment, the carrying amount of the replaced part is derecognised. Repairs and maintenance are expensed as and when incurred.

Items of property and equipment are depreciated on a component basis to their residual values, on the straight line basis over their estimated economic lives. Depreciation commences from the date that they are available for use over the following periods:

Office and computer equipment

5 years

2 - 6 years

FOR THE YEAR ENDED 30 SEPTEMBER 2015

### 5. PROPERTY AND EQUIPMENT continued

The residual values and estimated useful lives of the assets are reviewed at each financial year end and, if expectations differ from previous estimates, the changes are accounted for as changes in accounting estimates. Residual value assessments consider issues such as future market conditions, the remaining life of the asset and projected disposal values.

Assets that are subject to depreciation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An asset's carrying amount is written down immediately to its recoverable amount if that asset's carrying amount is greater than its estimated recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell and value in use.

The profit or loss arising on the disposal or retirement of an asset is determined as the difference between the sale proceeds and the carrying amount of the asset and is recognised in profit or loss.

### 6. NON-CURRENT ASSETS HELD FOR SALE

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when a sale is highly probable, the asset or disposal group is available for immediate sale in its present condition and when management is committed to the sale which is expected to qualify for recognition as a completed sale within one year from date of classification. Non-current assets and liabilities (including disposal groups) classified as held for sale are measured at the lower of carrying value and fair value less costs to sell.

### 7. INTANGIBLE ASSETS

Intangible assets are initially recognised at cost if acquired separately or at fair value at the date of acquisition in a business combination. Subsequently, intangible assets are carried at cost less accumulated amortisation and impairment.

Development costs which relate to the design and testing of new improved products, systems or processes are recognised as an asset to the extent that it is expected that such assets will generate future economic benefits. Intangible assets are amortised to their residual values, on the straight line basis over the estimated economic lives over the following periods:

Computer and telephony software 2 – 10 years
Distribution channel 3 years

Useful lives and amortisation methods are reviewed at the end of each reporting period, with the effect of any changes in estimate being recognised on a prospective basis.

### 8. INVENTORIES

Inventories are stated at the lower of cost or net realisable value. Cost is determined using the weighted average method. Costs include landed cost, freight and clearing costs. Net realisable value is the estimated selling price in the ordinary course of business, less the cost of completion and selling expenses. The write down of inventory to net realisable value and the reversal thereof is recognised in profit and loss. The reversals of the write downs are limited to the cost of inventory.

### 9. FINANCIAL INSTRUMENTS

A financial instrument is defined as a contract that gives rise to a financial asset in one entity and a financial liability or equity instrument in another entity.

The group recognises financial assets and financial liabilities at the trade date when it becomes a party to the contractual provisions of the instrument.

### 9.1 INITIAL RECOGNITION

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

Financial instruments are grouped into classes that are appropriate taking into account the characteristics and risks of those financial instruments. Classes of financial instruments have been determined by referring to the nature and extent of risks arising from the financial instruments and how these are managed.

The group generally does not reclassify financial instruments between different categories subsequent to initial recognition.

FOR THE YEAR ENDED 30 SEPTEMBER 2015

### 9. FINANCIAL INSTRUMENTS continued

### 9.2 CLASSIFICATION

Financial assets are classified into the following categories:

- At fair value through profit or loss;
- At fair value through other comprehensive income; and
- Amortised cost.

Financial liabilities are classified into the following categories:

- Financial liabilities at fair value through profit or loss; and
- Financial liabilities at amortised cost.

A financial asset is measured at amortised cost if

- The financial asset is held in order to collect contractual cash flows; and
- The contractual terms of the financial asset give rise to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A financial asset is measured at fair value through other comprehensive income if

- The financial asset is held in order to collect contractual cash flows and to be sold; and
- The contractual terms of the financial asset give rise to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A financial asset is measured at fair value through profit and loss unless it is measured at amortised cost or at fair value through other comprehensive income. In certain instances the business model is not to collect contractual cash flows, nor sell the asset and in these cases the financial asset is held at fair value through profit and loss.

The group may make an irrevocable election at initial recognition for particular investments in equity instruments that would otherwise be measured at fair value through profit and loss to present subsequent changes in the fair value through other comprehensive income.

On adoption of IFRS 9, the group made an irrevocable election to present changes in the fair value of the investment in Guardrisk at fair value through other comprehensive income. This investment is neither held for trading nor contingent consideration recognised in a business combination.

The group may at initial recognition irrevocably designate a financial asset as measure at fair value through profit or loss if doing so significantly reduces a measurement or recognition inconsistency (sometimes referred to as an accounting mismatch) that would otherwise arise from measuring financial assets or liabilities or recognising the gains and losses on them on different bases.

The group classifies all financial liabilities as subsequently measured at amortised cost.

### 9.2.1 Financial assets

### 9.2.2 Financial assets at fair value through profit or loss

9.2.3 Financial assets that are held at fair value through profit and loss include entry level vehicles and certain purchased book debts that are either managed on a fair value basis or that do not meet the requirements to be measured at amortised cost (referred to other financial assets in note 5 in the financial statements).

Realised and unrealised gains and losses arising from changes in the fair value of financial assets classified as at fair value through profit or loss are included in profit or loss in the period in which they arise.

### 9.2.4 Financial assets at fair value through other comprehensive income

Financial assets that are held at fair value through other comprehensive income include derivative financial instruments and investments in unlisted entities.

### 9.2.5 Amortised cost

These instruments are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Financial assets which have been classified as loans and receivables include cash that do not meet the definition of cash as defined in IAS 7 Statement of Cash Flows, trade and other receivables, loans and advances, purchased book debts and other loans receivable.

Loans and receivables are initially recognised at fair value. Subsequently loans and receivables are carried at amortised cost using the effective interest method, less any impairment losses. Amortised cost is calculated by taking into account any transaction costs on acquisition and fees and costs that are an integral part of the effective interest rate.

FOR THE YEAR ENDED 30 SEPTEMBER 2015

### 9. FINANCIAL INSTRUMENTS continued

### 9.2 **CLASSIFICATION** continued

### 9.2.5 Amortised cost continued

The carrying amount of loans considered to be impaired on the statement of financial position is reduced through the use of an expected loss impairment methodology.

The group only recognises the cumulative changes in lifetime expected credit losses since initial recognition as a loss allowance for purchased or originated credit-impaired assets. At each reporting date, the group recognises in profit or loss the amount of the hange in lifetime expected credit losses as an impairment gain or loss. The group recognises favourable changes in lifetime expected credit losses as an impairment gain, even if the lifetime expected credit losses are less than the amount of expected credit losses that were included in the estimated cash flows on initial recognition.

Credit loss is the difference between all contractual cash flows that are due to the group in accordance with the contract and all the cash flows that the group expects to receive (ie all cash shortfalls), discounted at the original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets). The group estimates cash flows by considering all contractual terms of the financial instrument through the expected life of that financial instrument. The cash flows that are considered include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms. There is a presumption that the expected life of a financial instrument can be measured reliably, however in rare cases when it is not possible to reliably estimate the expected life of a financial instrument, the group uses the remaining contractual terms of the financial instrument.

Expected credit losses are the weighted average of credit losses with the respective risks of default occurring as the weights.

Lifetime expected credit losses are those expected credit losses that results from all possible default events over the expected life of a financial instrument.

The loss allowance is the allowance for expected credit losses on financial assets measured at amortised cost, lease receivables and contract assets, the accumulated impairment amount for financial assets measured at fair value through other comprehensive income and the provision for expected credit losses on loan commitments and financial guarantee contracts.

Purchased or originated credit-impaired financial assets are those which are credit-impaired on initial recognition.

A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired include observable data about the following events:

- Significant financial difficulty of the issuer or the borrower;
- A breach of contract, such as a default;
- The lender(s) of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession that the lender(s) would not otherwise consider;
- It is becoming probable that the borrower will enter bankruptcy or other financial reorganisation;
- The disappearance of an active market for that financial asset because of financial difficulties; or
- The purchase or origination of a financial asset at a deep discount that reflects the incurred credit losses.

The majority of the group's advances are included in the loans and receivables category. Also included in the loans and receivables category are the purchased book debts.

Purchased book debts are portfolios of written-off consumer debts purchased at prices below the nominal receivable amounts.

Purchased book debts, other than those at fair value through profit and loss (referred to as other financial assets in note 5 in the financial statements), are reflected at amortised cost on a portfolio basis. Cost includes amounts payable to the vendor and other direct acquisition costs.

### 9.2.6 Impairment

The group recognises a loss allowance for expected credit losses on financial assets that are measured at amortised cost, at fair value through other comprehensive income, lease receivables, contracts or loan commitments and financial guarantee contracts.

The group applies the impairment requirements for the recognition and measurement of a loss allowance for financial assets that are measured at fair value through other comprehensive income. The loss allowance is recognised in other comprehensive income and does not reduce the carrying amount of the financial asset in the statement of financial position.

The loss allowance for a financial instrument is measured at the lifetime expected credit losses if the credit risk on that financial asset has increased significantly since initial recognition. The group only recognises cumulative changes in lifetime expected losses since initial recognition on purchased or originated credit-impaired assets such as purchased books.

FOR THE YEAR ENDED 30 SEPTEMBER 2015

### 9. FINANCIAL INSTRUMENTS continued

### 9.2 CLASSIFICATION continued

### 9.2.6 Impairment continued

The impairment requirements result in the recognition of lifetime expected credit losses for all financial instruments for which there have been significant increases in credit risk since initial recognition, whether assessed on an individual or collective basis, considering all reasonable and supportable information, including that which is forward looking.

If at the reporting date, the credit risk on a financial instrument has not increased significantly since initial recognition, the group measures the loss allowance for that financial instrument at an amount equal to 12-month expected credit losses. This does not apply to purchased or originated credit-impaired assets on which the group only recognises cumulative changes in lifetime expected losses since initial recognition. 12-month expected credit losses are the portion of the lifetime expected credit losses that represent the expected credit losses that result from default events on a financial instrument that are possible within 12 months after reporting date.

For loan commitments and financial guarantee contracts, the date that the group becomes party to the irrevocable commitment is considered the date of initial recognition for the purposes of applying the impairment requirements.

If the group has measured the loss allowance for a financial instrument at an amount equal to lifetime expected credit losses in the previous reporting period, but determines at the current reporting date that there is no longer a significant increase in credit risk since initial recognition, the loss allowance is measured at an amount equal to 12 month expected credit losses at the current reporting date.

Impairment losses or reversals are recognised in profit or loss.

### Determining significant increases in credit risk

The group assumes that the credit risk on a financial instrument has not increased significantly if the financial instrument is determined to have a low credit risk at the reporting date.

If reasonable and supportable forward-looking information is available without undue cost or effort, the group relies on this information as well as historic information when determining whether credit risk has increased significantly since initial recognition. However, when information that is more forward-looking than past due status is not available without undue cost or effort, the group may use past due information to determine whether there have been significant increases in credit risk since initial recognition.

A detailed description of the group's approach to determine significant increases in credit risk have been included in note 31.

### Modified financial assets

If the contractual cash flows on a financial asset have been renegotiated or modified and the financial asset was not derecognised, the group assesses whether there has been a significant increase in the credit risk of the financial instrument by comparing the risk of a default occurring at the reporting date (based on the modified contractual terms) and the risk of default occurring at initial recognition (based on the original, unmodified contractual terms).

### Purchased or originated credit-impaired financial assets

The group only recognises cumulative changes in lifetime expected credit losses since initial recognition as a loss allowance for principal book portfolios. Any changes in lifetime expected credit losses are recognised in profit or loss. The group recognises favourable changes in lifetime expected credit losses as an impairment gain, even if lifetime expected credit losses are less than the amount of expected credit losses that were included in the estimated cash flows on initial recognition.

### Measurement of expected credit losses

The group measures expected credit losses of a financial instrument in a way that reflects

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The above is described in more detail in note 31 of the financial statements.

The maximum period considered when measuring expected credit losses is the maximum contractual period (including extension options) over which the group is exposed to credit risk, and not a longer period, even if that period is consistent with business practice.

FOR THE YEAR ENDED 30 SEPTEMBER 2015

### 9. FINANCIAL INSTRUMENTS continued

### 9.3 FINANCIAL LIABILITIES AND EQUITY INSTRUMENTS ISSUED BY THE GROUP

### 9.3.1 Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement.

### 9.3.2 Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the group are recognised at the proceeds received, net of direct issue costs.

Repurchase of the company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the company's own equity instruments.

The group's share incentive schemes are operated through trusts. These trusts are considered to be special purpose entities of the group and therefore consolidated.

### 9.3.3 Compound instruments

The component parts of compound instruments issued by the group are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangement. At the date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for a similar non-convertible instrument. This amount is recorded as a liability on an amortised cost basis using the effective interest method until extinguished upon conversion or at the instrument's maturity date.

The equity component is determined by deducting the amount of the liability component from the fair value of the compound instrument as a whole. This is recognised and included in equity, net of income tax effects, and is not subsequently re-measured.

### 9.3.4 Financial liabilities at fair value through profit or loss

Financial liabilities that are held for trading purposes include derivative financial instruments.

Realised and unrealised gains and losses arising from changes in the fair value of financial liabilities classified as at fair value through profit or loss are included in the profit or loss in the period in which they arise.

### 9.3.5 Financial liabilities at amortised cost

Financial liabilities which are subsequently recognised at amortised cost using the effective interest method comprise interest bearing liabilities, bank overdrafts and trade payables.

### 9.4 DERIVATIVE INSTRUMENTS

A derivative is a financial instrument whose value changes in response to an underlying variable, that requires little or no initial investment and that is settled at a future date. The group uses derivative financial instruments to manage its exposure to foreign exchange and interest rate risk. The group does not hold or issue derivative financial instruments for trading purposes. Derivative financial instruments comprise foreign exchange contracts and interest rate swaps.

Derivative financial instruments are initially recognised in the statement of financial position at fair value. Derivatives are subsequently re-measured at their fair value with all movements in fair value recognised in profit or loss, unless it is a designated and effective hedging instrument. The method of recognising the resulting fair value gain or loss depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged.

The group treats derivatives embedded in other financial or non-financial instruments such as the conversion option in a convertible bond, as separate derivatives when:

- their risks and characteristics are not closely related to those of the host contract;
- they meet the definition of a derivative; and
- the host contract is not carried at fair value, with gains and losses reported in profit or loss.

### 9.5 FAIR VALUE

Certain of the group's financial instruments are carried at fair value through profit or loss such as derivative financial instruments. The fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The best evidence of the fair value of a financial instrument at initial recognition is the transaction price (i.e. the fair value of the consideration given or received) unless the fair value of that instrument is evidenced by comparison with other observable current market transactions in the same instrument (i.e. without modification or repackaging) or based on a valuation technique whose variables include only data from observable markets.

FOR THE YEAR ENDED 30 SEPTEMBER 2015

### 9. FINANCIAL INSTRUMENTS continued

### 9.5 FAIR VALUE continued

The method of determining the fair value of financial instruments is analysed into the following categories:

- Level 1 Unadjusted quoted prices in active markets where the quoted price is readily available and the price represents actual and regularly occurring market transactions on an arm's length basis.
- Level 2 Valuation techniques using market observable inputs, including:
  - using recent arm's length market transactions;
  - reference to the current fair value of similar instruments; and
  - discounted cash flow analysis, pricing models or other techniques commonly used by market participants.
- Level 3 Valuation techniques, as described for level 2 above, for which not all inputs are market observable prices or rates.

  Such a financial instrument is initially recognised at the transaction price, which is the best indicator of fair value, although the value obtained from the relevant valuation model may differ. The difference between the transaction price and the model value, commonly referred to as 'day one profit and loss", is either amortised over the life of the transaction, deferred until the instrument's fair value can be determined using market observable inputs, or realised through settlement.

The valuation techniques in level 2 and level 3 use inputs such as interest rate yield curves, equity prices, commodity and currency prices / yields, volatilities, and the correlation between inputs. The models used in these valuation techniques are calibrated against industry standards, economic models and against observed transaction prices, where available.

### 9.6 HEDGE ACCOUNTING

The group designates certain derivatives in respect of foreign currency risk and interest rate risk, as cash flow hedges. Hedges of foreign exchange risk on firm commitments are accounted for as cash flow hedges.

Hedge accounting is used for derivatives designated in this way, provided specific criteria are met. The group documents, at the inception of the transaction, the relationship between hedging instruments and hedged items, as well as its risk management objective and strategy for undertaking various hedge transactions. The group also documents its assessment, both at hedge inception and on an on-going basis, of whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in cash flows of hedged items.

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges are recognised in the cash flow hedging reserve in equity. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss. Where the forecast transaction or a foreign currency firm commitment results in the recognition of a non-financial asset, the gains and losses previously deferred in equity are transferred from equity and included in the initial measurement of the cost of the non-financial asset.

Hedge accounting is discontinued when the group revokes the hedging relationship, when the hedging instrument expires or is sold, terminated, or exercised, or when it no longer qualifies for hedge accounting.

### 9.7 OFFSETTING

Financial assets and liabilities are offset and the net amount reported in the statement of financial position, when there is a legally enforceable right to set off the recognised amounts and there is an intention to realise the asset and settle the liability simultaneously.

### 9.8 DERECOGNITION

Financial assets (or a portion thereof) are derecognised when the group realises the rights to the benefits specified in the contract, the rights expire or the group surrenders or otherwise loses control of the contractual rights that comprise the financial asset. On derecognition, the difference between the carrying amount of the financial asset and proceeds receivable and any prior adjustment to reflect fair value that had been reported in equity are included in profit or loss.

Financial liabilities (or a portion thereof) are derecognised when the obligation specified in the contract is discharged, cancelled or expires. On derecognition, the difference between the carrying amount of the financial liability, including related unamortised costs, and the amount paid for it are included in the statement of comprehensive income.

FOR THE YEAR ENDED 30 SEPTEMBER 2015

### 10. PROVISIONS, CONTINGENT LIABILITIES AND CONTINGENT ASSETS

Provisions are liabilities of uncertain timing or amount. They are recognised when the group has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The amount recognised as provisions is the best estimate of the consideration required to settle the present obligation at the end of the reporting period taking into account the risks and uncertainties surrounding the obligation.

Contingent liabilities and contingent assets are not recognised in the financial statements.

### 11. IMPAIRMENT OF ASSETS OTHER THAN FINANCIAL INSTRUMENTS

The group reviews the carrying amounts of tangible and intangible assets at each financial year-end to determine whether there is any indication of impairment. The recoverable amount of these assets is estimated in order to determine the extent of the any impairment loss. Where it is not possible to estimate the recoverable amount of an individual asset, the group estimates the recoverable amount of the CGU to which the asset belongs. Goodwill is assessed at each financial year-end for impairment.

Recoverable amount is the greater of fair value less cost to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount is estimated to be less than its carrying amount, the carrying amount is reduced to its recoverable amount. Impairment losses are allocated to assets within a CGU (i.e. first to goodwill and then to the other assets on a pro rata basis) and recognised in the income statement.

Where an impairment loss (other than an impairment of goodwill) subsequently reverses, the carrying amount is increased to the revised estimate of its recoverable amount limited to an amount which does not exceed the carrying amount that would have been determined had no impairment loss been recognised in prior years. A reversal of an impairment loss is recognised as income immediately, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

### 12. REVENUE RECOGNITION

### 12.1 GENERAL POLICY

Revenue is recognised to the extent that it is probable that economic benefits will flow to the group and the revenue can be reliably measured.

Revenue comprises invoiced sales in respect of the sale of goods, fees for rendering of services to customers, collection of owned book debts and finance charges on loans and suspensive sale credit agreements.

### 12.2 INTEREST INCOME

Interest income is recognised in the statement of comprehensive income for all instruments measured at amortised cost using the effective interest method.

This is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for:

- purchased or originated credit-impaired financial assets. For those financial assets, the group applies the credit-adjusted effective interest rate to the amortised cost of the financial asset from initial recognition.
- financial assets that are not purchased or originated credit-impaired financial assets but subsequently have become credit-impaired financial assets. For those financial assets, the group applies the effective interest rate to the amortised cost of the financial asset in subsequent reporting periods.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liability to the gross carrying amount of a financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the group estimates the expected cash flows by considering all the contractual terms of the financial instrument but does not consider the expected credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts.

The credit-adjusted effective interest rate is the rate that exactly discounts the estimated future cash payments or receipts through the expected life of the financial asset to the amortised cost of a financial asset that is a purchased or originated credit-impaired financial asset. When calculating the credit-adjusted effective interest rate, the group estimates the expected cash flows by considering all the contractual terms of the financial asset and expected credit losses.

FOR THE YEAR ENDED 30 SEPTEMBER 2015

### 12. REVENUE RECOGNITION continued

### 12.3 PURCHASED BOOK DEBTS

Revenue from purchased book debts comprises payments received from the debtors, including amounts in respect of interest and cost recoveries

### 12.4 DEBT COLLECTION ACTIVITIES

Commissions and fees receivable for collection of debtors for third parties are recognised on receipt of payments from the debtors

### 12.5 SALES OF GOODS

Revenue from the sale of goods is recognised when all the following conditions are satisfied:

- The group has transferred to the buyer the significant risks and rewards of ownership of the goods;
- $\blacksquare$  The group retains neither continuing managerial involvement to the degree usually associated with

ownership nor effective control over the goods sold;

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the group; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Specifically, revenue from the sale of goods is recognised when goods are delivered and legal title is passed.

### 12.6 RENDERING OF SERVICES

Fees and commission income are recognised on a percentage of completion basis when costs can be reliably measured and receipt of the future economic benefits is probable.

### 12.7 ROYALTIES

Royalty income is recognised on an accrual basis in accordance with the substance of the relevant agreement.

### 12.8 NON-OPERATING INCOME

Dividend income from investments is recognised when the shareholder's right to receive payment has been established (provided that it is probable that the economic benefits will flow to the group and the amount of income can be measured reliably).

### **12.8 GOVERNMENT GRANTS**

Government grants are not recognised until there is reasonable assurance that the group will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognised in profit or loss on a systematic basis over the periods in which the group recognises as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the group should purchase, construct or otherwise acquire non-current assets are recognised as deferred revenue in the consolidated statement of financial position and transferred to profit or loss on a systematic and rational basis over the useful lives of the related assets. Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the group with no future related costs are recognised in profit or loss in the period in which they become receivable.

The benefit of a government loan at a below-market rate of interest is treated as a government grant, measured as the difference between proceeds received and the fair value of the loan based on prevailing market interest rates.

FOR THE YEAR ENDED 30 SEPTEMBER 2015

### 13. GAINS AND LOSSES

A gain or loss on a financial asset or financial liability that is measured at fair value is recognised in profit or loss unless:

- It is part of a hedging relationship;
- It is an investment in an equity instrument and the group has elected to present gains and losses on that investment in other comprehensive income;
- It is a financial liability designated as at fair value through profit or loss and the change is as a result of changes in credit risk. In this case the group is required to present the effects of changes in the liability's credit risk in other comprehensive income; or
- It is a financial asset measured at fair value through other comprehensive income.

### 14. INTEREST EXPENSE

Interest expense comprise interest on borrowings including debentures, dividends on redeemable preference shares, and other costs incurred in connection with the borrowing of funds.

Interest expense is recognised in the period in which it is incurred using the effective interest method except to the extent in which it meets the criteria for capitalisation against a qualifying asset in which case it is capitalised as part of the cost of the asset.

### 15. TAXATION

### 15.1 CURRENT

The charge for current tax is based on the results for the year adjusted for items which are tax exempt or are not tax deductible. Tax is calculated using rates that have been enacted or substantively enacted by the financial year-end.

### 15.2 DEFERRED TAX

Deferred tax is calculated using the liability method.

A deferred tax liability is recognised for all taxable temporary differences, except to the extent that the deferred tax liability arises from:

- the initial recognition of goodwill; or
- the initial recognition of an asset or liability in a transaction which is not a business combination and at the time of the transaction, affects neither accounting profit or taxable profit nor tax loss.

A deferred tax liability is recognised for all taxable temporary differences associated with investments in subsidiaries and associates, except to the extent that both of the following conditions are satisfied:

- The company is able to control the timing of the reversal of the temporary difference; and
- it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax is calculated using taxation rates that have been enacted or substantially enacted at financial yearend. The effect on deferred tax of any changes in taxation rates is charged to profit or loss, except to the extent that it relates to items previously charged or credited directly to equity in which case the deferred tax is charged to equity.

Deferred tax assets are recognised to the extent that it is probable that future profits will be available against which the associated tax deductible temporary differences can be utilised.

Deferred tax related to fair value measurement of cash flow hedges, which are charged or credited directly to other comprehensive income, is also credited or charged directly to other comprehensive income and is subsequently recognised in profit or loss together with the deferred gain or loss. Deferred tax assets and deferred income tax liabilities are offset, if a legally enforceable right exists to set off current income tax assets against current income tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

### 15.3 INDIRECT TAXATION

Indirect taxation in the form of non-claimable value-added tax (VAT) on expenses is disclosed as indirect taxation in profit or loss. The non-claimable VAT on the cost of acquisition of fixed assets is amortised over the useful lives of the fixed assets and is included in depreciation in the statement of comprehensive income. The net amount of VAT recoverable from, or payable to, the taxation authority is included as part of the receivables or payables in the statement of financial position.

FOR THE YEAR ENDED 30 SEPTEMBER 2015

### 16 LEASE ACCOUNTING

Leases of assets where the group assumes substantially all the risks and rewards of ownership, are classified as finance leases.

All other leases are classified as operating leases.

### **16.1 FINANCE LEASES**

### 16.1.1 Lessors

Assets subject to finance lease agreements are derecognised and the finance lease is recognised as a receivable at an amount equal to the net investment in the lease (gross investment less unearned finance income).

The gross investment in the lease comprises the aggregate of the following:

- The minimum lease payments receivable under the finance lease;
- Any unguaranteed residual value accruing under the lease; and
- The initial direct costs incurred in negotiating the lease.

The interest element of the finance income is credited to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the lease receivable for each period.

### **16.2 OPERATING LEASES**

### 16.2.1 Lessees

Lease payments under operating leases are recognised in profit or loss on a straight line basis over the expected lease term.

### 17. EMPLOYEE BENEFITS

### 17.1 MEDICAL AID OBLIGATION

Medical aid costs are recognised as an expense in the period in which the employees render services to the group. Differences between contributions payable and contributions actually paid are shown as either prepayments or accruals in the statement of financial position. There are no post-retirement benefit obligations for former employees.

### **17.2 RETIREMENT FUNDS**

The group's contributions to defined contribution plans are recognised as an expense in the period in which the related services are rendered. There are no defined benefit plans for employees.

### 17.3 EMPLOYEES' LEAVE ENTITLEMENT

Employee entitlements to annual leave are recognised when they accrue to employees. An accrual is made for the annual leave liability at the financial year-end. Unutilised sick leave does not accrue to employees.

### 17.4 TERMINATION BENEFITS

The group recognises termination benefits as a liability in the statement of financial position and as an expense in profit or loss when it has a present obligation relating to termination. The group has a present obligation when it is demonstrably committed to either terminating the employment of current employees according to a detailed formal plan, without possibility of withdrawal or providing termination benefits as a result of an offer to encourage voluntary redundancy.

### 17.5 BONUSES

Management and staff bonuses are recognised as an expense in staff costs as incurred when it is probable that the economic benefits will be paid and the amount can be reliably measured.

FOR THE YEAR ENDED 30 SEPTEMBER 2015

### 18. SHARE-BASED TRANSACTIONS

Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date. Details regarding the determination of the fair value of the equity-settled share-based transactions are set out in note 24.

The fair value determined at the grant date of the equity settled share-based transactions is expensed on a straight line basis over the vesting period, based on the group's estimate of equity instruments that will eventually vest, with a corresponding increase in equity. At the end of each reporting period, the group revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the equity settled share-based payments reserve.

### 19. OPERATING SEGMENTS

An operating segment is a component of the group:

- that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the group);
- whose operating results are regularly reviewed by the group's chief operating decision makers to make decisions about resources to be allocated to the segment and assess its performance; and
- for which discrete financial information is available.

The group is managed in terms of three primary segments:

- Asset-backed lending;
- Risk services; and
- Group executive office.

### 20. FOREIGN CURRENCIES

### 20.1 FOREIGN CURRENCY TRANSACTIONS

Foreign currency transactions are converted to South African Rand at the rates of exchange ruling at the date of transaction. Monetary assets and liabilities denominated in foreign currencies at the financial year-end are translated to South African Rand at the rates ruling at that date. Gains or losses on translation are recognised in the statement of comprehensive income.

### 20.2 FINANCIAL STATEMENTS OF FOREIGN OPERATIONS

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on consolidation, are translated to South African Rand at foreign exchange rates ruling at the financial year-end. The revenues and expenses of foreign operations are translated to South African Rand at rates approximating the foreign exchange rates ruling at the date of the transactions.

Foreign exchange differences arising on translation are recognised directly in other comprehensive income.

### 21. DIVIDENDS PAID

Dividends are recognised against equity in the period in which they are approved by the company's directors. Dividends declared after the reporting date are not recognised but disclosed as a post reporting date event.

FOR THE YEAR ENDED 30 SEPTEMBER 2015

### 22. DISCONTINUED OPERATIONS

The group classifies a component as a discontinued operation when that component has been disposed of, or is classified as held for sale, and:

- it represents a separate major line of business or geographical area of operations;
- is part of a single coordinated plan to dispose of a separate major line of business or geographical area of operations;
- II 01
- is a subsidiary acquired exclusively with a view to resale.

A component of a group comprises operations and cash flows that can be clearly distinguished, operationally and for financial reporting purposes from the rest of the group.

### 23. MANAGEMENT ESTIMATES

The preparation of financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that may affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and other factors that are believed to be reasonable under the circumstances. This forms the basis of making the judgements on carrying values of assets or liabilities that are not otherwise readily apparent. Actual results may differ from these estimates. The estimates and assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision only affects that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Certain accounting policies have been identified as involving particularly complex or subjective judgements or assessments, as follows:

### 23.1 ASSET LIVES AND RESIDUAL VALUES

Property and equipment is depreciated over its useful life taking into account residual values, where appropriate. The actual lives of the assets and residual values are assessed at each financial year-end and may vary depending on a number of factors. In re-assessing asset lives, factors such as technological innovation, product life cycles and maintenance programmes are taken into account.

### 23.2 DEFERRED TAX ASSETS

Deferred tax assets are recognised to the extent it is probable that taxable income will be available in future against which they can be utilised. Future taxable profits are estimated based on business plans which include estimates and assumptions regarding economic growth, interest, inflation, taxation rates and competitive forces.

### 23.3 IMPAIRMENT OF NON-FINANCIAL ASSETS

Determining whether goodwill is impaired requires an estimation of the value in use of the CGU to which goodwill has been allocated. The value in use calculation requires the directors to estimate the future cash flows expected to arise from the CGU and a suitable discount rate in order to calculate present value. Goodwill is considered for impairment annually.

Property and equipment and intangible assets are considered for impairment if there is any reason to believe that an impairment may be necessary. Factors taken into consideration include the economic viability of the asset itself and, where it is a component of a larger economic unit, the viability of the unit. Future cash flows expected to be generated by the assets are projected, taking into account market conditions and the expected useful lives of the assets. The present value of these cash flows, determined using an appropriate discount rate, is compared to the current asset value and, if lower, the assets are impaired to the present value.

### 23.4 IMPAIRMENT OF FINANCIAL ASSETS

The group measures expected credit losses of a financial instrument in a way that reflects

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The maximum period considered when measuring expected credit losses is the maximum contractual period (including extension options) over which the group is exposed to credit risk, and not a longer period, even if that period is consistent with business practice.

The group adopted the following accounting standards and interpretations that became applicable during the current reporting period.

### **IFRS 9** – Financial instruments

This is a finalised version of IFRS 9 which contains accounting requirements for financial instruments, replacing IAS 39 Financial Instruments: Recognition and Measurement. The standard contains requirements in the following areas:

- Classification and measurement
- Impairment
- Hedge accounting
- Derecognition

The impact of this adoption is disclosed in note 29 of the financial statements.

### IAS 36 - Impairment of assets

The amendment reduces the circumstances in which the recoverable amount of assets or cash-generating units are required to be disclosed, clarifies the disclosures required, and introduces an explicit requirement to disclose the discount rate used in determining impairment (or reversals) where recoverable amount (based on fair value less costs of disposal) is determined using a present value technique.

The amendment is effective for the financial year ending 30 September 2015. The amendment does not have a material impact on the group's consolidated financial statements.

### IAS 19 - Employee benefits

This amendment clarifies the requirements that relate to how contributions from employees or third parties that are linked to service should be attributed to periods of service. In addition, it permits a practical expedient if the amount of the contributions is independent of the number of years of service, in that contributions can, but are not required, to be recognised as a reduction in the service cost in the period in which the related service is rendered. The amendment is effective for the financial year ending 30 September 2015. The amendment does not have a material impact on the group's consolidated financial statements.

### IFRIC 21 - Levies

Provides guidance on when to recognise a liability for a levy imposed by a government, both for levies that are accounted for in accordance with IAS 37 Provisions, Contingent Liabilities and Contingent Assets and those where the timing and amount of the levy is certain.

The interpretation identifies the obligating event for the recognition of a liability as the activity that triggers the payment of the levy in accordance with the relevant legislation.

The amendment is effective for the financial year ending 30 September 2015. The amendment does not have a material impact on the group's consolidated financial statements.

### IAS 32 – Financial instruments

This amendment clarifies certain aspects because of diversity in application of the requirements of offsetting.

The amendment is effective for the financial year ending 30 September 2015. The amendment does not have a material impact on the group's consolidated financial statements.

### New standards issued but not yet effective

### **IFRS 15** – Revenue from contracts with customers

The standard provides a single, principles based five-step model to be applied to all contracts with customers. Guidance is provided on topics such as the point at which revenue is recognised, accounting for variable considerations, costs of fulfilling and obtaining a contract and various related matters. New disclosures about revenue are also introduced.

The amendment is effective for the financial year ending 30 September 2019. The amendment is not expected to have a material impact on the group's consolidated financial statements.

### **IFRS 11** – Joint arrangements

This will require an acquirer of an interest in a joint operation in which the activity constitutes a business (as defined in IFRS 3 Business Combinations) to apply all of the business combinations accounting principles in IFRS 3 and other IFRSs, except for those principles that conflict with the guidance in IFRS 11 and to disclose the information required by IFRS 3 and other IFRSs for business combinations.

The amendment is effective for the financial year ending 30 September 2017. The amendment is not expected to have a material impact on the group's consolidated financial statements.

### IAS 16 - Property, plant and equipment and IAS 38 - Intangible assets

This amendment clarifies the acceptable methods of depreciation and amortisation.

The amendment is effective for the financial year ending 30 September 2017. The amendment is not expected to have a material impact on the group's consolidated financial statements.

# NEW AND AMENDED ACCOUNTING STANDARDS AND INTERPRETATIONS CONTINUED

FOR THE YEAR ENDED 30 SEPTEMBER 2015

### IAS 27 - Separate financial statements

This amendment permits investments in subsidiaries, joint ventures and associates to be optionally accounted for using the equity method in separate financial statements.

The amendment is effective for the financial year ending 30 September 2017. The amendment is not expected to have a material impact on the group's consolidated financial statements.

### IFRS 10 - Consolidated financial statements and IAS 28 - Investments in associates

This amendment is to clarify the treatment of the sale or contribution of assets from an investor to its associate or joint venture.

The amendment is effective for the financial year ending 30 September 2017. The amendment is not expected to have a material impact on the group's consolidated financial statements.

### IAS 1 - Presentation of financial statements

The amendment is to address perceived impediments to preparers exercising their judgement in presenting their financial reports by making certain changes.

The amendment is effective for the financial year ending 30 September 2017. The amendment is not expected to have a material impact on the group's consolidated financial statements.

### Annual improvements 2010 – 2012

- IFRS 2 Amends the definitions of 'vesting condition' and 'market condition' and adds definitions for 'performance condition' and 'service condition'
- IFRS 3 Requires contingent consideration that is classified as an asset or a liability to be measured at fair value at each reporting date
- IFRS 8 Requires disclosure of the judgements made by management in applying the aggregation criteria to operating segments and to clarify that reconciliations of segment assets are only required if segment assets are reported regularly
- IFRS 13 Clarifies that issuing IFRS 13 and amending IFRS 9 and IAS 39 did not remove the ability to measure certain short-term receivables and payables on an undiscounted basis (amends basis for conclusions only)
- IAS 16 and IAS 38 Clarifies that the gross amount of property, plant and equipment is adjusted in a manner consistent with a revaluation of the carrying amount
- IAS 24 Clarifies how payments to entities providing management services are to be disclosed

The amendment is effective for the financial year ending 30 September 2015. The amendment is not expected to have a material impact on the group's consolidated financial statements.

### Annual improvements 2011 - 2013

- IFRS 1 Clarifies which versions of IFRSs can be used on initial adoption (amends basis for conclusions only)
- $\blacksquare$  IFRS 3 Clarifies that IFRS 3 excludes from its scope the accounting for the formation of a joint arrangement in the financial statements of the joint arrangement itself
- IFRS 13 Clarifies the scope of the portfolio exception in paragraph 52
- IAS 40 Clarifies the interrelationship of IFRS 3 and IAS 40 when classifying property as investment property or owner-occupied property

The amendment is effective for the financial year ending 30 September 2015. The amendment is not expected to have a material impact on the group's consolidated financial statements.

### Annual improvements 2012 - 2014

- IFRS 5 Adds specific guidance in IFRS 5 for cases in which an entity reclassifies an asset from held for sale to held for distribution or vice versa and cases in which held-for-distribution accounting is discontinued
- IFRS 7 Additional guidance to clarify whether a servicing contract is continuing involvement in a transferred asset, and clarification on offsetting disclosures in condensed interim financial statements
- IAS 9 Clarifies that the high quality corporate bonds used in estimating the discount rate for postemployment benefits should be denominated in the same currency as the benefits to be paid
- IAS 34 Clarifies the meaning of 'elsewhere in the interim report' and require a cross-reference

The amendment is effective for the financial year ending 30 September 2017. The amendment is not expected to have a material impact on the group's consolidated financial statements.

11.	GOODWILL Carrying value at the beginning of the year Additions recognised from business combinations Disposal of subsidiaries	192 5	594 - (402)
	Carrying value at the end of the year	197	192
	Composition of goodwill per cash-generating unit SA Taxi Holdings Rand Trust Financiers MBD Principa	63 32 74 28	63 32 74 23
	Total goodwill	197	192
	Goodwill is tested annually for impairment, or more frequently if there are indications that goodwill might be impaired.  When testing goodwill for impairment, the recoverable amounts of cash generating units (CGU) are determined as the lower of value in use and fair value less costs to sell. The CGU's prepare five year forecasts using growth rates based on the specific market segments in which they operate and their expected performance in these markets. The key assumptions for value in use calculations are discount rates, growth rates and expected margins over the determined period. Discount rates reflect management's assessment of risks specific to the CGU as well as current market trends of the time value of money. Growth rates and expected margins are based on industry indicators as well as current and expected business trends.  The group prepares cash flow forecasts based on CGU results for the next five years. A terminal value is calculated based on a growth rate of 3% (2014: 3%). This rate does not exceed the average long term growth rate for the relevant markets. The value in use of the CGU's which are lending businesses is determined based as free cash flows to cost of equity and the value in use of CGU's which operate service businesses is determined based on free cash flow to weighted average cost of capital. The valuation method applied is consistent with that of the prior period.  The goodwill addition in the current year relates to the acquisition of Relate Technologies by Principa Decisions during December 2014.		
12.	DEFERRED TAX  Deferred tax is presented on the statement of financial position as follows:  Deferred tax assets  Deferred tax liabilities  Net deferred tax liabilities	255 (117) 138	93 (186) (93)
	The movements during the year are analysed as follows:  Net deferred tax liabilities at the beginning of the year  IFRS 9 transitional adjustment	(93) 258	(87)
	Revised opening balance Recognised in the income statement for the year - continuing operations Prior year adjustment Disposal of subsidiary companies	165 (21) (6)	(87) (33) 17 10
	Net deferred tax assets/(liabilities) at the end of the year	138	(93)

<sup>\*</sup> The deferred tax asset balance is considered to be fully recoverable

## 24. SHARE-BASED PAYMENTS

# 24.1 DETAILS OF THE SHARE APPRECIATION RIGHTS PLAN

During the 2013 financial year the group implemented a share appreciation rights plan for executives and senior employees of the company and its subsidiaries. In accordance with the terms of the plan, as approved by shareholders at a general meeting, the grant of share appreciation rights (SARs) will be made on an annual or on an ad hoc basis. The number of SARs granted to an employee will take cognisance of the employees grade, performance, term of employment, retention requirements and market benchmarks. A SAR is a conditional right to acquire shares in the company for no consideration, the number being determined by the appreciation in value of a share over a fixed period, and the number of SARs granted.

The following share appreciation rights were in existence at year end:

	Number	Grant date	Expiry date	Grant price (cents)	fair value at grant date (cents)
1) Granted on 11 July 2013	10 977 721	11 Jul 2013	11 Jul 201 <i>7</i>	369	160
2) Granted on 18 November 2013	6 537 741	18 Nov 2013	18 Nov 2017	421	214
3) Granted on 6 May 2014	<i>775</i> 581	06 May 2014	06 May 2018	541	215
4) Granted on 25 November 2014	4 171 685	25 Nov 2014	25 Nov 2019	<i>7</i> 58	343
5) Granted on 5 May 2015	1 135 800	05 May 2015	05 May 2020	919	347

#### **CLASSIFICATION OF FINANCIAL ASSETS**

#### SA Taxi

## Loans and advances on entry level vehicles

Loans and advances provided by SA Taxi on entry level vehicles are held at fair value through profit and loss as they are not held by the entity to collect solely payments of interest and capital. In addition, these assets are managed to realise fair values as management is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions.

The other loan portfolio held by the company, consisting of premium assets, is held and managed by the business in order to collect contractual cash flows, and will therefore continue to be measured at amortised cost applying the guidance contained in IFRS 9.

#### Other investments

On adoption of IFRS 9, SA Taxi made an irrevocable election to present changes in the fair value of the investment in Guardrisk at fair value through other comprehensive income. This investment is neither held for trading nor contingent consideration recognised in a business combination.

#### MBD

## Other financial assets

Other financial assets are classified as financial assets at fair value through profit or loss.

These assets are debt portfolios of which the contractual terms do not give rise to cash flows on specified dates that are solely payments of principal and interest on the principal amount outstanding (SPPI criterion). The conditions for measurement at amortised cost or at fair value through other comprehensive income are therefore not met.

#### 31. FINANCIAL RISK MANAGEMENT

The board is responsible for risk management and the setting of the risk management framework. Oversight of risk management is the responsibility of two board subcommittees; the assets and liabilities committee (ALCO) and the audit, risk and compliance committee (ARC). The ALCO monitors risks associated with liquidity and funding, interest rates, counterparties, currency exposures and capital adequacy. The ARC committee monitors risks associated with financial reporting, accounting policies, internal control and IT governance. The audit, risk and compliance committee is responsible for risk management including setting the risk management framework, setting risk appetite and monitoring the group's management of risk including credit and compliance.

The responsibility for day to day management of risks falls to each of the respective subsidiary's chief executive officer's and their executive committees. Risk management is managed at subsidiary level through the divisional executive committees and reviewed by each of the respective subsidiary boards. Group oversight is the responsibility of the group chief financial officer.

#### 31.1 CREDIT RISK

Credit risk is the risk of loss arising from the failure of a client or counterparty to discharge an obligation to the group. The primary credit risks that the group is exposed to arise from finance leases to minibus taxi operators, invoice discounting and secured mortgage loans. The portfolio of purchased book debts exposes the group to credit risk if they fail to perform in accordance with estimated net future cash flows. It is not the group's strategy to avoid credit risk, but rather to manage credit risk within the group's risk appetite and to earn an appropriate risk adjusted return.

The group limits its counterparty exposure arising from money market instruments by dealing only with well established financial institutions of high credit standing.

#### Credit risk management and measurement

Each subsidiary is responsible for the identification, measurement, management, control and reporting of credit risk within their business units. Exposure to credit losses is managed by assessing customer's affordability and their ability to repay loans and advances, customers risk profile, employment status and stability, earnings potential in the case of taxi's and collectability in the case of purchased book debt. Each of the group's lending businesses tends to have homogeneous or similar asset portfolios within their respective businesses. Impairments are monitored and provided for using statistical techniques including experiential and behavioural models. These models are based on customers' financial performance information while on book and assume that recent performance is a strong indicator of future performance. In the case of key asset classes, independent models are developed to monitor the robustness of the primary models relative to actual performance and to optimise their effectiveness. Models are either developed internally or by expert external advisors. In the case of secured lending asset classes, the realisable/fair value of the underlying security is taken into consideration in arriving at a final impairment.

FOR THE YEAR ENDED 30 SEPTEMBER

#### 31. FINANCIAL RISK MANAGEMENT continued

#### 31.1 CREDIT RISK continued

#### SA Taxi

The credit committee is responsible for providing executive management and oversight over all credit risk arising within and impacting the SA Taxi balance sheet, these meetings are attended by the company chief executive officer, chief financial officer, chief risk officer and group chief financial officer.

The credit policy is designed to ensure that SA Taxi's credit process is efficient for the applicant while providing SA Taxi with the necessary details to make informed credit decisions. SA Taxi takes the following into consideration in granting credit to respective customers:

- Vehicle type;
- Validity of the taxi route;
- Clients ability to pay using a route calculator (affordability check); and
- Verification of details and credit history against two independent credit bureaus

Collections of instalments are made through a mix of cash and debit order collections with 70% of the portfolio being cash payers.

The expected loss model is developed using statistical techniques based on actual historical data. The expected loss is calculated for each active account, using parameter estimates including the probability of default ('PD'), EAD ('exposure at default') and loss given write off's ('LGW's') segmented using CD state (aging and recency) as well as remaining term. The segmentation ensures homogenous risk buckets. The LGW is calculated on an explicit basis per account, taking into consideration the settlement balance, market value, repair cost, discount rates and discount periods. We have performed a detailed statistical analysis on a multitude of macro-economic factors, namely Prime Rate, Unemployment Rate, Petrol Price, USD/ZAR Exchange Rate, GDP and CPI. Regression analysis shows that the economic factors do not add explanatory information to the model, and hence they are not included. SA Taxi has incorporated a forward-looking forecast for the mechanical repair costs as these have shown consistent trends over time.

The group utilised the 30-days past due definition of significant increase in credit risk, as per paragraph 5.5.11 of IFRS 9.

This definition is supported by detailed quantitative analysis of account performance relative to expectation at initial recognition.

The group has defined default as 90 days past due, with no qualifying payment received in the past 3 months. A qualifying payment is more than 50% of the instalment raised. We have rebutted the 90-day presumption based on a quantitative analysis of the PDs and alignment to operational collection processes.

The definition of credit-impaired financial assets aligns to the default definition described above. Applying this approach ensures consistency between the accounting application, impairment modelling and internal credit risk management practices.

Write-off of an asset occurs at the point of sale of the vehicle, following repossession.

Quantitative analysis has proven that our modifications do not exhibit significantly higher risk than non-modified accounts. The value of these modified accounts is immaterial, relative to the book size. Modifications (term-extensions) are provided to clients who have shown proven payment performance and have had operational issues with the vehicle (e.g. mechanical breakdown or accident). Although the term of a contract can be extended, the interest rate applicable for the contract remains unchanged and therefore term extensions do not have any effect on the NPV of the financial asset. Due to the fact that a vehicle is an income producing asset, the group understands that the client is unable to pay if the vehicle is out of operation, however we do not proactively restructure distressed clients.

#### Rand Trust

Exposure to credit losses is managed by assessing customer's affordability and their ability to repay loans and advances, customers risk profile and collectability of invoices discounted. Impairments are monitored and provided for on a customer specific basis. The realisable/fair value of the underlying security is taken into consideration in arriving at a final impairment.

The credit committee assess all applications for credit and will approve a facility based on the risk profile of the customer and an assessment of the collectability of their trade receivables.

On-going risk management and collections are handled by experienced credit controllers.

Impairments are monitored and provided for based on the assessment of the probability of obligations being met. This assessment is based on direct exposure where there is a probability of non-recovery, taking into account the realisable/fair value of any underlying security.

FOR THE YEAR ENDED 30 SEPTEMBER

#### 31. FINANCIAL RISK MANAGEMENT continued

#### 31.1 CREDIT RISK continued

#### **MBD**

#### **Investment process**

Before the acquisition of purchased book debts there is a defined investment process that is followed in accordance with guidelines as determined by an Investment committee. Purchased book debt is acquired from various sectors, but mostly from the retail and banking industry. Valuation of these books is determined by way of analysis of the historic underlying payment history as well as other parameters which are ultimately presented to the Investment committee to decide on the fair price that the company is willing to offer.

## **Collections process**

The business knowledge team continually develops and evolves strategies which are then implemented by operations to collect the outstanding debt. Methods include tracing, letters, SMSs and direct calling both in call centres and legal operations.

# Method of provisioning and fair valuing Principal book portfolios

Principal book portfolios are classified as purchased credit-impaired financial assets (bucket 3) on initial recognition based on the assumption that events that have a detrimental impact on the estimated future cash flows of these financial assets have occurred before initial recognition. The classification of the debt portfolio does not change subsequently to initial recognition, even in the unlikely event of the expected cash flows returning to full contractual terms.

MBD has built a model using statistical techniques to value the principal book portfolio on a monthly basis. Each matter is modelled on a twelve month period based on the collection activity applied to it. A combination of inflows for each matter and cost projections are used to determine a net cash flow which is discounted to the present value using a credit adjusted effective interest rate. This represents the amortised cost for that matter at the end of the month.

MBD performed a detailed statistical analysis on a multitude of macro-economic factors, namely prime interest rate, unemployment rate, petrol price, USD/ZAR exchange rate, GDP and CPI. Regression analysis shows that the economic factors do not add explanatory power to the model as there is no significant correlation, hence they are not included.

The MBD expected loss model takes into account the lifetime expected credit losses on the portfolio by estimating the cash flows over the lifetime of each book included in the portfolio. A loss allowance is recognised equal to these expected future credit losses discounted at the credit adjusted effective interest rate of the principal book portfolio.

Due the nature of the credit-impaired financial assets, no contractual terms exist on the date of purchase. Any changes in expected cash flows will not be treated as a modification and will therefore not result in a change to the credit risk.

FOR THE YEAR ENDED 30 SEPTEMBER

## 31. FINANCIAL RISK MANAGEMENT continued

# 31.1 CREDIT RISK continued

# 31.1.1 Financial assets subject to risk

For the purposes of group disclosure regarding credit quality, in the maximum exposure to credit risk of financial assets at the financial year end is analysed as follows:

	Loans and advances Rm	Other loans receivable Rm	Trade & other receivables* Rm	Purchased book debts Rm	Total Rm
2015 Neither past due nor impaired Past due but not impaired Impaired Impairment allowance	3 925 1 734 1 054 (553)	257 - - -	496 79 - (8)	561 - - -	5 239 1 813 1 054 (561)
Performing loans and advances Non-performing loans and advances Non-performing trade and	(133) (420)	- -			(133) (420)
other receivables			(8)		(8)
Carrying value of written off book	-	-	-		
Carrying value of financial assets	6 160	257	567	561	7 545
Fair value of collateral held for loans neither past due nor impaired	4 474	_	-	_	4 474
	Loans and advances Rm	Other loans receivable Rm	Trade & other receivables*	Purchased book debts Rm	Total Rm
2014 Neither past due nor impaired Past due but not impaired Impaired Impairment allowance	3 317 1 277 2 143 (383)	293 - - -	427 25 11 (5)	552 - - -	4 589 1 302 2 154 (388)
Unidentified impairment (incurred but not recorded) Non-performing loans and advances Non-performing trade and other receivables	(38) (345) –	- - -	- - (5)	- - -	(38) (345)
Carrying value of written off book	32	-	_	_	32
Carrying value of financial assets	6 386	293	458	552	7 689
Fair value of collateral held for loans neither past due nor impaired	3 953	_	_	_	3 953

<sup>\*</sup> Prepayments are not financial assets and therefore have been excluded from trade and other receivables.

FOR THE YEAR ENDED 30 SEPTEMBER

## 31. FINANCIAL RISK MANAGEMENT continued

#### 31.1 CREDIT RISK continued

## 31.1.2 Financial assets that are neither past due nor impaired

	2015 Rm	2014 Rm
Carrying amount of loans and advances that are neither past due nor impaired Credit quality	3 925	3 317
High	3 368	2 471
Medium	472	260
low	85	586

The credit quality of a debt is therefore determined as follows:

#### SA Taxi

SA Taxi, in conjunction with TransUinion, has developed a bespoke application scorecard to assess credit quality when granting loans. The scorecard uses demographic, vehicle, route and credit bureau information to determine the risk of the deal. A detailed affordability assessment is also performed to mitigate risk.

#### Rand Trust Financiers

The credit committee assesses all applications for credit and will approve a facility based on the risk profile of the applicant, and an assessment of the collectability of their trade receivables and realisable value of other tangible security. Ongoing risk management and collections are handled by experienced credit controllers.

#### MBD

The credit quality is assessed on the date the loan is granted, based on the loan to value percentage. Where the loan to value percentage is less than a 100% the credit quality is assessed as high, where it is in excess of 100% the credit quality is assessed as medium.

## 31.1.3 Financial assets that are past due but not impaired

These are assets where contractual interest or principal payments are past due, but the group believes that impairment is not appropriate. Recent payment history and the level of collateral available, if any, are key considerations in determining whether an asset is impaired. The age of loans and advances and other assets that are past due but not impaired is as follows:

	Past due up to 1 month Rm	Past due up to 1 – 2 months Rm	Past due up to 2 – 3 months Rm	Past due up to 3 – 4 months Rm	Past due older than 4 months Rm	Total Rm
2015 Loans and advances Trade and other receivables	671 25	313 13	156 2	121 1	473 38	1 734 79
Financial assets that are past due but not impaired	696	326	158	122	511	1 813
2014						
Loans and advances	450	205	110	88	424	1 277
Trade and other receivables	6	5	11	1	2	25
Financial assets that are past due but not impaired	456	210	121	89	426	1 302

FOR THE YEAR ENDED 30 SEPTEMBER

#### 31. FINANCIAL RISK MANAGEMENT continued

#### 31.1 CREDIT RISK continued

## 31.1.3 Financial assets that are past due but not impaired continued

#### Valuation of collateral

The group typically holds vehicles (taxis), bonds over residential property and debtor books in the case of invoice discounting as collateral against secured advances. Any security taken as part of the credit decision is valued according to the applicable credit policies at the time of credit approval and at regular intervals thereafter. The group uses a number of approaches for the valuation of collateral, including:

- SA Taxi values collateral at the sales value minus costs to repair.
- Valuations of property held as security over mortgage loans take into account market conditions, area where the property is situated, the condition of the property and comparable sales within the geographical area.

Due to the specialised nature of the group's businesses, a certain degree of concentration in the collateral underpinning the various portfolios cannot be avoided. At the statement of financial position date, the group did not consider there to be any significant concentration of credit risk which has not been adequately provided for.

## 31.1.4 Impairment provision reconciliation

Loans and advances impairment provision	12 month expected credit losses Rm	Lifetime expected credit losses Rm	Credit impaired financial assets Rm	Total
2015				
Opening balance under IAS 39	21	56	307	383
Transition to expected loss model	15	86	215	316

Carrying value of financial assets	4 402	1 134	624	6 160

FOR THE YEAR ENDED 30 SEPTEMBER

## 31. FINANCIAL RISK MANAGEMENT continued

#### 31.2 INTEREST RATE RISK

Interest rate risk is the risk of loss arising from the fair value or future cash flows of a financial instrument because of changes in market interest rates.

The group is exposed to interest rate risk associated with the effects of fluctuations in the prevailing levels of market rates on future cash flows of a financial instrument and the fair value of the financial instrument based on changes in market interest rates.

The group has exposure to the effects of fluctuations in the prevailing levels of market interest rates on both the value of interest sensitive assets and liabilities and cash flows.

The table below summarises the exposure to interest rate risk through grouping assets and liabilities into repricing categories, determined to be the earlier of contractual repricing date or maturity.

## 31.2.1 Risk profile of financial assets and liabilities

2015	Floating rate	Floating rate	Net floating
	liabilities	assets	rate asset
	Rm	Rm	Rm
Total	5 863	6 187	324
2014	Floating rate	Floating rate	Net floating
	liabilities	assets	rate liability
	Rm	Rm	Rm
Total	5 267	7 108	1 841

## 31.2.2 Weighted average interest rates are as follows:

	2015		2014	
	Bank balances %	Borrowings %	Bank balances %	Borrowings %
Total	6.6	10.7	6.4	10.4

The group is exposed to interest rate risk associated with the effects of fluctuations in the prevailing market rates.

FOR THE YEAR ENDED 30 SEPTEMBER

The effect of a 1% change in interest rates is shown above. As the group has no control over rate movements, it cannot predict the effect of future rate movements, if any.

FOR THE YEAR ENDED 30 SEPTEMBER

#### 31. FINANCIAL RISK MANAGEMENT continued

#### 31.4 LIQUIDITY RISK MANAGEMENT

Liquidity risk is the risk that the group is unable to meet payment obligations when they fall due or that insufficient funds are available to meet loan demands in the ordinary course of business. The group's objectives in relation to liquidity risk management are to manage the contractual mismatch between cash inflows from assets and cash outflows to settle liabilities, to fund the expected balance sheet growth, to honour all cash outflow commitments, to avoid raising funds at market premiums or through the forced sale of assets as a result of liquidity pressure, and to take advantage of attractive but unanticipated borrowing opportunities.

The monitoring and reporting of liquidity risk takes the form of, as a minimum, cash flow projections to settlement of longest dated funding obligations by subsidiary or securitisation vehicle, an analysis of the group's borrowing facilities and utilisation thereof, borrowing facilities under discussion, maturity profile and concentration of liability by counterparty, asset maturities and borrowing facility obligations and special conditions.

The group's capital markets (CM) team is responsible for executing on fund raising mandates given to it by each subsidiary in support of their respective business models. This includes the ongoing assessment and evaluation of various funding sources designed to grow and diversify the group's funding base in order to achieve an optimal funding profile and sound liquidity. The CM team is also responsible for the ongoing monitoring of asset portfolio performance and its impact on funder obligations including covenants.

It is the responsibility of each subsidiary to manage their daily cash flow requirements, to ensure funding covenants are maintained, to produce financial projections to monitor the impact of business trends on future funding requirements and covenants and to notify the CM team of any changes to the business environment that may impact funding requirements.

The table below analyses financial liabilities at the balance sheet date to the contractual maturity dates. The amounts disclosed in the table are the contractual undiscounted cash flows.

2015	On demand Rm	Within 1 year Rm	From 1 – 5 years Rm	More than 5 years Rm	Total Rm

<sup>\*\*</sup> Revenue received in advance, leave pay accrual and deferred lease liability are not financial liabilities and therefore have been excluded from trade and other payables.

FOR THE YEAR ENDED 30 SEPTEMBER

#### 31. FINANCIAL RISK MANAGEMENT continued

#### 31.5 CAPITAL RISK

The objective of the group's capital management strategy is to maximise shareholder value. To achieve this the group considers the capital required to support growth in its operating divisions, to maintain credit ratings in various group entities and to comply with borrowing covenants, and for unexpected shocks.

The group defines capital as equity, group loans and subordinated and structually subordinated debt.

Equity comprises permanent paid up capital, share premium, revenue and other reserves together with certain loans from shareholders.

The board seeks to maintain a balance between the higher returns that might be possible with higher levels of borrowings and the advantages and security afforded by a strong capital position.

#### 31.6 INSURANCE AND ASSURANCE RISK

Insurance and assurance risk is the risk assumed under any insurance contract that the insured event occurs. By the very nature of an insurance/ assurance contract, this risk is random and unpredictable. The exposure to assurance risk is limited through an underwriting strategy, limits and adopting appropriate risk assessment techniques. It is not the group's policy to reinsure risks that are within its risk appetite. The risk base of the group is not concentrated in any one region or sector of the economy.

Exposure to insurance risk

Assets underpinning the secured lending portfolio are insured with accredited insurers. The group is not exposed to any underwriting risk.

#### 31.7 CURRENCY RISK

Currency risk is the possibility of incurring a financial loss as a consequence of the depreciation in the measurement currency relative to a foreign currency prior to payment of a commitment in that foreign currency or the strengthening of the measurement currency prior to receiving payment in a foreign currency.

The foreign currencies to which the group has exposure are US dollars and Euro. Where the timing of future cash flows can be predicted with relative certainty, this risk is managed by entering into forward exchange contracts at the time the risk arises.

The following significant exchange rates applied during the year:

	Avera	ge rate	Reporting date closing rate		
	2015	2014	2015	2014	
USD	12.0	10.6	13.9	11.3	
Euro	13.8	14.4	15.7	14.3	
Pula	1.2	1.2	1.2	1.2	
Foreign amounts included in the financial statements at the end of the financial year in millions of units of foreign currency:					
US dollars	31	2			
Euro	8	13			
Pula	2	-			

The cross-currency swaps that are in place mitigate the foreign currency risk with regard to the balances denominated in Euro.

FOR THE YEAR ENDED 30 SEPTEMBER

#### 31. FINANCIAL RISK MANAGEMENT continued

#### 31.8 FAIR VALUE DISCLOSURE

The fair values of financial assets and liabilities have been disclosed below:

	Carrying value 2015 Rm	Fair value 2015 Rm	Carrying value 2014 Rm	Fair value 2014 Rm
30 September				
Assets

Net exposure	1 821	1 889	2 568	2 521

<sup>\*</sup> Prepayments are not financial assets and therefore have been excluded from trade and other receivables.

## 31.9 HEDGE ACCOUNTING

The group applies hedge accounting to represent the economic effects of its interest and currency risk management strategies. Derivatives are used to hedge interest rate and exchange rate risk.

Where derivatives are held for risk management purposes, and when transactions meet the required criteria for documentation and hedge effectiveness, the group applies fair value hedge accounting, cash flow hedge accounting, or hedging of a net investment in a foreign operation, as appropriate to the risks being hedged.

Foreign exchange risk arises when the assets and liabilities are not denominated in the functional currency of the transacting entity. The group's policy is that such exposures should be hedged subject to a review of the specific circumstances of the exposure. The currency exposure under such funding has been hedged through a series of cross currency swaps that match the timing and amount of each periodic cash flow obligation in terms of the currency funding.

The ineffective portion of fair value movements of hedging instruments for 2015 was nil (2014:nil).

<sup>\*\*</sup> Revenue received in advance, leave pay accrual and deferred lease liability are not financial liabilities and therefore have been excluded from trade and other payables.

FOR THE YEAR ENDED 30 SEPTEMBER

## 31. FINANCIAL RISK MANAGEMENT continued

# 31.9 HEDGE ACCOUNTING continued

# Cash flow hedging reserve

The cash flow hedging reserve represents the cumulative effective portion of gains or losses arising on changes in fair value of hedging instruments entered into for cash flow hedges. The cumulative gain or loss arising on changes in fair value of the hedging instruments that are recognised and accumulated under the heading of cash flow hedging reserve will be reclassified to profit or loss only when the hedged transaction affects the profit or loss, or included as a basis adjustment to the non-financial hedged item, consistent with the relevant accounting policy.

	2015 Rm	201 <i>4</i> Rm

## Sensitivity analysis of valuations using unobservable inputs

As part of the group's risk management processes, stress tests are applied on the significant unobservable parameters to generate a range of potentially possible alternative valuations. The financial instruments that most impact this sensitivity analysis are those with the more illiquid and/or structured portfolios. The stresses are applied independently and do not take account of any cross correlation between separate asset classes that would reduce the overall effect on the valuations. A significant parameter has been deemed to be one which may result in a change in the fair value asset or liability of more than 10%. This is demonstrated by the following sensitivity analysis which includes reasonable range of possible outcomes:

# Group Movement in fair value given the 10% change in significant assumptions:

	2	015	2014		
SA Taxi — loans and advances: entry level vehicles	10%	10%	10%	10%	
Significant unobservable input and desciption of assumption	Favourable	Unfavourable	Favourable	Unfavourable	
Average probability of default	56	(11)	-	_

	Current* * *	1 323	1 269
	Total investment	2 352	2 010

<sup>\*</sup> The movement in shares at carrying value is attributable to an additional investment in SA Taxi Finance Holdings Proprietary Limited to the value of R276m. The group also operates a share appreciation rights plan for executives and senior employees of the company and its subsidiaries. The current year share appreciation rights charge of R12m was capitalised to the relevant investments in subsidiaries.

Refer to note 15 for a schedule of subsidiaries.

The carrying value of amounts receivable approximates fair value as they are short-term in nature and not subject to material changes in credit risk and fair value.

		2015 Rm	201 <i>4</i> Rm
4.	TRADE AND OTHER PAYABLES Other	6	6
	Trade and other payables	6	6

The carrying value of trade and other payables approximates fair value as they are short-term in nature and not subject to material changes in fair value.

<sup>\*\*</sup> Includes a loan issued to Red Sky Finance Proprietary Limited to the value of R8m and a corresponding provision against this loan of R8m.

<sup>\*\*\*</sup> These are unsecured loans with agreed interest terms which are repayable on demand.

The company's exposure to interest rate risk is similar to that of the group, refer to note 31.2 in the group financial statements. The effect of a 1% change in interest rates is a net exposure of R1 million. As the company has no control over rate movements, it cannot predict the effect of future rate movements, if any.

# AND DEFINITIONS |

ITEM	DEFINITION
Average equity attributable to ordinary equity holders of the parent	Sum of equity attributable to ordinary equity holders of the parent at the end of each month from September to September divided by 13
Average gross loans and advances	Sum of gross loans and advances at the end of each month from September to September divided by 13
Average interest-bearing liabilities	Sum of interest-bearing liabilities at the end of each month from September to September divided by 13
Average tangible assets	Sum of tangible assets at the end of each month from September to September divided by 13. Tangible assets excludes investments fair valued through equity for accounting purposes
Average tangible equity attributable to ordinary equity holders of the parent	Sum of equity attributable to ordinary equity holders of the parent less goodwill, intangible assets and fair value movements through equity relating to investments at the end of each month from September to September divided by 13
Average total assets	Sum of total assets at the end of each month from September to September divided by 13
Average cost of borrowing	Interest expense expressed as a percentage of average interest-bearing liabilities
Capital adequacy ratio	Total equity plus subordinated debt capital less goodwill expressed as a percentage of total assets less goodwill and cash and cash equivalents
Cost-to-income ratio	Total operating costs expressed as a percentage of net interest income plus non-interest revenue
Credit loss ratio	Impairment of loans and advances expressed as a percentage of average gross loans and advances
EBITDA	Profit before net interest income, tax, depreciation and amortisation of intangible assets (specifically excluding amortisation of purchased book debts) for MBD and Principa only
Effective tax rate	Income tax expense expressed as a percentage of profit before tax
Entry-level vehicles	Vehicles brands: CAM, CMC, Jinbei, King Long, Polar Sun, Foton, Force Traveller, Peugeot
Gearing	Total assets divided by equity attributable to ordinary equity holders of the parent expressed in times
Gross loans and advances	Gross loans and advances specifically exclude the value of the written-off book brought back on to the balance sheet
Headline earnings	Headline earnings is defined and calculated as per the guidance issued by the South African Institute of Chartered Accountants (SAICA) in Circular 2/2013 of December 2013, currently being basic earnings attributable to ordinary shareholders adjusted for goodwill impairments, capital profits and losses and other non-headline items
Headline earnings from continuing operations	Headline earnings adjusted for non-headline items arising from discontinued operations as defined in SAICA Circular 2/2013
Headline earnings per share	Headline earnings divided by weighted average number of ordinary shares in issue

ITEM	DEFINITION
Headline earnings per share from continuing operations	Headline earnings from continuing operations divided by weighted average number of ordinary shares in issue
Net asset value per share	Equity attributable to ordinary equity holders of the parent divided by number of ordinary shares in issue
Net interest margin	Net interest income as a percentage of average gross loans and advances
Non-performing loan coverage	Impairment provision expressed as a percentage of non-performing loans
Non-performing loan ratio	Non-performing loans expressed as a percentage of gross loans and advances
Non-performing loans	(a) the balance outstanding of loans and advances with a contractual delinquency greater than three months including repossessed stock on hand (b) reduced by the balance of such outstanding loans and advances for which three cumulative qualifying payments have been received in the three month period preceding the measurement date
Normalised headline earnings	Headline earnings adjusted for non-headline items arising from discontinued operations as defined in SAICA Circular 2/2013 and the cost of listing equity and debt instruments on an exchange
Normalised headline earnings per share	Normalised headline earnings divided by weighted average number of ordinary shares in issue
Premium vehicles	Non-entry level vehicles
Provision coverage	Impairment provision expressed as a percentage of gross loans and advances
Return on average assets	Profit for the year expressed as a percentage of average total assets
Return on average tangible assets	Profit for the year expressed as a percentage of average tangible assets
Return on average equity	Profit for the year attributable to ordinary equity holders of the parent expressed as a percentage of average equity attributable to ordinary equity holders of the parent
Return on average tangible equity	Profit for the year attributable to ordinary equity holders of the parent expressed as a percentage of average tangible equity attributable to ordinary equity holders of the parent
Structurally subordinated debt	Senior debt issued by a holding company within the group
Subordinated debt	Debt subordinated by agreement with the lender plus structurally subordinated debt
Tangible assets	Total assets less goodwill and other intangible assets
Tangible net asset value per share	Equity attributable to ordinary equity holders of the parent less goodwill and other intangible assets divided by number of ordinary shares in issue
Total income	Interest and other similar income plus non-interest revenue
Weighted average number of ordinary shares in issue	The number of ordinary shares in issue at the beginning of the year increased by shares issued during the year, weighted on a time basis for the year during which they have participated in the income of the group excluding treasury shares
