DIRECTORS' RESPONSIBILITY STATEMENT

FOR THE YEAR ENDED 30 SEPTEMBER 2018

The directors of Transaction Capital are responsible for the preparation and fair presentation of the consolidated and company annual financial statements in accordance with International Financial Reporting Standards and the Financial Reporting Guides as issued by the Accounting Practices Board and in the manner required by the Companies Act, 71 of 2008 as amended, of South Africa ('Companies Act').

The directors' responsibilities include designing, implementing and maintaining internal controls relevant to the preparation and fair presentation of these annual financial statements to ensure that they are free from material misstatement, whether due to fraud or error, selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in the circumstances. The responsibilities also include maintaining adequate accounting records and an effective system of risk management.

The consolidated and company annual financial statements are prepared on the going concern basis. Nothing has come to the attention of the directors to indicate that the company and group will not remain a going concern in the year ahead.

The auditors are responsible for reporting on whether the consolidated and company annual financial statements are fairly presented in accordance with the applicable financial reporting framework, and their unmodified report appears on page 10.

APPROVAL OF CONSOLIDATED AND COMPANY ANNUAL FINANCIAL STATEMENTS

The annual financial statements on pages 13 to 121 were approved by the board of directors on 20 November 2018, and are signed on their behalf by:

David HurwitzChief executive officer

Ronen Goldstein Financial director

COMPANY SECRETARY'S CERTIFICATE

FOR THE YEAR ENDED 30 SEPTEMBER 2018

I hereby certify that, to the best of my knowledge and belief, the company has filed all such returns and notices as is required of a public company in terms of the Companies Act, 71 of 2008 as amended of South Africa ('Companies Act'), with the Companies and Intellectual Property Commission ('CIPC') for the financial year ended 30 September 2018, and that all such returns and notices appear to be true, correct and up to date.

Theresa Palos

Company secretary 20 November 2018

DIRECTORS' REPORT

FOR THE YEAR ENDED 30 SEPTEMBER 2018

NATURE OF BUSINESS

The company is an investment holding company owning a portfolio of operating subsidiaries/divisions, operates a group treasury function and provides a group management function to its divisions. The company's issued ordinary shares are listed on the Johannesburg Stock Exchange.

The group operates two principal divisions: SA Taxi and Transaction Capital Risk Services ('TCRS'). The nature of the business of the main operating subsidiaries and a review of each is set out in the group profile on the company website at **www.transactioncapital.co.za**. The segmental report can be found in note 31 of the consolidated financial statements.

FINANCIAL RESULTS

The results of the company and the group are set out in the annual financial statements.

DIRECTORATE AND COMPANY SECRETARY

The names and brief curriculum vitae of the directors and company secretary in office, including committee composition at the date of this report, are set out in the directorate section on the company website.

Diane Radley was appointed to the Transaction Capital board as an independent non-executive director with effect from 15 July 2018, and serves as a member of the audit, risk and compliance (ARC) committee and the asset and liability committee.

Olufunke Ighodaro will be resigning as an independent non-executive director and chairman of the ARC committee with effect from 30 November 2018 due to her other executive responsibilities. The board wishes to thank Mrs Ighodaro for her valued contribution to the company and wishes her well with her future endeavours. Diane Radley will be appointed as chairman of the ARC committee on this date.

No further appointments or resignations occurred during the year.

INTEREST OF DIRECTORS IN THE COMPANY'S SHARES

The direct and indirect interests of the directors in the ordinary shares of the company at the end of the financial year, categorised as beneficial and non-beneficial, are as follows:

as beneficial and norrhenelicial, are as follows.	2	018	2017		
	Number of shares '000	Shareholding %	Number of shares '000	Shareholding %	
INDIRECT NON-BENEFICIAL HOLDINGS OF DIRECTORS

Diane Radley	10	<1	n/a	_	
TOTAL	194 173		266 885		
Percentage of issued shares	31.82%		43.84%		

^{*} David Hurwitz is a discretionary beneficiary of Dovie Trust.

There have been no changes in the interests of the directors past 30 September 2018 to the date of approval of these annual financial statements.

^{**} After the restructure the trusts of Jonathan Jawno, Michael Mendelowitz and Roberto Rossi each own equal holdings in Everglen Capital.

In March 2018, Everglen Capital reduced its shareholding from 41% to 29%, disposing of 72 million shares via an accelerated bookbuild offering. Further information on the bookbuild can be found in the SENS announcements released on 7 and 8 March 2018, at http://www.transactioncapital.co.za/SENS.php.

^{***} Christopher Seabrooke is the chief executive of Sabvest Limited.

^{****} Resigned as an independent non-executive director on 2 March 2017.

DIRECTORS' REPORT continued

FOR THE YEAR ENDED 30 SEPTEMBER 2018

DIVIDENDS

Following an interim dividend of 21 cents per share (2017 interim: 15 cents per share), and in line with the stated dividend policy of 2 to 2.5 times, the board has declared a final gross cash dividend of 29 cents per share (2017: 25 cents per share) for the six months ended 30 September 2018.

CONSOLIDATED SHARE CAPITAL

The authorised and issued share capital is detailed in note 14 of the annual financial statements.

The following changes took place during the year under review:

	20	18	2017		
	Number of shares '000	Value of shares R'000	Number of shares '000	Value of shares R'000	
BALANCE AT THE BEGINNING OF THE YEAR	610 147	1 056 019	571 850	509 642	
Shares issued in settlement of the Transaction Capital Limited Share Appreciations Rights Plan obligation*	587	8 711	7 259	106 395	
Shares repurchased in the open market and cancelled**	(521)	(8 765)	(740)	(10 409)	
Shares issued to Everglen Capital Proprietary Limited***	_	-	3 378	36 718	
Equity raised through accelerated bookbuild***	_	_	28 400	413 673	
BALANCE AT THE END OF THE YEAR	610 213	1 055 965	610 147	1 056 019	

^{*} In terms of specific authority received from shareholders on the adoption of the Transaction Capital Share Appreciation Rights Plan and Transaction Capital Conditional Share Plan, a total of 586 760 shares were issued to participants/employees as part of respective vestings at an average price of R15.44 per share.

SPECIAL RESOLUTIONS PASSED

The following special resolutions were approved during the year under review:

- Approval of non-executive directors' and committee members' fees.
- Authority to provide financial assistance in terms of section 45 of the Companies Act.
- Authority to provide financial assistance in terms of section 44 of the Companies Act.
- General authority to repurchase securities.
- General authority to allot and issue authorized but unissued securities for cash.

BORROWINGS

The memorandum of incorporation of the company does not place any restrictions on the borrowing powers of the company or the group. Details of borrowings at the end of the financial year are set out in note 13 to the consolidated annual financial statements.

LITIGATION

There are no current or pending legal proceedings against the group which are anticipated to materially affect its financial position.

SUBSIDIARIES

Details of subsidiaries and of changes in holdings are set out in note 14 of the company financial statements.

^{**} All shares repurchased and cancelled reverted to authorised unissued shares. The average purchase price of the 521 088 shares repurchased on the open market was R16.82 per share.

^{***} In terms of a specific authority obtained from shareholders, Transaction Capital issued Everglen Capital with 3 377 821 ordinary shares at R11.65 per share on 11 November 2016.

^{****} On 2 February 2017 Transaction Capital raised equity in the form of 28 400 000 shares through the issue of new ordinary shares to qualifying investors through an accelerated bookbuild. The ordinary shares were priced at R14.75 per share, a 1.3% discount to the 30 day volume weighted average price of R14.95 as at 1 February 2017. The equity raise was completed under the company's general authority to issue shares for cash approved by Transaction Capital shareholders at the annual general meeting of the company held on 3 March 2016.

DIRECTORS' REPORT continued

FOR THE YEAR ENDED 30 SEPTEMBER 2018

SUBSEQUENT EVENTS

SA Taxi and the South African National Taxi Council (SANTACO) have engaged over several years to formalise the industry's participation in revenue streams of the minibus taxi industry value chain, and to achieve meaningful and sustainable commercial benefits for industry participants. This supports the viability of minibus taxi operators' businesses and in turn their ability to repay loans and afford insurance premiums.

This relationship has deepened considerably in recent years, culminating in a unique and transformational ownership transaction that formalises SA Taxi's partnership with SANTACO. Via a subscription for new shares to the value of R1.7 billion, SANTACO will acquire a 25% interest in SA Taxi. Proportional ownership, allocated to SANTACO and a trust representing its broad-based provincial structures, will ensure that the economic benefits of this investment accrue to all levels.

Further information can be found in the SENS announcement released on 19 November 2018 (available at http://www.transactioncapital.co.za/SENS.php).

The group disposed of its 51% shareholding in The Beancounter for R10.2 million effective 1 November 2018.

EMPLOYEE INCENTIVE SCHEMES

The group operates share incentive initiatives for employees, including directors.

Transaction Capital Share Appreciation Rights ('SAR') Plan

The SAR plan allows executives and senior managers to participate in the appreciation of Transaction Capital's share price over time. While the SAR plan has been a very successful retention mechanism since vesting, the conditional share plan discussed below is favoured as a more appropriate retention and alignment tool for the purposes of incentivising employees. As such, it is anticipated that no new SAR awards will be granted. Those SARs already in issue will continue to vest as per the SAR plan. Further disclosure relating to the SAR plan is set out in note 22.1 of the consolidated financial statements.

Transaction Capital Conditional Share Plan ('CSP')

The CSP was approved by shareholders at a general meeting held on 20 October 2016. The first issue of CSPs was awarded in November 2016. All awards are subject to remuneration committee approval.

It is believed that the CSP is a superior long-term incentive for Transaction Capital's objectives. The CSP offers participants certainty in that it comprises a fixed number of conditional shares. While its ultimate value will depend on performance, CSP awards will always have a value, unlike the SAR awards. Further disclosure relating to the CSP is set out in note 22.2 of the consolidated financial statements.

Transaction Capital General Share Purchase Scheme

The general share purchase scheme facilitated voluntary investment whereby executives were able to receive loan funding to purchase shares at market value. The scheme was largely wound down in the 2014 financial year, and terminated in December 2017.

The following is a summary of movements during the year:

	20	2018		7
	Number of shares '000	Number of shares '000	Number of shares '000	Value of funding R'000
BALANCE AT THE BEGINNING OF THE YEAR	77	663	424	2 840
Dividends	-	(16)	_	(21)
Interest	-	9	_	80
Repayments	(77)	(656)	(347)	(2 236)
BALANCE AT THE END OF THE YEAR	-	-	77	663
SHARES HELD BY DIRECTORS	-	-	77	663

All shares have vested in the participants.

AUDIT, RISK AND COMPLIANCE COMMITTEE REPORT

FOR THE YEAR ENDED 30 SEPTEMBER 2018

The responsibilities of the audit, risk and compliance ('ARC') committee are set out in the Companies Act, 71 of 2008 as amended (the 'Act'), Transaction Capital's Memorandum of Incorporation, the King Code on Corporate Governance (King IV) and the JSE Limited Listings Requirements. The ARC committee's terms of reference are reviewed annually and approved by the board.

COMPOSITION

As at 30 September 2018, the ARC committee comprised of four independent non-executive directors, all of whom are financially literate and have adequate financial and commercial experience to fulfil their roles as members. The committee meets three times per year, with two members of the ARC committee forming a quorum.

As at the date of this report, the committee comprised of:

- Olufunke Ighodaro (chairman)
- Christopher Seabrooke
- Phumzile Langeni
- Diane Radley (appointed as member on 15 July 2018)

Olufunke Ighodaro will be resigning as an independent non-executive director and chairman of the ARC committee with effect from 30 November 2018 due to her other executive responsibilities. Diane Radley will be appointed as chairman of the ARC committee on this date.

The board approved the appointment of the chairman of the board as a member of the ARC committee, as it is believed that his skills and knowledge would enhance the ARC committee. Permanent invitees include: David Hurwitz (chief executive officer), Ronen Goldstein (financial director) and Jonathan Jawno (executive director).

The external auditors attend all ARC committee meetings and separate meetings may be held with the ARC committee to afford the external auditors the opportunity to meet with the ARC committee without the presence of management.

Representatives from internal audit attend all committee meetings and are similarly afforded the opportunity of separate meetings with the ARC committee. The group internal audit executive has a functional reporting line to the committee chairman and an administrative reporting line to the chief executive officer.

The effectiveness of the ARC committee and its members is assessed on an annual basis.

Members of the ARC committee are elected annually at the company's annual general meeting by the group's shareholders on recommendation from the board and nominations committee. The board may remove members of the ARC committee and must fill vacancies within 40 days.

Access to training is provided on an ongoing basis to assist members in discharging their duties.

ROLES AND RESPONSIBILITIES

The key functions and responsibilities of the ARC committee as outlined in the ARC committee's terms of reference include oversight of:

The preparation of financial reporting:

- Ensure appropriate financial reporting procedures are established and operating;
- Review of the annual financial statements, accounting practices and policies, internal financial controls and reports; and
- Ensure the integrity of the integrated annual report.

Combined assurance:

- Monitor the appropriateness of the intended combined assurance model to provide a coordinated approach to all assurance
- Review the skills, resources and experience of the company's finance function annually and report the results in the integrated annual report; and
- Review the suitability of the skills and experience of the financial director.

AUDIT, RISK AND COMPLIANCE COMMITTEE REPORT continued

FOR THE YEAR ENDED 30 SEPTEMBER 2018

Internal audit:

- Review the independence, performance and effectiveness of the internal audit process and ensure that it has the necessary resources, budget, standing and authority to discharge its functions;
- Ensure that the internal audit function is periodically, but at least every five years, subjected to an independent quality review to ensure that it remains effective; and
- Review the suitability of the skills and experience of the internal audit executive.

External audit:

- Recommend/nominate the external auditor for appointment by the shareholders;
- lacktriangledown Approve the external auditor's engagement terms, including remuneration;
- Monitor the relationship between the external auditor and management;
- Report on the independence of the external auditor in the annual financial statements;
- Define a policy for non-audit services provided by the external auditor and pre-approve contracts for non-audit services outside
 this policy; and
- Review the performance and effectiveness of the external audit process.

Reporting line - whistle-blowing:

- Review the arrangements by which stakeholders may in confidence and with total anonymity raise concerns about possible improprieties;
- Ensure that arrangements are in place to independently investigate such matters and that adequate controls are implemented to prevent recurrence; and
- Consider significant findings of investigations and management's response thereto.

Governance:

- In liaison with external and internal audit, review the developments in corporate governance and surrounding best practices and consider their impact and implication for the businesses' processes and structures;
- Review the disclosure of the role of the committee as included in the integrated annual report;
- Be available at all times to advise the chairperson of the board on queries relating to the financial affairs and internal controls; and
- Oversee matters relating to accounting practices, internal control, content or audit of the financial statements, internal financial controls and any related matters.

Accounting:

■ Make submissions to the board on accounting policies, financial controls, records and reporting.

Risk:

- Oversee the development and annual review of a policy and plan for risk management;
- Monitor implementation of the policy and plan for risk management;
- Ensure that continuous risk monitoring by management takes place within the levels of risk tolerance approved by the board; and
- Oversee the management of:
 - Financial reporting risks;
 - Internal financial controls;
 - Fraud risks relating to financial reporting;
 - Tax risks;
 - Information technology risks;
 - Compliance risks; and
 - Risks in relation to the group's capital and funding requirements and policies (with direct oversight by the asset and liability committee).

AUDIT, RISK AND COMPLIANCE COMMITTEE REPORT continued

FOR THE YEAR ENDED 30 SEPTEMBER 2018

Compliance:

■ The ARC committee has oversight of the compliance with applicable laws and regulations.

Requirements of the Act:

■ The ARC committee assumes responsibility for all subsidiary companies that do not have their own audit committees. Responsibilities include reviewing the formalised processes and controls followed on behalf of subsidiaries.

The ARC committee confirms that it has adopted appropriate formal terms of reference to discharge its responsibilities, has regulated its affairs and has discharged all of its responsibilities as contained therein.

ANNUAL CONFIRMATIONS

Having considered, analysed, reviewed and debated information provided by management, internal audit and external audit; the ARC committee confirms that:

- The internal financial controls of the group have been effective in all material aspects throughout the year under review;
- These controls have ensured that the group's assets have been safeguarded;
- The financial director's expertise and experience is deemed appropriate;
- Appropriate financial reporting procedures have been established and are operating effectively;
- The group has complied in all material respects with the implemented risk management policy during the year under review;
- Resources have been utilised efficiently;
- The skills, independence, audit plan, reporting and overall performance of the external auditors are acceptable and it recommends their re-appointment in 2019; and
- It has confirmed the suitability of the appointment of the current audit firm and the designated individual partner with the audit firm, having obtained information as required by the JSE listings requirements.

CONCLUSIONS ON ROLES AND RESPONSIBILITIES

Finance function

The ARC committee has satisfied itself to the appropriateness of the expertise and experience of the financial director and finance function for the year under review.

Integrated annual report

The ARC committee oversees the integrated annual reporting process. The committee reviewed the integrated annual report and recommended its approval thereof to the board.

Risk management

The ARC committee has satisfied itself to the risk management processes within the group and the effectiveness thereof.

External audit

The external auditors, Deloitte & Touche, have been the auditors of the group for ten years, with Paul Stedall acting as engagement partner for one year. The ARC committee has satisfied itself through enquiry that the auditors of the group are independent as defined by the Act.

The ARC committee, in consultation with executive management, agreed to an audit fee for the year under review. The fee is considered appropriate for the work that could reasonably have been foreseen at that time. Audit fees are disclosed in note 19 to the consolidated annual financial statements. In addition, the ARC committee has approved a policy for non-audit services provided by the external auditors and is comfortable that non-audit services performed during the year have been reasonable.

The ARC committee has reviewed the external auditor's report and is satisfied with the performance and effectiveness of the external audit process.

AUDIT, RISK AND COMPLIANCE COMMITTEE REPORT continued

FOR THE YEAR ENDED 30 SEPTEMBER 2018

Internal audit

The ARC committee has satisfied itself of the independence, performance and effectiveness of the internal audit process. The ARC committee has considered and recommended the internal audit charter for approval by the board, which has so approved it.

The internal audit function underwent an independent quality review in the 2016 financial year, and the internal audit function was found to generally conform to the International Standards for the Professional Practice of Internal Auditing with no material findings being noted.

The committee is satisfied with the arrangement and level of combined assurance provided by the internal and external audit functions.

Whistle-blowing

The ARC committee dealt with any concern or complaints, whether from within or outside the company, relating to the accounting practices and internal audit of the company, the content or audit of the company's financial statements, the internal financial controls of the company and related matters.

Going concern

The going concern assertion of the group, as prepared by management, was reviewed by the ARC committee and recommended to the board.

Annual financial statements

The ARC committee:

- Reviewed the audited annual financial statements after interrogation with the external auditors, the internal auditors and management;
- Reviewed the external auditor's management letter and management's response thereto;
- Reviewed adjustments resulting from external audit queries and accepted any unadjusted audit differences; and
- Received and considered reports from the internal auditors.

The external audit report meets the requirements of International Auditing and Assurance Standards Board ('IAASB'). The audit opinion listed audit matters in which areas of judgement have been applied, and how these matters have been addressed as part of the audit process. In this regard, the committee has obtained comfort on areas in which management has applied judgement by:

- Interrogating management on methodologies applied to areas of judgement and being kept appraised on changes to methodologies applied (where applicable);
- Reviewing back-tests results on areas of judgement, with satisfying results;
- Receiving detailed feedback from the auditors on their testing performed on areas of judgement; and
- Reviewing disclosure in the annual financial statements with regards to areas of judgement.

The committee concurs with and accepts the external auditor's report on the annual financial statements and has recommended the approval thereof to the board, which has subsequently approved the annual financial statements. These will be open for discussion at the forthcoming annual general meeting.

Conclusion

The committee is satisfied that it has fulfilled all its statutory duties, including those prescribed by the Companies Act, and those assigned to it by the board during the year under review in relation to its terms of reference.

Olufunke Ighodaro

Audit, risk and compliance committee chairman 20 November 2018

SOCIAL AND ETHICS COMMITTEE REPORT

FOR THE YEAR ENDED 30 SEPTEMBER 2018

The social and ethics committee (the 'committee') comprised the following members during the year:

- Phumzile Langeni (chairman)
- David Hurwitz
- Kuben Pillay (appointed on 1 November 2017, replacing Ronen Goldstein as a member of the committee)

The committee has adopted terms of reference as its charter and has regulated its affairs in compliance with this and has discharged all of the responsibilities set out therein.

The committee was established to assist the board in ensuring that Transaction Capital is and remains a good and responsible corporate citizen, and to perform the statutory functions required of a social and ethics committee in terms of the Companies Act, 71 of 2008 as amended of South Africa ('Companies Act').

The committee monitors relevant legislation and other legal requirements or prevailing codes of best practice, specifically with regard to matters relating to social and economic development, good corporate citizenship, transformation, the environment, health and public safety as well as labour and employment. The committee met twice during this financial year.

Phumzile Langeni

Social and ethics committee chairman 20 November 2018

INDEPENDENT AUDITOR'S REPORT

TO THE SHAREHOLDERS OF TRANSACTION CAPITAL LIMITED

Report on the audit of the financial statements

Opinion

We have audited the consolidated and separate financial statements of Transaction Capital Limited and its subsidiaries ("the Group") set out on pages 13 to 121, which comprise the statements of financial position as at 30 September 2018, the income statements, the statements of comprehensive income, statements of changes in equity and statements of cash flows for the year then ended, and the notes, comprising a summary of significant accounting policies and other explanatory information.

In our opinion, the consolidated and separate financial statements present fairly, in all material respects, the statements of financial position as at 30 September 2018, and the income statements, the statements of comprehensive income, statements of changes in equity and statements of cash flows for the year then ended in accordance with International Financial Reporting Standards and the requirements of the Companies Act of South Africa.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated and Separate Financial Statements section of our report. We are independent of the Group in accordance with the Independent Regulatory Board for Auditors Code of Professional Conduct for Registered Auditors (IRBA Code) and other independence requirements applicable to performing audits of financial statements in South Africa. We have fulfilled our other ethical responsibilities in accordance with the IRBA Code and in accordance with other ethical requirements applicable to performing audits in South Africa. The IRBA Code is consistent with the International Ethics Standards Board for Accountants Code of Ethics for Professional Accountants (Parts A and B). We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

KEY AUDIT MATTER

HOW OUR AUDIT ADDRESSED THE KEY AUDIT MATTER

SIGNIFICANT ESTIMATES AND JUDGEMENTS INCLUDED IN THE SA TAXI LOANS AND ADVANCES IMPAIRMENT MODEL

ISA 240 The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements presumed significant risk of management override of controls, specifically those areas within the impairment/amortisation models which are subject to management judgement and/or estimation.

With regards to SA Taxi, this has been pinpointed as follows:

- Determination of expected losses: probability of default ("PD") and the loss given write-off ("LGW"). Key aspects of the LGW involving estimation include recovery value after repair costs, time to default ("TTD") and time to repossession ("TTR").
- Repair cost methodologies in determining cost to repair salvaged vehicles as this impacts both the expected losses and repossessed inventory valuation.

This is considered to be a key audit matter due to the extent of judgement and/or estimation applied.

We involved quantitative and credit modelling specialists who performed an assessment of:

- The model methodology in light of ongoing refinements to IFRS 9 Financial Instruments ("IFRS 9");
- The accuracy of the model by independently recalculating the input parameters; and
- The completeness and accuracy of data used in the model.

In addition, the audit team assessed the design and implementation of relevant controls and no significant findings were noted.

We assessed the model and its inputs and were satisfied with the methodology applied.

We found the disclosures relating to the loans and advances as presented in note 4, and the key judgements and estimates applied in the determination thereof, to be appropriate and in accordance with the underlying accounting standards.

INDEPENDENT AUDITOR'S REPORT continued

KEY AUDIT MATTER

HOW OUR AUDIT ADDRESSED THE KEY AUDIT MATTER

RE-CALIBRATION OF THE AMORTISED COST MODELS ASSUMPTIONS FOR TRANSACTION CAPITAL RISK SERVICES

Within Transaction Capital Risk Services, the Principal Collections business purchases credit impaired assets for subsequent collection. These are classified as purchased originated credit impaired assets under IFRS 9.

All books purchased are assumed to originate in Stage 3. IFRS 9 requires that projected future cash flows to include forward looking information with regard to expected, rather than just incurred, credit losses.

The Directors re-calibrate the amortised cost models assumptions on an ongoing basis incorporating the most recent available collection data. This is considered to be a key audit matter due to the extent of directors' judgement and/or estimation applied.

We involved our Financial Services Advisory and quantitative and credit modelling specialists who performed an assessment of:

- The model methodology in light of IFRS 9 requirements;
- The accuracy of the model by independently recalculating the input parameters; and
- Assessed the completeness and accuracy of data used in the model.

In addition, the audit team assessed the design and implementation of relevant controls and no significant findings were noted

We assessed the model and its inputs and were satisfied with the overall methodology applied.

We found the disclosures relating to the purchase books debt as presented in note 5, and the key judgements and estimates applied in the determination thereof, to be appropriate and in accordance with the underlying accounting standards.

Other information

The Directors are responsible for the other information. The other information comprises the Directors' Report, the Audit, Risk and Compliance Committee's Report, the Social and Ethics Committee Report and the Company Secretary's Certificate, as required by the Companies Act of South Africa, which we obtained prior to the date of this auditor's report and the Annual Report, which is expected to be made available to us after that date. The other information does not include the consolidated and separate financial statements and our auditor's report thereon.

Our opinion on the consolidated and separate financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the consolidated and separate financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors for the consolidated and separate financial statements

The Directors are responsible for the preparation and fair presentation of the consolidated and separate financial statements in accordance with International Financial Reporting Standards and the requirements of the Companies Act of South Africa, and for such internal control as the Directors determine is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, the Directors are responsible for assessing the Group and Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group and/or Company or to cease operations, or have no realistic alternative but to do so.

INDEPENDENT AUDITOR'S REPORT continued

Auditor's responsibilities for the audit of the consolidated and separate financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate
 in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and Company's
 internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.
- Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group or Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the Directors, we determine those matters that were of most significance in the audit of the consolidated and separate financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other legal and regulatory requirements

In terms of the IRBA Rule published in Government Gazette Number 39475 dated 4 December 2015, we report that Deloitte & Touche has been the auditor of Transaction Capital Limited for 10 years.

GROUP AND COMPANY ACCOUNTING POLICIES

FOR THE YEAR ENDED 30 SEPTEMBER 2018

The financial statements of Transaction Capital Limited ('the company'), and the company and its subsidiaries ('the group') are prepared in accordance with International Financial Reporting Standards ('IFRS'), interpretations issued by the International Financial Reporting Interpretations Committee ('IFRIC'), the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee and Financial Pronouncements as issued by the Financial Reporting Standards Council, the Johannesburg Stock Exchange ('JSE') Listings Requirements, the going-concern principle and the requirements of the South African Companies Act, 71 of 2008.

The consolidated and company financial statements have been prepared on the historical cost basis except for derivative financial instruments, loans and advances: entry-level vehicles, other financial assets and certain loans and advances which are measured at fair value.

The company and group statements of financial position are presented in order of liquidity. Reference to the current maturities of these financial assets and liabilities are disclosed in the statements of financial position notes and in the analysis of financial assets and liabilities. The accounting policies are consistent with the prior year.

The group has made the following accounting policy elections in terms of IFRS, with reference to the detailed accounting policies shown in brackets:

- Property and equipment are accounted for using the cost model (accounting policy 5);
- Intangible assets are accounted for using the cost model (accounting policy 6);
- Regular way purchases or sales of financial assets are recognised and derecognised using trade date accounting (accounting policy 8); and
- Cumulative gains and losses recognised in other comprehensive income ('OCI') in terms of a cash flow hedge relationship are
 transferred from OCI and included in the initial measurement of the non-financial asset or liability (accounting policy 8.5).

All monetary information and figures presented in these consolidated financial statements are stated in millions of South African Rand (Rm), unless otherwise indicated.

The principal accounting policies are set out below:

1 BASIS OF CONSOLIDATION

1.1 Subsidiary companies and other controlled entities

The consolidated financial statements incorporate the financial statements of the company and entities controlled by the company.

Control is achieved where the company has the power to govern the financial and operating policies of an investee entity so as to obtain benefits from its activities and the ability to use its power over the investee to affect the amount of the investor's returns. In assessing control, potential voting rights which presently are exercisable or convertible are taken into account

Total comprehensive income is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Intra-group transactions, balances and unrealised gains or losses are eliminated on consolidation.

Special purpose entities

Special purpose entities ('SPEs') are entities that are created to accomplish a narrow and well-defined objective such as the securitisation of particular assets, or the execution of a specific borrowing or lending transaction. A SPE is consolidated if, based on an evaluation of the substance of its relationship with the group and the SPE's risks and rewards, the group concludes that it controls the SPE including SPEs that are owned by trusts.

The assessment of whether the group has control over an SPE is carried out at inception and normally no further reassessment of control is carried out in the absence of changes in the structure or terms of the SPE, or additional transactions between the group and the SPE. Day-to-day changes in market conditions normally do not lead to a reassessment of control. However, sometimes changes in market conditions may alter the substance of the relationship between the group and a SPE and in such instances the group determines whether the change warrants a reassessment of control based on the specific facts and circumstances. Where the group's voluntary actions change the relationship between the group and a SPE, the group performs a reassessment of control over the SPE.

FOR THE YEAR ENDED 30 SEPTEMBER 2018

1 BASIS OF CONSOLIDATION continued

1.2 Business combinations

Business combinations are accounted for in accordance with the acquisition method of accounting. Subsidiaries are consolidated from the date on which the group acquires effective control of the entity. Consolidation ceases from the date control no longer exists. On acquisition the identifiable assets and liabilities and contingent liabilities of a subsidiary are measured at their fair values. The cost of an acquisition is the fair value of the assets given, liabilities incurred or assumed and equity instruments issued. Any costs directly relating to the acquisition are expensed to profit and loss.

The consideration for the acquisition includes any asset or liability resulting from a contingent consideration arrangement, measured at its acquisition date fair value. Subsequent changes in such fair values are adjusted against the cost of an acquisition where they qualify as measurement period adjustments. All other subsequent changes in the fair value of contingent consideration classified as an asset or liability are accounted for in accordance with the relevant IFRS. Changes in the fair value of contingent consideration classified as equity are not recognised. Where a business combination is achieved in stages, previously held interests in the acquired entity are re-measured to fair value at the acquisition date (i.e. the date the group attains control) and the resulting gain or loss, if any, is recognised in profit or loss.

The acquiree's identifiable assets, liabilities and contingent liabilities that meet the conditions for recognition under IFRS 3 are recognised at their fair value at the acquisition date, except:

- Deferred tax assets or liabilities and liabilities or assets related to employee benefit arrangements are recognised and measured in accordance with IAS 12 Income Taxes ('IAS 12') and IAS 19 Employee Benefits ('IAS 19') respectively;
- Assets (or disposal groups) of the acquiree that are classified as held for sale in accordance with IFRS 5; and
- Non-current Assets Held for Sale and Discontinued Operations ('IFRS 5') are measured in accordance with that standard.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period, or additional assets or liabilities are recognised, to reflect new information obtained about facts and circumstances that existed as of the acquisition date that, if known, would have affected the amounts recognised as of that date.

The measurement period is the period from the date of acquisition to the date the group obtains complete information about facts and circumstances that existed as of the acquisition date and is subject to a maximum of one year.

The non-controlling interest in the acquiree is measured at acquisition date either at fair value or at the non-controlling interest's proportionate share of the acquiree's identifiable net assets (applied on a transaction by transaction basis for all business combinations). The treatment is not an accounting policy choice but is selected for each business combination, and disclosed in the note for business combinations.

Premiums or discounts arising on the acquisition of subsidiaries are treated in terms of the group's accounting policy for goodwill.

2 INVESTMENTS IN SUBSIDIARIES

2.1 Financial statements of the company

Investments in subsidiaries are accounted for at cost less accumulated impairment.

FOR THE YEAR ENDED 30 SEPTEMBER 2018

3 GOODWILL

The group measures goodwill as the fair value of the consideration transferred including the recognised amount of any non-controlling interest in the acquiree, less the net fair value of the identifiable assets acquired and liabilities assumed, all measured as of the acquisition date. When the excess is negative, a bargain purchase gain is recognised immediately in profit or loss.

At the acquisition date, goodwill acquired is allocated to cash-generating units ('CGU's) that are expected to benefit from the synergies of the combination.

A CGU to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the CGU is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amounts of assets in the unit. Any impairment loss for goodwill is recognised directly in profit or loss and is not reversed in subsequent periods.

On disposal of a subsidiary, associate, jointly controlled entity or a CGU, the amount of goodwill attributable is included in the determination of the profit or loss on disposal.

4 INSURANCE CONTRACTS

4.1 Classification of insurance contracts

Contracts under which the group accepts significant insurance risk from another party (the policyholder) by agreeing to compensate the policyholder or other beneficiary if a specified uncertain future event (the insured event) adversely affects the policyholder or other beneficiary are classified as insurance contracts.

4.2 Recognition and measurement of insurance contracts

4.2.1 Short-term insurance contracts

These contracts relate to motor and short-term credit life insurance contracts.

Premiums

Insurance income comprises premiums written on insurance contracts entered into during the financial year, irrespective of whether they relate in whole or in part to a later accounting period, with the earned portion of premiums received recognised as revenue proportionally over the period of coverage.

Claims incurred

Insurance claims include claims and related claims expenses paid during the financial year, together with the movement in provision for outstanding claims.

4.2.2 Short-term insurance liabilities

The following are classified as short-term insurance liabilities:

Unearned premiums

Short-term insurance premiums are recognised in income proportionately over the period of cover. The portion of premium accrued on in-force contracts that relates to unexpired risks at the reporting date is reported as an unearned premium liability, which is included in insurance-related payables from underwriting activities.

Outstanding claims

Liabilities for unpaid claims are estimated using the input of assessments for individual cases reported to the group and statistical analyses of the claims incurred but not reported. Outstanding claims liabilities are recognised as liabilities and included in insurance-related payables from underwriting activities. The expense is recognised in net insurance income as a result of the liability being raised. The group does not discount its liabilities for unpaid claims.

FOR THE YEAR ENDED 30 SEPTEMBER 2018

4 INSURANCE CONTRACTS continued

4.2 Recognition and measurement of insurance contracts continued

4.2.3 Salvage and subrogation reimbursements

The insurance contracts permit the group to sell property acquired in settling a claim (in other words, salvage). Estimates of salvage recoveries are considered in the measurement of the recognised claims liabilities and recognised as an asset when the liability is recognised. The allowance is the amount that can reasonably be recovered from the disposal of the property.

The group may also have the right to pursue third parties for payment of some or all costs (in other words, subrogation). Subrogation reimbursements are also considered as an allowance in the measurement of the insurance liability for claims and are recognised as assets when the liability is recognised. The allowance is based on an assessment of the amount that can be recovered from the action against the liable third party.

5 PROPERTY AND EQUIPMENT

Property and equipment is stated at cost less accumulated depreciation and impairment losses.

Cost includes expenditures that are directly attributable to the acquisition of the asset. Subsequent costs are recognised to the extent that it is probable that the future economic benefits that are associated with them will flow to the entity, and the cost can be measured reliably. If a replacement part is recognised in the carrying amount of equipment, the carrying amount of the replaced part is derecognised. Repairs and maintenance are expensed as and when incurred.

Items of property and equipment are depreciated on a component basis to their residual values, on the straight line basis over their estimated economic lives. Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets. However, when there is no reasonable certainty that ownership will be obtained by the end of the lease term, assets are depreciated over the shorter of the lease term and their useful lives. Depreciation commences from the date that they are available for use over the following periods:

Vehicles 5 years
Office and computer equipment 2 - 6 years

The residual values, estimated useful lives and methods of depreciation of the assets are reviewed at each financial year-end and, if expectations differ from previous estimates, the changes are accounted for as changes in accounting estimates.

The profit or loss arising from the disposal or retirement of an asset is determined as the difference between the sale proceeds and the carrying amount of the asset and is recognised in profit or loss.

6 INTANGIBLE ASSETS

Intangible assets are initially recognised at cost if acquired separately or at fair value at the date of acquisition in a business combination. Subsequently, intangible assets are carried at cost less accumulated amortisation and impairment.

Development costs which relate to the design and testing of new improved products, systems or processes are recognised as an asset to the extent that it is expected that such assets will generate future economic benefits. Intangible assets are amortised to their residual values, on the straight line basis over the estimated economic lives over the following periods:

Computer and telephony software 2 – 10 years Customer relationships 4 – 13 years

Useful lives and amortisation methods are reviewed at the end of each reporting period, with the effect of any changes in estimate being recognised on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

FOR THE YEAR ENDED 30 SEPTEMBER 2018

7 INVENTORIES

Inventories are stated at the lower of cost or net realisable value. Cost is determined using the weighted average method. Costs include landed cost, freight and clearing costs. Net realisable value is the estimated selling price in the ordinary course of business, less the cost of completion and selling expenses. The write down of inventory to net realisable value and the reversal thereof is recognised in profit and loss. The reversals of the write downs are limited to the cost of inventory.

Vehicles in possession

Vehicles in possession represent security attached where a borrower has defaulted under the terms of a vehicle finance arrangement. Vehicles in possession are stated at the lower of cost or net realisable value. Cost is determined using the weighted average method. Costs include refurbishment costs and related costs incurred in bringing such vehicles to their present location and condition. Net realisable value is the estimated selling price in the ordinary course of business, less the cost of refurbishment and selling expenses. The write down of vehicles in possession to net realisable value and the reversal thereof is recognised in profit and loss. The reversals of the write downs are limited to the reacquired cost of vehicles in possession. Vehicles in possession are reported as part of loans and advances and included as a non-financial asset in the categorised statement of financial position.

8 FINANCIAL INSTRUMENTS

A financial instrument is defined as a contract that gives rise to a financial asset in one entity and a financial liability or equity instrument in another entity.

The group recognises financial assets and financial liabilities at the trade date when it becomes a party to the contractual provisions of the instrument.

8.1 Initial recognition

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

Financial instruments are grouped into classes that are appropriate taking into account the characteristics and risks of those financial instruments. Classes of financial instruments have been determined by referring to the nature and extent of risks arising from the financial instruments and how these are managed.

The group generally does not reclassify financial instruments between different categories subsequent to initial recognition.

8.2 Classification

Financial assets are classified into the following categories:

- At fair value through profit or loss;
- At fair value through other comprehensive income; and
- Amortised cost.

Financial liabilities are classified into the following categories:

- Financial liabilities at fair value through profit or loss; and
- Financial liabilities at amortised cost.

A financial asset is measured at amortised cost if:

- lacktriangle The financial asset is held in order to collect contractual cash flows; and
- The contractual terms of the financial asset give rise to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A financial asset is measured at fair value through other comprehensive income if:

- The financial asset is held in order to collect contractual cash flows and to be sold; and
- The contractual terms of the financial asset give rise to cash flows that are solely payments of principal and interest on the principal amount outstanding.

FOR THE YEAR ENDED 30 SEPTEMBER 2018

8 FINANCIAL INSTRUMENTS continued

8.2 Classification continued

A financial asset is measured at fair value through profit and loss unless it is measured at amortised cost or at fair value through other comprehensive income. In certain instances the business model is not to collect contractual cash flows, nor to sell the asset and in these cases the financial asset is held at fair value through profit and loss.

The group may make an irrevocable election at initial recognition for particular investments in equity instruments that would otherwise be measured at fair value through profit and loss to present subsequent changes in the fair value through other comprehensive income.

The group may at initial recognition irrevocably designate a financial asset as measured at fair value through profit or loss if doing so significantly reduces a measurement or recognition inconsistency (sometimes referred to as an accounting mismatch) that would otherwise arise from measuring financial assets or liabilities or recognising the gains and losses on them on different bases.

The group classifies all financial liabilities as subsequently measured at amortised cost.

8.2.1 Financial assets

8.2.1.1 Financial assets at fair value through profit or loss

Financial assets that are held at fair value through profit and loss include loans and advances: entry-level vehicles and certain purchased book debts that are either managed on a fair value basis or that do not meet the requirements to be measured at amortised cost (refer to other financial assets in note 5.2 in the consolidated financial statements).

Realised and unrealised gains and losses arising from changes in the fair value of financial assets classified at fair value through profit or loss are included in profit or loss in the period in which they arise.

8.2.1.2 Financial assets at fair value through other comprehensive income

Financial assets that are held at fair value through other comprehensive income include derivative financial instruments.

8.2.1.3 Amortised cost

These instruments are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Financial assets which have been classified as loans and receivables include cash that do not meet the definition of cash as defined in IAS 7 Statement of Cash Flows, trade and other receivables, loans and advances, purchased book debts and other loans receivable.

Loans and receivables (including trade and other receivables, bank balances and cash) are initially recognised at fair value. Subsequently loans and receivables are carried at amortised cost using the effective interest method, less any impairment losses. Amortised cost is calculated by taking into account any transaction costs on acquisition and fees and costs that are an integral part of the effective interest rate.

The carrying amount of loans considered to be impaired on the statement of financial position is reduced through the use of an expected loss impairment methodology.

The group only recognises the cumulative changes in lifetime expected credit losses since initial recognition as a loss allowance for purchased or originated credit-impaired assets. At each reporting date, the group recognises in profit or loss the amount of the change in lifetime expected credit losses as an impairment gain or loss. The group recognises favourable changes in lifetime expected credit losses as an impairment gain, even if the lifetime expected credit losses are less than the amount of expected credit losses that were included in the estimated cash flows on initial recognition.

Credit loss is the difference between all contractual cash flows that are due to the group in accordance with the contract and all the cash flows that the group expects to receive (i.e. all cash shortfalls), discounted at the original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets). The group estimates cash flows by considering all contractual terms of the financial instrument through the expected life of that financial instrument. The cash flows that are considered include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms. There is a presumption that the expected life of a financial instrument can be measured reliably, however in rare cases when it is not possible to reliably estimate the expected life of a financial instrument, the group uses the remaining contractual terms of the financial instrument.

Expected credit losses are the weighted average of credit losses with the respective risks of default occurring as the weights. Lifetime expected credit losses are those expected credit losses that results from all possible default events over the expected life of a financial instrument.

FOR THE YEAR ENDED 30 SEPTEMBER 2018

8 FINANCIAL INSTRUMENTS continued

8.2 Classification continued

8.2.1 Financial assets continued

8.2.1.3 Amortised cost continued

The loss allowance is the allowance for expected credit losses on financial assets measured at amortised cost, lease receivables and contract assets, the accumulated impairment amount for financial assets measured at fair value through other comprehensive income and the provision for expected credit losses on loan commitments and financial guarantee contracts.

Purchased or originated credit-impaired financial assets are those which are credit-impaired on initial recognition.

A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:

- Significant financial difficulty of the issuer or the borrower;
- A breach of contract, such as a default;
- The lender(s) of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession that the lender(s) would not otherwise consider;
- It is becoming probable that the borrower will enter bankruptcy or other financial reorganisation;
- The disappearance of an active market for that financial asset because of financial difficulties; or
- The purchase or origination of a financial asset at a deep discount that reflects the incurred credit losses.

The majority of the group's advances, as well as purchased book debts, are included in the loans and receivables category.

Purchased book debts are portfolios of written-off consumer debts purchased at prices below the nominal receivable amounts. Purchased book debts, other than those at fair value through profit and loss (referred to as other financial assets in note 5.2 in the consolidated financial statements), are reflected at amortised cost on a portfolio basis. Cost includes amounts payable to the vendor and other direct acquisition costs.

8.2.1.4 Impairment

The group recognises a loss allowance for expected credit losses on financial assets that are measured at amortised cost, at fair value through other comprehensive income, lease receivables, contracts or loan commitments and financial guarantee contracts.

The group applies the impairment requirements for the recognition and measurement of a loss allowance for financial assets that are measured at fair value through other comprehensive income. The loss allowance is recognised in other comprehensive income and does not reduce the carrying amount of the financial asset in the statement of financial position.

The loss allowance for a financial instrument is measured at the lifetime expected credit losses if the credit risk on that financial asset has increased significantly since initial recognition. The group only recognises cumulative changes in lifetime expected losses since initial recognition on purchased or originated credit-impaired assets such as purchased books.

The impairment requirements result in the recognition of lifetime expected credit losses for all financial instruments for which there have been significant increases in credit risk since initial recognition, whether assessed on an individual or collective basis, considering all reasonable and supportable information, including that which is forward looking. If at the reporting date, the credit risk on a financial instrument has not increased significantly since initial recognition, the group measures the loss allowance for that financial instrument at an amount equal to 12 month expected credit losses. This does not apply to purchased or originated credit-impaired assets on which the group only recognises cumulative changes in lifetime expected losses since initial recognition.

12 month expected credit losses are the portion of the lifetime expected credit losses that represent the expected credit losses that result from default events on a financial instrument that are possible within 12 months after reporting date.

For loan commitments and financial guarantee contracts, the date that the group becomes party to the irrevocable commitment is considered the date of initial recognition for the purposes of applying the impairment requirements.

FOR THE YEAR ENDED 30 SEPTEMBER 2018

8 FINANCIAL INSTRUMENTS continued

8.2 Classification continued

8.2.1 Financial assets continued

8.2.1.4 Impairment continued

If the group has measured the loss allowance for a financial instrument at an amount equal to lifetime expected credit losses in the previous reporting period, but determines at the current reporting date that there is no longer a significant increase in credit risk since initial recognition, the loss allowance is measured at an amount equal to 12 month expected credit losses at the current reporting date. Impairment losses or reversals are recognised in profit or loss.

Determining significant increases in credit risk

The group assumes that the credit risk on a financial instrument has not increased significantly if the financial instrument is determined to have a low credit risk at the reporting date.

If reasonable and supportable forward-looking information is available without undue cost or effort, the group relies on this information as well as historic information when determining whether credit risk has increased significantly since initial recognition. However, when information that is more forward-looking than past due status is not available without undue cost or effort, the group may use past due information to determine whether there have been significant increases in credit risk since initial recognition.

A detailed description of the group's approach to determine significant increases in credit risk has been included in note 28 of the consolidated financial statements.

Modified financial assets

If the contractual cash flows on a financial asset have been renegotiated or modified and the financial asset was not derecognised, the group assesses whether there has been a significant increase in the credit risk of the financial instrument by comparing the risk of a default occurring at the reporting date (based on the modified contractual terms) and the risk of default occurring at initial recognition (based on the original, unmodified contractual terms).

Purchased or originated credit-impaired financial assets

The group only recognises cumulative changes in lifetime expected credit losses since initial recognition as a loss allowance for principal book portfolios. Any changes in lifetime expected credit losses are recognised in profit or loss. The group recognises favourable changes in lifetime expected credit losses as an impairment gain, even if lifetime expected credit losses are less than the amount of expected credit losses that were included in the estimated cash flows on initial recognition.

Measurement of expected credit losses

The group measures expected credit losses of a financial instrument in a way that reflects:

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The above is described in more detail in note 28 of the consolidated financial statements.

The maximum period considered when measuring expected credit losses is the maximum contractual period (including extension options) over which the group is exposed to credit risk, and not a longer period, even if that period is consistent with business practice.

FOR THE YEAR ENDED 30 SEPTEMBER 2018

8 FINANCIAL INSTRUMENTS continued

8.2 Classification continued

8.2.2 Financial liabilities and equity instruments issued by the group

8.2.2.1 Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement.

8.2.2.2 Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the group are recognised at the proceeds received, net of direct issue costs.

Repurchase of the company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the company's own equity instruments.

8.2.2.3 Financial liabilities at fair value through profit or loss

Financial liabilities that are held for trading purposes include derivative financial instruments.

Realised and unrealised gains and losses arising from changes in the fair value of financial liabilities classified as at fair value through profit or loss are included in the profit or loss in the period in which they arise.

8.2.2.4 Financial liabilities at amortised cost

Financial liabilities which are subsequently recognised at amortised cost using the effective interest method comprise interest bearing liabilities, bank overdrafts and trade payables.

8.3 Derivative instruments

A derivative is a financial instrument whose value changes in response to an underlying variable, that requires little or no initial investment and that is settled at a future date. The group uses derivative financial instruments to manage its exposure to foreign exchange and interest rate risk. The group does not hold or issue derivative financial instruments for trading purposes. Derivative financial instruments comprise foreign exchange contracts and interest rate swaps.

Derivative financial instruments are initially recognised in the statement of financial position at fair value. Derivatives are subsequently re-measured at their fair value with all movements in fair value recognised in profit or loss, unless it is a designated and effective hedging instrument. The method of recognising the resulting fair value gain or loss depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged.

The group treats derivatives embedded in other financial or non-financial instruments such as the conversion option in a convertible bond, as separate derivatives when:

- Their risks and characteristics are not closely related to those of the host contract;
- They meet the definition of a derivative; and
- The host contract is not carried at fair value, with gains and losses reported in profit or loss.

FOR THE YEAR ENDED 30 SEPTEMBER 2018

8 FINANCIAL INSTRUMENTS continued

8.4 Fair value

Certain of the group's financial instruments are carried at fair value through profit or loss such as derivative financial instruments. The fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability between market participants at the measurement date.

The best evidence of the fair value of a financial instrument at initial recognition is the transaction price (i.e. the fair value of the consideration given or received) unless the fair value of that instrument is evidenced by comparison with other observable current market transactions in the same instrument (i.e. without modification or repackaging) or based on a valuation technique whose variables include only data from observable markets.

The method of determining the fair value of financial instruments is analysed into the following categories:

- **Level 1** Unadjusted quoted prices in active markets where the quoted price is readily available and the price represents actual and regularly occurring market transactions on an arm's length basis.
- **Level 2** Valuation techniques using market observable inputs, including:
 - Using recent arm's length market transactions;
 - Reference to the current fair value of similar instruments; and
 - Discounted cash flow analysis, pricing models or other techniques commonly used by market participants.
- Level 3 Valuation techniques, as described for level 2 above, for which not all inputs are market observable prices or rates. Such a financial instrument is initially recognised at the transaction price, which is the best indicator of fair value, although the value obtained from the relevant valuation model may differ. The difference between the transaction price and the model value, commonly referred to as 'day one profit and loss", is either amortised over the life of the transaction, deferred until the instrument's fair value can be determined using market observable inputs, or realised through settlement.

The valuation techniques in level 2 and level 3 use inputs such as interest rate yield curves, equity prices, commodity and currency prices/yields, volatilities, and the correlation between inputs. The models used in these valuation techniques are calibrated against industry standards, economic models and against observed transaction prices, where available.

8.5 Hedge accounting

The group designates certain derivatives in respect of foreign currency risk as cash flow hedges and interest rate risk as fair value hedges.

Cash flow hedges

Hedge accounting is used for derivatives designated in this way, provided specific criteria are met. The group documents, at the inception of the transaction, the relationship between hedging instruments and hedged items, as well as its risk management objective and strategy for undertaking various hedge transactions. The group also documents its assessment, both at hedge inception and on an on-going basis, of whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in cash flows of hedged items.

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges are recognised in the cash flow hedging reserve in equity. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss. Where the forecast transaction or a foreign currency firm commitment results in the recognition of a non-financial asset, the gains and losses previously deferred in equity are transferred from equity and included in the initial measurement of the cost of the non-financial asset.

Hedge accounting is discontinued when the group revokes the hedging relationship, when the hedging instrument expires or is sold, terminated, or exercised, or when it no longer qualifies for hedge accounting.

Fair value hedges

Where a hedging relationship is designated as a fair value hedge, the hedged item is adjusted for the change in fair value in respect of the risk being hedged. Fair value gains and losses arising on the pre-measurement of both the hedging instrument and the hedged item are recognised in profit and loss, for so long as the hedging relationship is effective.

Any hedge ineffectiveness is recognised in profit and loss in non-interest revenue. If the derivative expires, is sold, terminated, exercised, no longer meets the criteria for fair-value hedge accounting, or the designation is revoked, then hedge accounting is discontinued.

FOR THE YEAR ENDED 30 SEPTEMBER 2018

8 FINANCIAL INSTRUMENTS continued

8.6 Offsetting

Financial assets and liabilities are offset and the net amount reported in the statement of financial position, when there is a legally enforceable right to set off the recognised amounts and there is an intention to realise the asset and settle the liability simultaneously.

8.7 Derecognition

Financial assets (or a portion thereof) are derecognised when the group realises the rights to the benefits specified in the contract, the rights expire or the group surrenders or otherwise loses control of the contractual rights that comprise the financial asset. On derecognition, the difference between the carrying amount of the financial asset and proceeds receivable and any prior adjustment to reflect fair value that had been reported in equity are included in profit or loss.

Financial liabilities (or a portion thereof) are derecognised when the obligation specified in the contract is discharged, cancelled or expires. On derecognition, the difference between the carrying amount of the financial liability, including related unamortised costs, and the amount paid for it are included in the statement of comprehensive income.

9 PROVISIONS, CONTINGENT LIABILITIES AND CONTINGENT ASSETS

Provisions are liabilities of uncertain timing or amount. They are recognised when the group has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The amount recognised as provisions is the best estimate of the consideration required to settle the present obligation at the end of the reporting period taking into account the risks and uncertainties surrounding the obligation.

Contingent liabilities and contingent assets are not recognised in the financial statements.

10 IMPAIRMENT OF ASSETS OTHER THAN FINANCIAL INSTRUMENTS

The group reviews the carrying amounts of tangible and intangible assets at each financial year-end to determine whether there is any indication of impairment. The recoverable amount of these assets is estimated in order to determine the extent of any impairment loss. Where it is not possible to estimate the recoverable amount of an individual asset, the group estimates the recoverable amount of the CGU to which the asset belongs. Goodwill is assessed at each financial year-end for impairment.

Recoverable amount is the greater of fair value less cost to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount is estimated to be less than its carrying amount, the carrying amount is reduced to its recoverable amount. Impairment losses are allocated to assets within a CGU (i.e. first to goodwill and then to the other assets on a pro rata basis) and recognised in the statement of comprehensive income.

Where an impairment loss (other than an impairment of goodwill) subsequently reverses, the carrying amount is increased to the revised estimate of its recoverable amount limited to an amount which does not exceed the carrying amount that would have been determined had no impairment loss been recognised in prior years. A reversal of an impairment loss is recognised as income immediately, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

FOR THE YEAR ENDED 30 SEPTEMBER 2018

11 REVENUE RECOGNITION

11.1 General policy

Revenue is recognised to the extent that it is probable that economic benefits will flow to the group and the revenue can be reliably measured.

Revenue comprises invoiced sales in respect of the sale of goods, fees for rendering of services to customers, collection of owned book debts and finance charges on loans and suspensive sale credit agreements.

11.2 Interest income

Interest income is recognised in the statement of comprehensive income for all instruments measured at amortised cost using the effective interest method.

This is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for:

- Purchased or originated credit-impaired financial assets. For those financial assets, the group applies the credit-adjusted effective interest rate to the amortised cost of the financial asset from initial recognition.
- Financial assets that are not purchased or originated credit-impaired financial assets but subsequently have become credit-impaired financial assets. For those financial assets, the group applies the effective interest rate to the amortised cost of the financial asset in subsequent reporting periods.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liability to the gross carrying amount of a financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the group estimates the expected cash flows by considering all the contractual terms of the financial instrument but does not consider the expected credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts.

The credit-adjusted effective interest rate is the rate that exactly discounts the estimated future cash payments or receipts through the expected life of the financial asset to the amortised cost of a financial asset that is a purchased or originated credit-impaired financial asset. When calculating the credit-adjusted effective interest rate, the group estimates the expected cash flows by considering all the contractual terms of the financial asset and expected credit losses.

11.3 Purchased book debts

Revenue from purchased book debts is recognised when payment is received from the debtors, including amounts in respect of interest and cost recoveries.

11.4 Debt collection activities

Commissions and fees receivable for collection of debtors for third parties are recognised on receipt of payments from the debtors.

11.5 Sale of goods

Revenue from the sale of goods is recognised when all the following conditions are satisfied:

- The group has transferred to the buyer the significant risks and rewards of ownership of the goods;
- The group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- The amount of revenue can be measured reliably;
- It is probable that the economic benefits associated with the transaction will flow to the group; and
- The costs incurred or to be incurred in respect of the transaction can be measured reliably.

Specifically, revenue from the sale of goods is recognised when goods are delivered and legal title is passed.

FOR THE YEAR ENDED 30 SEPTEMBER 2018

11 REVENUE RECOGNITION continued

11.6 Rendering of services

Fees and commission income are recognised on a percentage of completion basis when costs can be reliably measured and receipt of the future economic benefits is probable.

11.7 Non-operating income

Dividend income from investments is recognised when the shareholder's right to receive payment has been established (provided that it is probable that the economic benefits will flow to the group and the amount of income can be measured reliably).

11.8 Government grants

Government grants are not recognised until there is reasonable assurance that the group will comply with the conditions attached to them and that the grants will be received.

Government grants are recognised in profit or loss on a systematic basis over the periods in which the group recognises as expenses the related costs for which the grants are intended to compensate.

The benefit of a government loan at a below-market rate of interest is treated as a government grant, measured as the difference between proceeds received and the fair value of the loan based on prevailing market interest rates.

12 GAINS AND LOSSES

A gain or loss on a financial asset or financial liability that is measured at fair value is recognised in profit or loss unless:

- It is part of a hedging relationship;
- It is an investment in an equity instrument and the group has elected to present gains and losses on that investment in other comprehensive income;
- It is a financial liability designated as at fair value through profit or loss and the change is as a result of changes in credit risk. In this case the group is required to present the effects of changes in the liability's credit risk in other comprehensive income; or
- It is a financial asset measured at fair value through other comprehensive income.

13 INTEREST EXPENSE

Interest expense comprise interest on borrowings including debentures, dividends on redeemable preference shares and other costs incurred in connection with the borrowing of funds.

Interest expense is recognised in the period in which it is incurred using the effective interest method except to the extent in which it meets the criteria for capitalisation against a qualifying asset in which case it is capitalised as part of the cost of the asset.

FOR THE YEAR ENDED 30 SEPTEMBER 2018

14 TAXATION

14.1 Current tax

The charge for current tax is based on the results for the year adjusted for items which are tax exempt or are not tax deductible. Tax is calculated using rates that have been enacted or substantively enacted by the financial year-end.

14.2 Deferred tax

Deferred tax is calculated using the liability method.

A deferred tax liability is recognised for all taxable temporary differences, except to the extent that the deferred tax liability arises from:

- The initial recognition of goodwill; or
- The initial recognition of an asset or liability in a transaction which is not a business combination and at the time of the transaction, affects neither accounting profit or taxable profit nor tax loss.

A deferred tax liability is recognised for all taxable temporary differences associated with investments in subsidiaries and associates, except to the extent that both of the following conditions are satisfied:

- The company is able to control the timing of the reversal of the temporary difference; and
- It is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax is calculated using taxation rates that have been enacted or substantially enacted at financial year-end.

The effect on deferred tax of any changes in taxation rates is charged to profit or loss, except to the extent that it relates to items previously charged or credited directly to equity in which case the deferred tax is charged to equity.

Deferred tax assets are recognised to the extent that it is probable that future profits will be available against which the associated tax deductible temporary differences can be utilised.

Deferred tax related to fair value measurement of cash flow hedges, which are charged or credited directly to other comprehensive income, is also credited or charged directly to other comprehensive income and is subsequently recognised in profit or loss together with the deferred gain or loss.

Deferred tax assets and deferred income tax liabilities are offset, if a legally enforceable right exists to set off current income tax assets against current income tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

14.3 Indirect taxation

Indirect taxation in the form of non-claimable value-added tax (VAT) on expenses is disclosed as indirect taxation in profit or loss.

The non-claimable VAT on the cost of acquisition of fixed assets is amortised over the useful lives of the fixed assets and is included in depreciation in the statement of comprehensive income The net amount of VAT recoverable from, or payable to, the taxation authority is included as part of the receivables or payables in the statement of financial position.

FOR THE YEAR ENDED 30 SEPTEMBER 2018

15 LEASE ACCOUNTING

Leases of assets where the group assumes substantially all the risks and rewards of ownership are classified as finance leases.

All other leases are classified as operating leases.

15.1 Finance leases

15.1.1 Lessors

Assets subject to finance lease agreements are derecognised and the finance lease is recognised as a receivable at an amount equal to the net investment in the lease (gross investment less unearned finance income).

The gross investment in the lease comprises the aggregate of the following:

- The minimum lease payments receivable under the finance lease;
- Any unguaranteed residual value accruing under the lease; and
- The initial direct costs incurred in negotiating the lease.

The interest element of the finance income is credited to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the lease receivable for each period.

15.1.2 Lessees

Assets held under finance leases are initially recognised as assets of the group at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the consolidated statement of financial position as a finance lease obligation.

Lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognised immediately in profit or loss, unless they are directly attributable to qualifying assets, in which case they are capitalised in accordance with the group's general policy on borrowing costs. Contingent rentals are recognised as expenses in the periods in which they are incurred.

15.2 Operating leases

15.2.1 Lessees

Lease payments under operating leases are recognised in profit or loss on a straight line basis over the expected lease term.

16 EMPLOYEE BENEFITS

16.1 Medical aid obligation

Medical aid costs are recognised as an expense in the period in which the employees render services to the group. Differences between contributions payable and contributions actually paid are shown as either prepayments or accruals in the statement of financial position. There are no post-retirement benefit obligations for former employees.

16.2 Retirement funds

The group's contributions to defined contribution plans are recognised as an expense in the period in which the related services are rendered. There are no defined benefit plans for employees.

16.3 Employees' leave entitlement

Employee entitlements to annual leave are recognised when they accrue to employees. An accrual is made for the annual leave liability at the financial year-end. Unutilised sick leave does not accrue to employees.

16.4 Termination benefits

The group recognises termination benefits as a liability in the statement of financial position and as an expense in profit or loss when it has a present obligation relating to termination. The group has a present obligation when it is demonstrably committed to either terminating the employment of current employees according to a detailed formal plan, without possibility of withdrawal or providing termination benefits as a result of an offer to encourage voluntary redundancy.

16.5 Bonuses

Management and staff bonuses are recognised as an expense in staff costs as incurred when it is probable that the economic benefits will be paid and the amount can be reliably measured.

FOR THE YEAR ENDED 30 SEPTEMBER 2018

17 SHARE-BASED TRANSACTIONS

Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date. Details regarding the determination of the fair value of the equity-settled share-based transactions are set out in note 22 of the consolidated financial statements.

The fair value determined at the grant date of the equity settled share-based transactions is expensed on a straight line basis over the vesting period, based on the group's estimate of equity instruments that will eventually vest, with a corresponding increase in equity. At the end of each reporting period, the group revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the equity-settled share-based payment reserve.

18 OPERATING SEGMENTS

18.1 Operational segments

The group is divided into three operating segments, each of which engages in business activities from which it earns revenues and incur expenses (including revenues and expenses relating to transactions with other components of the group). The operating results of these segments are regularly reviewed by the group's chief operating decision makers to make decisions about resources to be allocated to the segment and assess its performance.

The group is organised on the basis of products and services and the segments have been identified on this basis. The principal business units in the group are as follows:

SA Tax

- A vertically integrated taxi platform incorporating a unique blend of vehicle procurement, retail, repossession
 and refurbishment capabilities with asset-backed developmental finance and insurance competencies for focused
 vehicle types.
- Revenue is mainly derived from interest earned on financing of vehicles and non-interest revenue streams, including revenue from the sale of vehicles, telematics services and insurance products.

■ Transaction Capital Risk Services

- Transaction Capital Risk Services acts both as an agent on an outsourced contingency or fee-for-service (FFS) basis, and as a principal in acquiring and then collecting on non-performing loan portfolios.
- Revenue from non-performing loans comprises payments received from debtors including amounts in respect
 of interest and cost recoveries.

■ Group executive office

- The group executive office provides an efficient capital management and treasury function for entities within the group.
- Revenue comprises mainly of interest income.

18.2 Geographical segments

The group operates in two geographic regions being:

- South Africa; and
- Australia

19 FOREIGN CURRENCIES

19.1 Foreign currency transactions

Foreign currency transactions are converted to South African Rand at the rates of exchange ruling at the date of transaction. Monetary assets and liabilities denominated in foreign currencies at the financial year-end are translated to South African Rand at the rates ruling at that date. Gains or losses on translation are recognised in the statement of comprehensive income.

19.2 Financial statements of foreign operations

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on consolidation, are translated to South African Rand at foreign exchange rates ruling at the financial year-end. The revenues and expenses of foreign operations are translated to South African Rand at rates approximating the foreign exchange rates ruling at the date of the transactions.

Foreign exchange differences arising on translation are recognised directly in other comprehensive income.

FOR THE YEAR ENDED 30 SEPTEMBER 2018

20 DIVIDENDS PAID

Dividends are recognised against equity in the period in which they are approved by the company's directors. Dividends declared after the reporting date are not recognised but disclosed as a post reporting date event.

21 MANAGEMENT ESTIMATES

The preparation of financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that may affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and other factors that are believed to be reasonable under the circumstances. This forms the basis of making the judgements on carrying values of assets or liabilities that are not otherwise readily apparent. Actual results may differ from these estimates. The estimates and assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision only affects that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Certain accounting policies have been identified as involving particularly complex or subjective judgements or assessments, as follows:

21.1 Asset lives and residual values

Property and equipment is depreciated and intangible assets are amortised over their useful life taking into account residual values, where appropriate. The actual lives of the assets and residual values are assessed at each financial year-end and may vary depending on a number of factors. In re-assessing asset lives, factors such as technological innovation, product life cycles and maintenance programmes are taken into account.

21.2 Deferred tax assets

Deferred tax assets are recognised to the extent it is probable that taxable income will be available in future against which they can be utilised. Future taxable profits are estimated based on business plans which include estimates and assumptions regarding economic growth, interest, inflation, taxation rates and competitive forces.

21.3 Impairment of non-financial assets

Determining whether goodwill is impaired requires an estimation of the value in use of the CGU to which goodwill has been allocated. The value in use calculation requires the directors to estimate the future cash flows expected to arise from the CGU and a suitable discount rate in order to calculate present value. Goodwill is considered for impairment annually.

Property and equipment and intangible assets are considered for impairment if there is any reason to believe that an impairment may be necessary. Factors taken into consideration include the economic viability of the asset itself and, where it is a component of a larger economic unit, the viability of the unit.

Future cash flows expected to be generated by the assets are projected, taking into account market conditions and the expected useful lives of the assets. The present value of these cash flows, determined using an appropriate discount rate, is compared to the current asset value and, if lower, the assets are impaired to the present value.

21.4 Impairment of financial assets

The group measures expected credit losses of a financial instrument in a way that reflects:

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The maximum period considered when measuring expected credit losses is the maximum contractual period (including extension options) over which the group is exposed to credit risk, and not a longer period, even if that period is consistent with business practice.

Refer to note 8 in these accounting policies for the accounting policies relating to the impairment of financial assets.

NEW AND AMENDED ACCOUNTING STANDARDS AND INTERPRETATIONS

FOR THE YEAR ENDED 30 SEPTEMBER 2018

No accounting standards and interpretations became applicable during the current reporting period that the group was required to adopt.

NEW STANDARDS ISSUED BUT NOT YET EFFECTIVE

IFRS 15 - Revenue from contracts with customers

The standard provides a single, principles based five-step model to be applied to all contracts with customers.

Guidance is provided on topics such as the point at which revenue is recognised, accounting for variable considerations, costs of fulfilling and obtaining a contract and various related matters. New disclosures about revenue are also introduced.

The amendment is effective for the financial year ending 30 September 2019. Significant revenue streams within the group are interest income, revenue from debt collection activities (both as principal and agent) and revenue from insurance operations. The group is in the process of assessing the impact of the implementation of the standard.

IFRS 16 - Leases

IFRS 16 introduces a comprehensive model for the identification of lease arrangements and accounting treatments for both lessors and lessees. IFRS 16 will supersede the current lease guidance including IAS 17 Leases and the related interpretations when it becomes effective.

IFRS 16 distinguishes leases and service contracts on the basis of whether an identified asset is controlled by a customer. Distinctions of operating leases (off balance sheet) and finance leases (on balance sheet) are removed for lessee accounting, and are replaced by a model where a right-of-use asset and a corresponding liability have to be recognised for all leases (i.e. all on balance sheet) except for short-term leases and leases of low value assets.

The right-of-use is initially measured at cost and subsequently measured at cost (subject to certain exceptions) less accumulated depreciation and impairment losses, adjusted for any remeasurement of the lease liability. The lease liability is initially measured at the present value of the lease payments that are not paid at that date. Subsequently, the lease liability is adjusted for interest and lease payments, as well as the impact of lease modifications, amongst others. Furthermore, the classification of cash flows will also be affected as operating lease payments under IAS 17 are presented as operating cash flows; whereas under the IFRS 16 model, the lease payments will be split into a principal and interest portion which will be presented as financing and operating cash flows respectively.

In contrast to lessee accounting, IFRS 16 substantially carries forward the lessor accounting requirements in IAS 17, and continues to require a lessor to classify a lease either as an operating lease or a finance lease.

The amendment is effective for the financial year ending 30 September 2020. Except for short-term leases (< 12 months) and leases of low-value assets, the group's current operating leases will be disclosed based on the right of use model in IFRS 16.

IFRS 17 - Insurance contracts

IFRS 17 establishes the principles for the recognition, measurement, presentation and disclosure of insurance contracts within the scope of the standard. The objective of IFRS 17 is to ensure that an entity provides relevant information that faithfully represents those contracts. This information gives a basis for users of financial statements to assess the effect that insurance contracts have on the entity's financial position, financial performance and cash flows.

The new standard requires insurance liabilities to be measured at a current fulfillment value and provides a more uniform measurement and presentation approach for all insurance contracts. These requirements are designed to achieve the goal of a consistent, principle-based accounting for insurance contracts.

Short-term insurance contracts will be entitled to use a simplified unearned premium liability model, as opposed to long-term insurance contracts which will be measured as the present value of future insurance cash flows with a suitable adjustment for risk.

The amendment is effective for the financial year ending 30 September 2022. The Group's insurance operations are significant and we are currently assessing impact of the IFRS17 on the Group's consolidated financial statements.

IFRIC 23 – Uncertainty over income tax treatments

IFRIC 23 clarifies the accounting for uncertainties in income taxes. The interpretation is to be applied to the determination of taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates, when there is uncertainty over income tax treatments under IAS 12.

The amendment is effective for the financial year ending 30 September 2019. The amendment is not expected to have a material impact on the group's consolidated financial statements.

TRANSACTION CAPITAL RISK SERVICES (TCRS) COMPONENTS:		
TCRS - South Africa	166	143
TCRS – Australia*	374	390
Value Added Services	100	100
TOTAL GOODWILL	1 142	1 135

^{*} In terms of IFRS 3: Business Combinations, the provisional accounting applied to the acquisition of Recoveries Corporation was finalised in December 2017. As a result, trade and other payables were reduced by R30 million, with a corresponding reduction in goodwill. The impact on the statement of comprehensive income is negligible.

Goodwill is tested annually for impairment, or more frequently if there are indications that goodwill might be impaired.

When testing goodwill for impairment, the recoverable amounts of cash generating units (CGU) are determined as the lower of value in use and fair value less costs to sell, the lower being the value in use. The CGU's prepare five year forecasts using growth rates based on the specific market segments in which they operate and their expected performance in these markets. The key assumptions for value in use calculations are discount rates, growth rates and expected margins over the determined period. Discount rates reflect management's assessment of risks specific to the CGU as well as current market trends of the time value of money. Growth rates and expected margins are based on industry indicators as well as current and expected business trends.

The group prepares cash flow forecasts based on CGU results for the next five years. A terminal value is calculated based on a growth rate of 5% (2017: 3%). This rate does not exceed the average long-term growth rate for the relevant markets. The value in use of the CGU's which are lending businesses is determined based on free cash flows to equity, discounted with a cost of equity, and the value in use of CGU's which operate service businesses is determined based on free cash flows to the firm, discounted with a weighted average cost of capital. The discount rates used in the value in use calculation at year-end is 14.8% for SA Taxi, 18.1% for TCRS South Africa, 14.1% for TCRS Australia and 23.1% for Value Added Services. The valuation method applied is consistent with that of the prior period.

The additions in the current year relate to the business combination of Accsys. Refer to the business combinations note 30 for further detail.

Also refer to note 33.1 relating to the subsequent disposal of The Beancounter.

12.2.1 Processes used to determine significant assumptions

The principal assumption underlying the liability estimates is that the group's future claims development will follow a similar pattern to past claims development experience. This includes assumptions in respect of average claim costs, claim inflation factors and claim numbers for each accident year. Additional qualitative judgements are used to assess the extent to which past trends may not apply in the future, for example economic conditions, as well as internal factors such as portfolio mix, policy conditions and claims handling procedures. Judgement is further used to assess the extent to which external factors such as regulatory changes affect the estimates. Other key circumstances affecting the reliability of assumptions include variation in interest rates, delays in reporting and settlement of claims.

12.2.2 Claims provision

Estimates are made both for the expected ultimate cost of claims reported at the reporting date and for the expected ultimate cost of claims incurred, but not yet reported, at the reporting date (IBNR). The ultimate cost of outstanding claims is estimated by using a range of standard actuarial claims projection techniques, such as Chain Ladder and Bornheutter-Ferguson methods. The main assumption underlying these techniques is that the group's past claims development experience can be used to project future claims development and hence ultimate claims costs. As such, these methods extrapolate the development of paid and incurred losses, average costs per claim and claim numbers based on the observed development of earlier years and expected loss ratios. Historical claims development is mainly analysed by accident years, but can also be further analysed by geographical area, as well as by portfolio mix and claim types. In most cases, no explicit assumptions are made regarding future rates of claims inflation or loss ratios. Instead, the assumptions used are those implicit in the historical claims development data on which the projections are based. Additional qualitative judgement is used to assess the extent to which past trends may not apply in future (e.g. economic conditions, levels of claims inflation as well as internal factors such as portfolio mix, policy features and claims handling procedures) in order to arrive at the estimated ultimate cost of claims that present the likely outcome from the range of possible outcomes, taking account of all the uncertainties involved.

13.2 Obligations under finance leases

13.2.1 Leasing arrangements

The group leases certain of its computer equipment under finance leases. The average lease term is three years. The group's obligations under finance leases are secured by the lessors' title to the leased assets.

The interest rate underlying all obligations under the finance leases is fixed at respective contract dates and is 4.5% per annum.

- 14.1.1 In terms of specific authority received from shareholders on the adoption of the Transaction Capital Share Appreciation Rights Plan and Transaction Capital Conditional Share Plan, a total of 586 760 shares were issued to participants/employees as part of respective vestings at an average price of R15.44 per share.
- 14.1.2 All shares repurchased and cancelled reverted to authorised unissued shares. The average purchase price of the 521 088 shares repurchased on the open market was R16.82 per share.
- 14.1.3 On 11 November 2016, the respective trusts of Jonathan Jawno, Michael Mendelowitz and Roberto Rossi, of which they are discretionary beneficiaries, exchanged their shares in Transaction Capital for shares in Everglen Capital Proprietary Limited (formerly JMR Holdings Proprietary Limited). In addition, in terms of a specific authority obtained from shareholders, Transaction Capital issued Everglen Capital with 3 377 821 ordinary shares, resulting in Everglen Capital owning 250 million shares in Transaction Capital. The trusts of Jonathan Jawno, Michael Mendelowitz and Roberto Rossi each own equal holdings in Everglen Capital.
- 14.1.4 On 2 February 2017 Transaction Capital raised equity in the form of 28 400 000 shares through the issue of new ordinary shares to qualifying investors through an accelerated bookbuild. The ordinary shares were priced at R14.75 per share, a 1.3% discount to the 30 day volume weighted average price of R14.95 as at 1 February 2017. The equity raise was completed under the company's general authority to issue shares for cash approved by Transaction Capital shareholders at the annual general meeting of the company held on 3 March 2016.

22 SHARE-BASED PAYMENTS

22.1 Share Appreciation Rights Plan

22.1.1 Details of the share appreciation rights plan

During the 2013 financial year the group implemented a share appreciation rights plan for executives and senior employees of the company and its subsidiaries. In accordance with the terms of the plan, as approved by shareholders at a general meeting, the grant of share appreciation rights (SARs) will be made on an annual or on an ad hoc basis. The number of SARs granted to an employee will take cognisance of the employees grade, performance, term of employment, retention requirements and market benchmarks. A SAR is a conditional right to acquire shares in the company for no consideration, the number being determined by the appreciation in the value of a share over a fixed period, and the number of SARs granted.

The SAR plan allows executives and senior managers to participate in the appreciation of Transaction Capital's share price over time. Subject to a performance criterion, which is the achievement of continuous growth in group headline earnings per share over a specified benchmark above inflation (measured by CPI), the SARs vest in full after four years from award date and are exercisable for a 12-month period. SAR awards granted until May 2014 were awarded with a three-year vesting period. The share price growth over the SAR period will be settled in Transaction Capital ordinary shares, with the gain subject to income tax. To the extent that the SAR grant price exceeds Transaction Capital's share price at the time of exercise, no gain or cost is realised by participants.

There were no grants made during the current year.

The following share appreciation rights were granted:

	Number	Expiry date	Grant price (cents)*	Fair value at grant date (cents)
Granted on 11 July 2013	_	11 Jul 201 <i>7</i>	369	160

22 SHARE-BASED PAYMENTS continued

22.2 Conditional Share Plan

22.2.1 Details of the conditional share plan

During the previous financial year the group implemented a conditional share plan (CSP) for executives and senior employees of the company and its subsidiaries. In accordance with the terms of the Plan, as approved by shareholders at a general meeting, the grant of CSP will be made on an annual or on an ad hoc basis. The number of CSPs granted to an employee will take cognisance of the employees grade, performance, term of employment, retention requirements and market benchmarks. A CSP is a conditional right to acquire Transaction Capital shares for no consideration, the number of shares being determined by the value of the CSP at vesting date, and the number of CSPs granted. The value of Transaction Capital shares issued will be subject to income tax.

The CSP mechanism is overseen and approved by the remuneration committee. Key executives are awarded CSPs in each division (SA Taxi, Transaction Capital Risk Services or Transaction Capital Risk Services Australia) or Transaction Capital for zero cost based on retention and performance criteria. The CSPs are based on notional shares held in each division, giving executives direct exposure to the performance of that division (or based on Transaction Capital's share price for its executives). At each date on which a CSP award is made, a valuation of each division is performed by an independent expert. Transaction Capital executives are awarded CSPs at the prevailing share price of Transaction Capital on the date of the award. An updated valuation of each division is to be performed by an independent expert at the date of vesting of the CSP.

The vesting periods range between two and five years and are based on both a retention element (subject to continued employment) and a performance element (subject to continued employment and linked to performance criteria). The performance criteria are based on the achievement of headline earnings per share in excess of prescribed CPI thresholds.

Employees are required to remain in the employ of the group to be eligible for CSP vestings (subject to standard "good leaver" rules). Employees who resign or are dismissed will forfeit any CSP awards that have not vested.

Due to the nature of the CSP awards, the grant price of each CSP is zero. The fair value of each CSP at grant date is underpinned by the value of the notional share of each division.

22.2.2 Fair value of conditional share plan awards granted in the year

The following Conditional Share Plan awards were in existence at year end:

		Weighted average fair value at grant date (cents)			
	Number	SA Taxi ZAR	Transaction Capital Risk Services ZAR	Transaction Capital Limited ZAR	Transaction Capital Risk Services Australia AUD
Granted on 22 November 2016	5 550 468	<i>7</i> 81	449	1 278	_

Granted on 1 January 2018	100 000	_	_	_	348
Granted on 25 May 2018	866 018	901	_	_	382

FOR THE YEAR ENDED 30 SEPTEMBER

22 SHARE-BASED PAYMENTS continued

22.2 Conditional Share Plan continued

22.2.2 Fair value of conditional share plan awards granted in the year continued

The value of CSPs is based on a present value methodology whereby the unconditional share value is equal to the value of the notional share of each division less the present value of estimated dividends paid prior to time of exercise. Key input assumptions are therefore expectations of dividend yields and risk-free interest rates. The issue prices of the notional shares (of SA Taxi, Transaction Capital Risk Services and Transaction Capital Risk Services Australia) and shares (of Transaction Capital) are disclosed below:

	SA Taxi ZAR	Transaction Capital Risk Services ZAR	Transaction Capital Limited ZAR	Transaction Capital Risk Services Australia AUD

28 FINANCIAL RISK MANAGEMENT

The board is responsible for risk management and the setting of the risk management framework. Oversight of risk management is the responsibility of two board subcommittees; the asset and liability committee ('ALCO') and the audit, risk and compliance ('ARC') committee. The ALCO monitors risks associated with liquidity and funding, interest rates, counterparties, currency exposures and capital adequacy. The ARC committee monitors risks associated with financial reporting, accounting policies, internal control and IT governance. The ARC committee is responsible for risk management including setting the risk management framework, setting risk appetite and monitoring the group's management of risk including credit and compliance.

The responsibility for day to day management of risks falls to each of the respective subsidiary's chief executive officers and their executive committees. Risk management is managed at subsidiary level through the divisional executive committees and reviewed by each of the respective subsidiary boards. Group oversight is the responsibility of the group financial director.

28.1 Credit risk

Credit risk is the risk of loss arising from the failure of a client or counterparty to discharge an obligation to the group. The primary credit risks that the group are exposed to arise from finance leases to minibus taxi operators, invoice discounting and secured mortgage loans. The portfolio of purchased book debts exposes the group to credit risk if they fail to perform in accordance with estimated net future cash flows. It is not the group's strategy to avoid credit risk, but rather to manage credit risk within the group's risk appetite and to earn an appropriate risk-adjusted return.

The group limits its counterparty exposure arising from money market instruments by dealing only with well established financial institutions of high credit standing.

Credit risk management and measurement

Each subsidiary is responsible for the identification, measurement, management, control and reporting of credit risk within their business units. Exposure to credit losses is managed by assessing customers' affordability and their ability to repay loans and advances, a customer's risk profile, employment status and stability, earnings potential in the case of taxis and collectability in the case of purchased book debts. Each of the group's lending businesses tends to have homogeneous or similar asset portfolios within their respective businesses. Impairments are monitored and provided for using statistical techniques including experiential and behavioural models. These models are based on customers' financial performance information while on book and assume that recent performance is a strong indicator of future performance. In the case of key asset classes, independent models are developed to monitor the robustness of the primary models relative to actual performance and to optimise their effectiveness. Models are either developed internally or by expert external advisors. In the case of secured lending asset classes, the realisable/fair value of the underlying security is taken into consideration in arriving at a final impairment.

28.1 Credit risk continued

Credit risk management and measurement continued

SA Tax

Method of provisioning and fair valuing

The credit committee is responsible for providing executive management and oversight over all credit risk arising within and impacting the SA Taxi balance sheet. Credit committee meetings are attended by the company chief executive officer, chief financial officer, chief risk officer and executive director of capital management.

The credit policy is designed to ensure that SA Taxi's credit process is efficient for the applicant while providing SA Taxi with the necessary details to make informed credit decisions. SA Taxi takes the following into consideration in granting credit to prospective customers:

- Vehicle type;
- Validity of the taxi route;
- Client's ability to pay using a route calculator (affordability check); and
- Verification of details and credit history against two independent credit bureaus.

Collections of instalments are made through a combination of cash and debit order collections, with 85% of the portfolio being cash payers.

The expected loss model is developed using statistical techniques based on actual historical data. The expected loss is calculated for each active account, using parameter estimates including the probability of default ('PD'), exposure at default ('EAD') and loss given write-off's ('LGWs') segmented using the contractual delinquency ('CD') state (aging and recency) as well as remaining term. The segmentation ensures homogenous risk buckets. The LGW is calculated on an explicit basis per account, taking into consideration the settlement balance, market value, repair cost, discount rates and discount periods. A detailed statistical analysis was performed on a multitude of macro-economic factors, namely prime interest rate, unemployment rate, petrol price, USD/ZAR exchange rate, gross domestic product ('GDP') and consumer price index ('CPI'). Regression analysis shows that the economic factors do not add explanatory information to the model and hence they are not included. SA Taxi has incorporated a forward-looking forecast for the mechanical repair costs as these have shown consistent trends over time.

The group utilised the 30-days past due definition of significant increase in credit risk, as per paragraph 5.5.11 of IFRS 9. This definition is supported by detailed quantitative analysis of account performance relative to expectation at initial recognition. The group has defined default as 90 days past due, with no qualifying payment received in the past 3 months. A qualifying payment is more than 50% of the instalment raised. The 90-day presumption was rebutted based on a quantitative analysis of the PDs and alignment to operational collection processes.

The definition of credit-impaired financial assets aligns to the default definition described above. Applying this approach ensures consistency between the accounting application, impairment modelling and internal credit risk management practices.

Write-off of loans and advances occurs at the point of sale of the vehicle, following repossession.

Quantitative analysis has proven that the modifications do not exhibit significantly higher risk than non-modified accounts. The value of these modified accounts is immaterial, relative to the book size. Modifications (term extensions) are provided to clients who have shown proven payment performance and have had operational issues with the vehicle (e.g. mechanical breakdown or accident). Although the term of a contract can be extended, the interest rate applicable for the contract remains unchanged and therefore term extensions do not have any effect on the net present value ('NPV') of the financial asset. Due to the fact that a vehicle is an income-producing asset, the group understands that the client is unable to pay if the vehicle is out of operation, however the group does not proactively restructure distressed clients.

FOR THE YEAR ENDED 30 SEPTEMBER

28 FINANCIAL RISK MANAGEMENT continued

28.1 Credit risk continued

Credit risk management and measurement continued

Transaction Capital Business Solutions

Exposure to credit losses is managed by assessing customers' affordability and their ability to repay loans and advances, customers' risk profile and collectability of invoices discounted. Impairments are monitored and provided for on a customer specific basis. The realisable/fair value of the underlying security is taken into consideration in arriving at a final impairment. The credit committee assesses all applications for credit and will approve a facility based on the risk profile of the customer and an assessment of the collectability of its trade receivables. Ongoing risk management and collections are handled by experienced credit controllers.

Impairments are monitored and provided for based on the assessment of the probability of obligations being met. This assessment is based on direct exposure where there is a probability of non-recovery, taking into account the realisable/fair value of any underlying security.

Transaction Capital Recoveries

Investment process

Before the acquisition of purchased book debts there is a defined investment process that is followed in accordance with guidelines as determined by an investment committee. Purchased book debt is acquired from various sectors, mostly from the retail and banking industries. Valuation of these books is determined by analysis of the historic underlying payment history as well as other parameters which are ultimately presented to the investment committee to decide on a fair price that the company is willing to offer.

Collections process

The business knowledge team continually develops and evolves strategies which are implemented by operations to collect the outstanding debt. Methods include tracing, letters, SMSs and direct calling both in call centres and legal operations.

Method of provisioning and fair valuing

Principal book portfolios are classified as purchased credit-impaired financial assets (stage 3) on initial recognition based on the assumption that events that have a detrimental impact on the estimated future cash flows of these financial assets have occurred before initial recognition. The classification of the debt portfolio does not change subsequent to initial recognition, even in the unlikely event of the expected cash flows returning to full contractual terms.

Transaction Capital Recoveries utilises statistical techniques to value the principal book portfolio on a monthly basis. Each matter is modelled on a 12 month period based on the collection activity applied to it. A combination of inflows for each matter and cost projections are used to determine a net cash flow which is discounted to the present value using a credit-adjusted effective interest rate, being the amortised cost for that matter at the end of the month.

Transaction Capital Recoveries performed a detailed statistical analysis on a multitude of macro-economic factors, namely prime interest rate, unemployment rate, petrol price, USD/ZAR exchange rate, GDP and CPI. Regression analysis shows that the economic factors do not add explanatory information to the model as there is no significant correlation, hence they are not included.

The Transaction Capital Recoveries amortised cost model takes into account the lifetime of expected cash flows on the portfolio by estimating the cash flows over the lifetime of each book included in the portfolio. A loss allowance is recognised equal to the expected future credit losses, discounted at the credit-adjusted effective interest rate of the principal book portfolio.

Due to the nature of the credit-impaired financial assets, no contractual terms exist without activation by Transaction Capital Recoveries at the date of purchase. Any changes in expected cash flows will not be treated as a modification and will therefore not result in a change to the credit risk.

Other financial assets include a receivable balance measured at fair value. The valuation technique calculates the present value of future expected cashflow.

28.1 Credit risk continued

28.1.2 Loans and advances that are neither past due nor impaired

	2018 Rm	201 <i>7</i> Rm
Carrying amount of loans and advances that are neither past due not impaired	5 342	5 067
Credit quality		
High	4 236	4 359
Medium	881	593
Low	225	115

The credit quality of loans and advances is determined as follows:

SA Taxi

SA Taxi, in conjunction with TransUnion, has developed a bespoke application scorecard to assess credit quality when granting loans. The scorecard uses demographic, vehicle, route and credit bureau information to determine the risk of the deal. A detailed affordability assessment is also performed to mitigate risk.

Transaction Capital Business Solutions

The credit committee assesses all applications for credit and will approve a facility based on the risk profile of the applicant and an assessment of the collectability of the trade receivables and realisable value of other tangible security. Ongoing risk management and collections are handled by experienced credit controllers.

Transaction Capital Recoveries

The credit quality is assessed on the date the loan is granted based on the loan to value percentage. Where the loan to value percentage is less than 100% the credit quality is assessed as high, where it is in excess of 100% the credit quality is assessed as medium.

28.1.3 Financial assets that are past due but not impaired

Financial assets that are past due but not impaired are assets where contractual interest or principal payments are past due, but the group believes that impairment is not appropriate. Recent payment history and the level of collateral available, if any, are key considerations in determining whether an asset is impaired. The ageing of loans and advances and trade and other receivables that are past due but not impaired is as follows:

	Past due up to 1 month Rm	Past due up to 1 – 2 months Rm	Past due up to 2 – 3 month Rm	Past due up to 3 – 4 months Rm	Past due older than 4 months Rm	Total Rm

28.1 Credit risk continued

28.1.3 Financial assets that are past due but not impaired continued

Valuation of collatera

The group typically holds vehicles (taxis), bonds over residential property and debtor books in the case of invoice discounting as collateral against secured advances. Any security taken as part of the credit decision is valued according to the applicable credit policies at the time of credit approval and at regular intervals thereafter. The group uses a number of approaches for the valuation of collateral, including:

- SA Taxi values collateral at the expected pre-owned sales value minus costs to repair; and
- Valuations of property held as security over mortgage loans take into account market conditions, area where the property is situated, the condition of the property and comparable sales within the geographical area.

Due to the specialised nature of the group's businesses, a certain degree of concentration in the collateral underpinning the various portfolios cannot be avoided. At the statement of financial position date, the group did not consider there to be any significant concentration of credit risk which has not been adequately provided for.

FOR THE YEAR ENDED 30 SEPTEMBER

28 FINANCIAL RISK MANAGEMENT continued

28.2 Interest rate risk

Interest rate risk is the risk of loss arising from changes in the fair value or future cash flows of a financial instrument as a result of movement in market interest rates.

The group is exposed to interest rate risk associated with the effects of fluctuations in the prevailing levels of market rates on future cash flows of a financial instrument and the fair value of the financial instrument based on changes in market interest rates.

28.2.1 Risk profile of financial assets and liabilities

The table below summarises the exposure to interest rate risk through grouping assets and liabilities into repricing categories, determined to be the earlier of contractual repricing date or maturity.

Cash and cash equivalents	9	944
TOTAL	106	10 878
LIABILITIES		
Interest-bearing liabilities	82	8 191
Fixed rate liabilities	-	25
Floating rate liabilities	82	8 166
Trade and other payables**	4	361
Bank overdrafts	1	136
TOTAL	87	8 688
NET EXPOSURE	20	2 190

The group uses a sensitivity analysis technique that measures the estimated change to profit or loss of an instantaneous change in market interest rates. The sensitivity analysis is prepared based on financial instruments that are recognised at the end of the reporting period. This is the case even where those exposures did not exist for the entire period or where the exposure changed materially during the period. The company is mainly exposed to fluctuations in the following market interest rates: prime, JIBAR, BLR and LIBOR rates. The sensitivity that is applied is the amount that could reasonably be expected to occur, and has been determined as 1% (100 basis points) up or down. The effect of a 1% change in interest rates is shown above. As the Group has no control over rate movements, it cannot predict the effect of future rate movements, if any.

- * Prepayments and VAT receivables are not financial assets and therefore have been excluded from trade and other receivables.
- ** Revenue received in advance, deferred lease liabilities, VAT payables and bonus accruals are not financial liabilities and therefore have been excluded from trade and other payables.

FOR THE YEAR ENDED 30 SEPTEMBER

28 FINANCIAL RISK MANAGEMENT continued

28.3 Liquidity risk management

Liquidity risk is the risk that the group is unable to meet payment obligations when they fall due or that insufficient funds are available to meet loan demands in the ordinary course of business. The group's objectives in relation to liquidity risk are to manage the contractual mismatch between cash inflows from assets and cash outflows to settle liabilities, to fund the expected balance sheet growth, to honour all cash outflow commitments, to avoid raising funds at market premiums or through the forced sale of assets as a result of liquidity pressure and to take advantage of attractive but unanticipated borrowing opportunities.

The monitoring and reporting of liquidity risk takes the form of, as a minimum, cash flow projections to settlement of longest dated funding obligations by subsidiary or securitisation vehicle, an analysis of the group's borrowing facilities and utilisation thereof, borrowing facilities under discussion, maturity profile and concentration of liability by counterparty, asset maturities and borrowing facility obligations and special conditions.

The group's capital markets ('CM') team is responsible for executing on fund raising mandates given to it by subsidiaries in support of the respective business models. This includes the ongoing assessment and evaluation of various funding sources designed to grow and diversify the group's funding base to achieve an optimal funding profile and sound liquidity. The CM team is also responsible for the ongoing monitoring of asset portfolio performance and its obligations to funders, including covenants.

It is the responsibility of each subsidiary to manage the daily cash flow requirements, to ensure funding covenants are maintained, to produce financial projections to monitor the impact of business trends on future funding requirements and covenants and to notify the CM team of any changes to the business environment that may impact funding requirements.

The table below analyses financial liabilities at the balance sheet date to the contractual maturity dates. The amounts disclosed in the table are the contractual undiscounted cash flows.

	On demand Rm	Within 1 year Rm	From 1 – 5 years Rm	More than 5 years Rm	Total Rm

FOR THE YEAR ENDED 30 SEPTEMBER

28 FINANCIAL RISK MANAGEMENT continued

28.4 Capital risk

The objective of the group's capital management strategy is to maximise shareholder value. To achieve this the group considers the capital required to support growth in its operating divisions, to maintain credit ratings in group entities, to comply with borrowing covenants and for unexpected shocks.

The group defines capital as equity, group loans and subordinated and structurally subordinated debt.

Equity comprises permanent paid up capital, share premium, revenue and other reserves together with certain loans from shareholders.

The board seeks to maintain a balance between the higher returns that might be possible with higher levels of borrowings and the advantages and security afforded by a strong capital position.

28.5 Insurance risk

Insurance risk and policies for mitigating insurance risk

Insurance risk is the risk assumed under any insurance contract that the insured event occurs. The theory of probability is applied to the pricing and provisioning for a portfolio of insurance contracts. The principal risk is that the frequency and severity of claims is greater than expected and that the group does not charge premiums appropriate for the risks accepted. By the very nature of an insurance contract, this risk is random and unpredictable. The exposure to insurance risk is limited through an underwriting strategy, underwriting limits and adopting appropriate risk assessment techniques. These actions are described below.

Underwriting strategy

The group's underwriting strategy seeks to attract SA Taxi's financed clients as well as non-financed clients. Strict underwriting guidelines for acceptance of new policies are maintained. Adequacy of the pricing structure is monitored through regular review of claims ratios.

Policies for mitigating the risk of fraudulent claims

SA Taxi is exposed to the risk of false, invalid and exaggerated claims. Fraud detection measures are put in place to improve the group's ability to proactively detect fraudulent claims.

Claims development

Appointment of authorised assessors and repair centres, as well as different excess structures are monitored and maintained.

Sensitivity assumptions

The insurance claim liabilities are sensitive to the key assumptions as per the table below. It has not been possible to quantify the sensitivity of certain assumptions such as legislative changes or uncertainty in the estimation process. The analysis is performed for reasonably possible movements in key assumptions with all other assumptions held constant, showing the impact on gross and net liabilities, profit before tax and equity. The correlation of assumptions will have a significant effect in determining the ultimate claims liabilities, but to demonstrate the impact due to changes in assumptions, assumptions had to be changed on an individual basis. It should be noted that movements in these assumptions are non-linear. The method used for deriving sensitivity information and significant assumptions as accordance with Short-Term Insurance Regulations.

FOR THE YEAR ENDED 30 SEPTEMBER

28 FINANCIAL RISK MANAGEMENT continued

28.5 Insurance risk continued

Outstanding claims and incurred but not yet reported reserves

	2018 Potential effect recorded directly in equity		Potential ef	01 <i>7</i> fect recorded in equity
SIGNIFICANT UNOBSERVABLE PARAMETERS APPLIED*	10% Favourable	10% Unfavourable	10% Favourable	10% Unfavourable
	7	(7)	16	(16)

1% on salvage and recoveries	1	(1)	_	_
Development factor	1	(1)	_	_
Repo write-off and repair: average cost of claims	3	(3)	10	(10)

These represent the significant unobservable parameters applied in the actuarial model.

28.6 Currency risk

Currency risk is the possibility of incurring a financial loss as a consequence of the depreciation in the measurement currency relative to a foreign currency prior to payment of a commitment in that foreign currency or the strengthening of the measurement currency prior to receiving payment in a foreign currency.

The foreign currencies to which the group has material exposure are Australian dollars, US dollars and Euro. Where the timing of future cash flows can be predicted with relative certainty, this risk is managed by entering into forward exchange contracts at the time the risk arises.

The following significant exchange rates were applied during the year:

	Avera	Average rate		Reporting date closing rate	
	2018	201 <i>7</i>	2018	2017	
USD	13.1	13.4	14.1	13.5	
Euro	-	14.8	_	16.0	
Pula	1.3	1.3	1.4	1.3

Fijian Dollar	6.3	_	6.6	_	

FOR THE YEAR ENDED 30 SEPTEMBER

28 FINANCIAL RISK MANAGEMENT continued

28.6 Currency risk continued

28.6.1 The carrying amounts of the group's foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are as follows:

	Liab	Liabilities		Assets	
	2018 Rm	201 <i>7</i> Rm	2018 Rm	201 <i>7</i> Rm	
Foreign amounts included in the financial statements at the end of the financial year:					
USD	1 371	1 037	_	_	
Pula	1	_	3	3	
Australian Dollar	58	124	124	128	
Fijian Dollar	4	_	8	_	

Currency risk arising from exposure to USD and Euro foreign currencies has been effectively managed through cross-currency swaps that exactly hedge the contractual cash flows over the life of the foreign currency funding. Refer to note 28.8 for hedge accounting disclosure.

28.6.2 Foreign currency sensitivity analysis

The following table details the group's sensitivity to a 10% increase and decrease in the Rand against the relevant foreign currencies (excluding USD and EURO foreign currencies which are fully hedged). 10% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the period end for a 10% change in foreign currency rates. The sensitivity analysis includes external loans as well as loans to foreign operations within the group where the denomination of the loan is a currency other than the functional currency of the lender or the borrower. A negative number below indicates an decrease in profit or equity where the Rand strengthens 10% against the relevant currency. For a 10% weakening of the Rand against the relevant currency, there would be a equal and opposite impact on the profit or equity, and the balances below would be positive.

	2018 Rm	201 <i>7</i> Rm
Profit or loss*	(9)	(2)
Equity	(7)	<(1)

The group's sensitivity to foreign currency has changed during the 2017 financial year mainly due to the acquisition of Recoveries Corporation operating in Australia.

^{*} This is mainly attributable to the exposure outstanding on AUD 6.5 million (2017: AUD 0.1 million) in the group at the end of the reporting period.

FOR THE YEAR ENDED 30 SEPTEMBER

28 FINANCIAL RISK MANAGEMENT CONTINUED

Valuation methods and assumptions:

Loans and advances: Loans for entry level vehicles are carried at fair value (refer to Note 28.10). Loans for premium level vehicles entered into at variable interest rates approximate fair value as the estimated future cash flows are already considered in the expected loss model. The fair value of loans for premium level vehicles at fixed interest rates, which is a small component of the loan book, is determined by adjusting the discount rate from the effective interest rate of the contract to a current effective lending rate.

Purchased book debt is held at amortised cost. The balance at year end is calculated based on the expected future cash flows which are adjusted for risk as it takes historical cash flows into account to predict forecasted cash flows. Based on the above the fair value of purchased book debts approximates the amortised cost value.

Interest bearing liabilities: The fair value is calculated based on future cash flows, discounted using a forward rate curve plus a valuation margin. The valuation margin is a consensus margin at which deals, with similar remaining cash profiles, could be secured in the market at the valuation date.

The carrying value of trade and other receivables, cash and cash equivalents, trade and other payables and bank overdrafts approximates fair value as they are short-term in nature and not subject to material changes in credit risk and fair value.

- * Prepayments and VAT receivables are not financial assets and therefore have been excluded from trade and other receivables.
- ** Revenue received in advance, deferred lease liabilities, VAT payables and bonus accruals are not financial liabilities and therefore have been excluded from trade and other payables.

FOR THE YEAR ENDED 30 SEPTEMBER

28 FINANCIAL RISK MANAGEMENT continued

28.8 Hedge accounting

The group applies hedge accounting to represent the economic effects of its interest and currency risk management strategies. Derivatives are used to hedge interest rate and exchange rate risk.

Where derivatives are held for risk management purposes, and when transactions meet the required criteria for documentation and hedge effectiveness, the group applies fair value hedge accounting, cash flow hedge accounting, or hedging of a net investment in a foreign operation, as appropriate to the risks being hedged.

Cash flow hedges of foreign currency risk

The group uses cross-currency swaps to hedge the foreign currency risks arising from interest-bearing liabilities.

Foreign exchange risk arises when the assets and liabilities are not denominated in the functional currency of the transacting entity. The group's policy is that such exposures should be hedged subject to a review of the specific circumstances of the exposure. The currency exposure under such funding has been hedged through a series of cross-currency swaps that match the timing and amount of each periodic cash flow obligation in terms of the currency funding.

The ineffective portion of fair value movements of hedging instruments for 2018 was nil (2017: nil).

Fair value hedges of interest rate risk

The group uses interest rate swaps exchanging fixed rate interest for floating rate liabilities.

The group policy is to borrow funds at floating rates of interest as, over the longer term, this is considered by management to give a natural hedge as funds are lent to customers at floating rates. In certain circumstances, the group uses interest rate swap contracts to manage its exposure to interest rate movements on a portion of its existing debt.

During the year, the fair value hedges were determined to be effective in hedging the fair value exposure to interest rate movements. As a result of the hedging relationship, the fair value hedge movement is adjusted to the underlying liabilities to the value of R4.2 million (2017: R10.3 million).

Cash flow hedging reserve

The cash flow hedging reserve represents the cumulative effective portion of gains or losses arising on changes in fair value of hedging instruments entered into for cash flow hedges. The cumulative gain or loss arising on changes in fair value of the hedging instruments that are recognised and accumulated under the heading of cash flow hedging reserve will be reclassified to profit or loss only when the hedged transaction affects the profit or loss, or included as a basis adjustment to the non-financial hedged item, consistent with the relevant accounting policy.

FOR THE YEAR ENDED 30 SEPTEMBER

28 FINANCIAL RISK MANAGEMENT continued

28.10 Level disclosures continued

Valuation methods and assumptions:

Loans and advances for the entry-level vehicles: The fair value was calculated using an income approach (estimating and discounting future cashflow) as well as the average collateral value. These represent the significant unobservable parameters applied in the fair value model. The expected cash flows were estimated using a lifetime expected loss model which is consistent with the IFRS 9 provision methodology. The expected cashflow were then discounted at the market related discount rate of 25% to yield a fair value of the total loans and advances for the entry level vehicles.

Other financial assets: The valuation of other financial assets is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. These represent the significant unobservable parameters applied in the fair value model. The group estimates the expected cash flows by considering all the contractual terms of the financial instrument. The discount rate applied to the expected future cash flows reflects specific risk premiums relating to the asset. This includes, government risk, single project customer, no previous experience with client and small stock premium for valuations less than R250 million. The discount rate applied to the additional purchase price is based on the current South African prime interest rate.

Derivatives: The group enters into derivative financial instruments with respective counterparties. Interest rate swaps and cross currency swaps are valued using valuation techniques, which employ the use of market observable inputs. The most frequently applied valuation techniques include forward pricing and swap models using present value calculations. The models incorporate various inputs including the foreign exchange spot and forward rates, yield curves of the respective currencies, currency basis spreads between the respective currencies and interest rate curves.

Sensitivity analysis of valuations using unobservable inputs

As part of the group's risk management processes, stress tests are applied on the significant unobservable parameters to generate a range of potentially possible alternative valuations. The financial instruments that are most impacted by this sensitivity analysis are those with the more illiquid and/or structured portfolios. The stresses are applied independently and do not take account of any cross correlation between separate asset classes that would reduce the overall effect on the valuations. A significant parameter has been deemed to be one which may result in a change in the fair value of the asset or liability of more than 10%. This is demonstrated by the following sensitivity analysis, which includes a reasonable range of possible outcomes.

Trade and other receivables	10
Inventories	1
Non-current assets	
Deferred tax assets	5
Current liabilities	
Trade and other payables	(18)
NET ASSETS ACQUIRED AND LIABILITIES RECOGNISED	7

The initial accounting for the acquisition of Accsys has been provisionally determined at the end of the reporting period. For tax purposes, the tax values of certain Accsys assets are required to be reset based on market values of the assets at the date of the acquisition. At the date of finalisation of these consolidated year-end results, the necessary market valuations and other calculations from a tax perspective had not been finalised and have therefore only been provisionally determined based on the directors' best estimate of the likely tax values.

The receivables acquired in this transaction have a fair value of R10 million. The receivables acquired compromise principally of trade receivables with a gross contractual amount of R11 million. The best estimate at acquisition date of the contractual cash flows not expected to be collected is R2 million.

FOR THE YEAR ENDED 30 SEPTEMBER

30 BUSINESS COMBINATIONS continued

30.1 Subsidiaries acquired continued

30.1.3 Goodwill arising on acquisition

	Total Rm
Consideration for IFRS 3 purposes	44
Less: intangible assets identified from business combinations	(19)
Plus: deferred tax on intangible assets identified from business combinations	5
Less: fair value of identifiable net assets acquired	(7)
GOODWILL ARISING ON ACQUISITION	23

The consideration paid for the business combination effectively included amounts in relation to the benefit of expected synergies, revenue growth, future market development and the assembled workforce of Accsys. These benefits are not recognised separately from goodwill because they do not meet the recognition criteria for identifiable intangible assets.

None of the goodwill arising on this acquisition is expected to be deductible for tax purposes

30.1.4 Net cash outflow on acquisition of subsidiary

	Rm
Consideration paid in cash	44
Less: cash and cash equivalents balance acquired	(9)
NET CASH OUTFLOW	35

30.1.5 Impact of acquisition on the results of the group

Included in profit attributable to ordinary equity holders of the group for the year is R5 million attributable to Accsys. Revenue for the year includes R45 million in respect of Accsys.

Had the business combination been effected at 1 October 2017, revenue for the group would have been R4 552 million, and the profit for the year attributable to ordinary equity holders of the group would have been R683 million. The directors consider these pro forma numbers to represent an approximate measure of the performance of the combined group on an annualised basis and to provide a reference point for comparison in future periods.

FOR THE YEAR ENDED 30 SEPTEMBER

30 BUSINESS COMBINATIONS continued

30.2 Subsidiaries acquired 2017 – Restated

	Acquirer	Principal activity	Date of acquisition	Proportion of voting equity interests acquired %	Consideration transferred Rm
Recoveries Corporation Group Limited (Recoveries Corporation)*	Transaction Capital Risk Services	Consumer management solutions	31/12/2016	100	447
RC Value Added Services Proprietary Limited (Road Cover)**	Transaction Capital Risk Services	Proprietary value- added services	01/12/2016	75	120
The Beancounter Financial Services Proprietary Limited (The Beancounter)***	Transaction Capital Business Solutions	Outsourced accounting, payroll and tax services	01/12/2016	51	10
SA Taxi cell in Guardrisk International Limited PCC (SA Taxi's cell captive)****	SA Taxi Development Finance	Insurance operations	30/06/2017	100	497

- * Transaction Capital Risk Services (TCRS) acquired 100% of the voting equity in Recoveries Corporation. Recoveries Corporation is a leading market participant with proven technology, strong data analytics skills, and deep industry knowledge operating within the credit risk services market segment. Recoveries Corporation thus possesses intellectual property and expertise that can enhance Transaction Capital's specialist capabilities thereby assisting Transaction Capital to grow its share in existing market segments and/or facilitate access to new vertical markets. Recoveries Corporation's vast expertise in the insurance recoveries industry will augment Transaction Capital's competencies and facilitate the growth of its fledgling insurance recoveries offering in South Africa. The acquisition provides Transaction Capital with a strong entry point into the Australian market and the opportunity to expand geographically into a developed economy. Transaction Capital will thus diversify concentration risk as it earns hard currency based returns.
- ** TCRS acquired 75% of the voting equity in Road Cover. The acquisition provides TCRS with a strong entry point into an adjacent market (i.e. the value added services market), where TCRS' existing competencies can be leveraged to enhance Road Cover's existing market position. The rationale is to offer Road Cover's products to the mass consumer market via TCRS' existing banking, retail, insurance, telecommunications and other clients, thus enabling these clients to generate higher risk-adjusted returns through their engagements with their customers at point of origination.
- *** The acquisition of 51% of the voting equity in The Beancounter provides Transaction Capital with an early entry into the specialist, cloud accounting services market in South Africa, and will augment Transaction Capital Business Solutions' existing offering to its SME clients. Refer to note 33.1 subsequent events for further detail.
- **** SA Taxi transferred its existing insurance business into a ring-fenced Protected Cell Company (PCC) in Mauritius. The PCC ring-fences SA Taxi's capital which triggers control and as such constitutes a business combination. The SA Taxi's cell captive forms part of the Guardrisk group of companies, which have a 30 June year end.

The initial accounting for the acquisition of Recoveries Corporation was provisionally determined at the end of the 2017 reporting period. For tax purposes, the tax values of certain Recoveries Corporation assets are required to be reset based on market values of the assets at the date of the acquisition. At the date of finalisation of the 2017 consolidated year end results, the necessary market valuations and other calculations from a tax perspective had not been finalised and were therefore provisionally determined based on the directors' best estimate of the likely tax values.

The receivables acquired in these transactions had a fair value of R110 million. The receivables acquired compromised principally of trade receivables with a gross contractual amount of R96 million. The best estimate at acquisition date of the contractual cash flows not expected to be collected was R4 million.

FOR THE YEAR ENDED 30 SEPTEMBER

30 BUSINESS COMBINATIONS continued

30.2 Subsidiaries acquired continued

30.2.3 Non-controlling interests

The non-controlling interests in Road Cover (25%) and The Beancounter (49%) were measured at acquisition date at the non-controlling interests' proportionate share of the identifiable net assets.

30.2.4 Goodwill arising on acquisition

	Recoveries Corporation Rm	Road Cover Rm	The Beancounter Rm	SA Taxi's cell captive Rm	Total Rm
Consideration for IFRS 3 purposes	447	120	10	497	1 074
Plus: non-controlling interests (25% in Road Cover, 49% in The Beancounter)	_	9	<1	_	9
Less: intangible assets identified from business combinations	(61)	(40)	(2)	(13)	(116)
Plus: deferred tax on intangible assets identified from business combinations	14	9	1	4	28
Plus: contingent liabilities raised in terms of IFRS 3	_	3	_	_	3
Less: fair value of identifiable net assets acquired	(168)	(1)	_	(52)	(221)
GOODWILL ARISING ON ACQUISITION	232	100	9	436	777

The consideration paid for the business combinations effectively included amounts in relation to the benefit of expected synergies, revenue growth, future market development and the assembled workforce of Recoveries Corporation, Road Cover, The Beancounter and SA Taxi's cell captive. These benefits are not recognised separately from goodwill because they do not meet the recognition criteria for identifiable intangible assets.

None of the goodwill arising on these acquisitions is expected to be deductible for tax purposes.

On acquisition of Road Cover, and in accordance with the requirements of IFRS 3, the group recognised an additional contingent liability of R3 million in respect of historic subscriber claims at acquisition date for which the costs associated with the settlement of claims is uncertain. The contingent liability was measured with reference to historic trend analysis of costs incurred associated with subscriber claims at the acquisition date and, if an outflow occurs, it is expected to be settled within 18 months of the acquisition date.

FOR THE YEAR ENDED 30 SEPTEMBER

30 BUSINESS COMBINATIONS continued

30.2 Subsidiaries acquired continued

30.2.5 Net cash outflow on acquisition of subsidiaries

	Total Rm
Consideration paid in cash	507
Less: cash and cash equivalent balance acquired	(281)
NET CASH OUTFLOW	226

30.2.6 Impact of acquisitions on the results of the group

Included in profit attributable to equity holders of the group for the 2017 financial year, excluding acquisition costs, is R28 million attributable to Recoveries Corporation, R16 million attributable to Road Cover and R1 million attributable to The Beancounter. Revenue for the 2017 financial year includes R372 million in respect of Recoveries Corporation, R62 million in respect of Road Cover and R10 million in respect of The Beancounter.

Had these business combinations been effected at 1 October 2016, revenue for the group would have been R4 056 million for the 2017 financial year, and the profit for the 2017 financial year attributable to equity holders of the group would have been R566 million. The directors consider these pro forma numbers to represent approximate measure of the performance of the combined group on an annualised basis and to provide a reference point for comparison in future periods.

The acquisition made by the SA Taxi group related to the insurance business resulted in control of the Protected Cell and the ring-fencing of the capital. The change in control resulted in full consolidation of the insurance business, represented by gross premiums of R552 million for the 2017 financial year, with no resultant impact on the profit after tax of the insurance business.

Geographical information

The group operated in two principal geographical areas, South Africa and Australia. The group's total revenue by location and non-current assets by location are detailed below:

	Total r	Total revenue		ent assets
	2018 Rm	201 <i>7</i> Rm	2018 Rm	201 <i>7</i> Rm
South Africa	4 004	3 534	12 292	10 644
Australia	527	374	529	535
TOTAL	4 531	3 908	12 821	11 179

32 GOING CONCERN

The annual financial statements were prepared on a going concern basis. Based on their assessment the directors have no reason to believe that the company will not continue as a going concern in the foreseeable future. The viability of the company is supported by the annual financial statements.

33 SUBSEQUENT EVENTS

- 33.1 The group disposed of its 51% shareholding in The Beancounter for R10.2 million effective 1 November 2018.
- 33.2 SA Taxi and the South African National Taxi Council (SANTACO) have engaged over several years to formalise the industry's participation in revenue streams of the minibus taxi industry value chain, and to achieve meaningful and sustainable commercial benefits for industry participants. This supports the viability of minibus taxi operators' businesses and in turn their ability to repay loans and afford insurance premiums.

This relationship has deepened considerably in recent years, culminating in a unique and transformational ownership transaction that formalises SA Taxi's relationship with SANTACO. Via a subscription for new shares to the value of R1.7 billion, SANTACO will acquire a 25% interest in SA Taxi. Proportional ownership, allocated to SANTACO and a trust representing its broad-based provincial structures, will ensure that the economic benefits of this investment accrue to all levels.

Further information can be found in the SENS announcement released on 19 November 2018 (available at http://www.transactioncapital.co.za/SENS.php).

^{1.} Investments in subsidiaries includes investments in debt securities held in subsidiaries. This was sold in the current year.

FOR THE YEAR ENDED 30 SEPTEMBER

15 FINANCIAL RISK MANAGEMENT

The board is responsible for risk management and the setting of the risk management framework. Oversight of risk management is the responsibility of two board sub-committees; the asset and liability committee (ALCO) and the audit, risk and compliance (ARC) committee. ALCO monitors risks associated with liquidity and funding, interest rates, counterparties, currency exposures and capital adequacy. The ARC committee monitors risks associated with financial reporting, accounting policies, internal control and IT governance. The ARC committee is responsible for risk management including setting the risk management framework, setting risk appetite and monitoring the group's management of risk, including credit and compliance.

15.1 Credit risk

Credit risk is the risk of loss arising from the failure of a client or counterparty to discharge an obligation to the company. It is not the company's strategy to avoid credit risk, but rather to manage credit risk within the company's risk appetite and to earn an appropriate risk-adjusted return. The company does not consider there to be any significant concentration of credit risk which has not been adequately provided for.

15.1.1 Financial assets subject to risk

Credit quality is the maximum exposure to credit risk of financial assets at the financial year-end is analysed as follows:

	Group loans* Rm	Total Rm
2018	'	
Neither past due nor impaired	1 404	1 404
CARRYING VALUE OF FINANCIAL ASSETS	1 404	1 404
	Group Ioans* Rm	Total Rm
2017		
Neither past due nor impaired	1 414	1 414

^{*} Group loans are all considered to be high quality.

FOR THE YEAR ENDED 30 SEPTEMBER

15 FINANCIAL RISK MANAGEMENT continued

15.2 Interest rate risk

Interest rate risk is the risk of loss arising from changes in the fair value or future cash flows of a financial instrument as a result of movement in market interest rates.

The company is exposed to interest rate risk associated with the effects of fluctuations in the prevailing levels of market rates on future cash flows of a financial instrument and the fair value of the financial instrument based on changes in market interest rates.

The table below summarises the exposure to interest rate risk through grouping assets and liabilities into repricing categories, determined to be the earlier of contractual repricing date or maturity.

15.2.1 Risk profile of financial assets and liabilities

	Floating rate	Floating rate	Net floating
	liabilities	assets	rate assets
	Rm	Rm	Rm
2018	383	1 405	1 022
TOTAL	383	1 405	1 022
	Floating rate	Floating rate	Net floating

Effect on

Total

The effect of a 1% change in interest rates is shown above. As the group has no control over rate movements, it cannot predict the effect of future rate movements, if any.

Refer to note 28.2.3 in the consolidated financial statements for a detailed description of the technique used to measure an instantaneous change in the market interest rates.

Amounts less than R500 000 are reflected as a "<1".

FOR THE YEAR ENDED 30 SEPTEMBER

15 FINANCIAL RISK MANAGEMENT continued

15.3 Liquidity risk management

Liquidity risk is the risk that the company is unable to meet payment obligations when they fall due or that insufficient funds are available to meet loan demands in the ordinary course of business. The company's objectives in relation to liquidity risk are to manage the contractual mismatch between cash inflows from assets and cash outflows to settle liabilities, to fund the expected balance sheet growth, to honour all cash outflow commitments, to avoid raising funds at market premiums or through the forced sale of assets as a result of liquidity pressure and to take advantage of attractive but unanticipated borrowing opportunities.

The monitoring and reporting of liquidity risk takes the form of, as a minimum, cash flow projections to settlement of longest dated funding obligations, an analysis of the company's borrowing facilities and utilisation thereof, borrowing facilities under discussion, maturity profile and concentration of liability by counterparty, asset maturities and borrowing facility obligations and special conditions.

The group's capital markets ('CM') team is responsible for executing on fund raising mandates given to it by subsidiaries in support of the respective business models. This includes the ongoing assessment and evaluation of various funding sources designed to grow and diversify the group's funding base to achieve an optimal funding profile and sound liquidity. The CM team is also responsible for the ongoing monitoring of asset portfolio performance and its obligations to funders, including covenants.

It is the responsibility of the company to manage the daily cash flow requirements, to ensure funding covenants are maintained, to produce financial projections to monitor the impact of business trends on future funding requirements and covenants and to notify the CM team of any changes to the business environment that may impact funding requirements.

The table below analyses financial liabilities at the balance sheet date to contractual maturity dates. The amounts disclosed in the table are the contractual undiscounted cash flows.

16 GOING CONCERN

The annual financial statements were prepared on a going concern basis. Based on their assessment, the directors have no reason to believe that the company will not continue as a going concern in the foreseeable future. The viability of the company is supported by the annual financial statements.

17 SUBSEQUENT EVENTS

No events which would have a material impact on either the financial position or operating results of the company have taken place between 30 September 2018 and the date of release of this report.

FORMULAE AND DEFINITIONS

ITEM	DEFINITION
After tax credit loss coverage	Provision coverage divided by after tax credit loss ratio
Asset turnover ratio	Gross principal book revenue expressed as a percentage of average carrying value of purchased book debts
Average equity attributable to ordinary equity holders of the parent	Sum of equity attributable to ordinary equity holders of the parent at the end of each month from September to September divided by 13
Average gross loans and advances	Sum of gross loans and advances at the end of each month from September to September divided by 13
Average interest-bearing liabilities	Sum of interest-bearing liabilities at the end of each month from September to September divided by 13
Average assets	Sum of assets at the end of each month from September to September divided by 13
Average cost of borrowing	Interest expense expressed as a percentage of average interest-bearing liabilities
Capital adequacy ratio	Total equity plus subordinated debt capital less goodwill expressed as a percentage of total assets less goodwill and cash and cash equivalents
Core cost-to-income ratio	Core operating costs expressed as a percentage of net interest income plus non-interest revenue
Core headline earnings	Headline earnings excluding transaction and other acquisition-related costs
Core headline earnings per share	Core headline earnings divided by weighted average number of ordinary shares in issue
Core operating costs	Operating costs excluding transaction and other acquisition-related costs
Core profit for the year	Profit for the year excluding transaction and other acquisition-related costs
Core return on average assets	Core profit for the year expressed as a percentage of average assets
Core return on average equity	Core profit for the year attributable to ordinary equity holders of the parent expressed as a percentage of average equity attributable to ordinary equity holders of the parent
Core return on sales	Core profit for the year expressed as a percentage of total income
Cost-to-income ratio	Total operating costs expressed as a percentage of net interest income plus non-interest revenue
Credit loss ratio	Impairment of loans and advances expressed as a percentage of average gross loans and advances
EBITDA	Profit before net interest income, tax, depreciation and amortisation of intangible assets (specifically excluding amortisation of purchased book debts) excluding Transaction Capital Business Solutions
Effective tax rate	Income tax expense expressed as a percentage of profit before tax
Entry-level vehicles	Vehicles brands: CAM, CMC, Jinbei, King Long, Polar Sun, Foton, Force Traveller, Peugeot
Estimated remaining collections	Estimated undiscounted value of remaining gross cash collections of purchased book debts, estimated to be recovered over the next 120 months or 96 months
Gearing	Total assets divided by equity attributable to ordinary equity holders of the parent expressed in times
Gross loans and advances	Gross loans and advances exclude the value of the written-off book brought back on to the balance sheet
Gross yield on average assets	Total income divided by average assets
Gross yield on average gross loans and advances	Total income divided by average gross loans and advances

ITEM	DEFINITION	
Headline earnings	Headline earnings is defined and calculated as per the circular titled Headline Earning as issued by the South African Institute of Chartered Accountants (SAICA) as amended from time to time, currently being basic earnings attributable to ordinary shareholders adjusted for goodwill impairments, capital profits and losses and other non-headline ite	
Headline earnings per share	Headline earnings divided by weighted average number of ordinary shares in issue	
Net asset value per share	Equity attributable to ordinary equity holders of the parent divided by number of ordinary shares in issue	
Net interest margin	Net interest income as a percentage of average gross loans and advances	
Non-performing loan coverage	Impairment provision expressed as a percentage of non-performing loans	
Non-performing loan ratio	Non-performing loans expressed as a percentage of gross loans and advances	
Non-performing loans	(a) the balance outstanding of loans and advances with a contractual delinquency greater than three months including repossessed stock on hand	
	(b) reduced by the balance of such outstanding loans and advances for which three cumulative qualifying payments have been received in the three month period preceding the measurement date	
Premium vehicles	Non entry-level vehicles	
Pre-provision profit	Profit before tax excluding impairment of loans and advances	
Provision coverage	Impairment provision expressed as a percentage of gross loans and advances	
Return on average assets	Profit for the year expressed as a percentage of average assets	
Return on average equity	Profit for the year attributable to ordinary equity holders of the parent expressed as a percentage of average equity attributable to ordinary equity holders of the parent	
Return on sales	Profit for the year expressed as a percentage of total income	
Risk-adjusted net interest margin	Net interest margin less credit loss ratio	
Structurally subordinated debt	Senior debt issued by a holding company within the group	
Subordinated debt	Debt subordinated by agreement with the lender plus structurally subordinated debt	
Total income	Interest and other similar income plus non-interest revenue	
Weighted average number of ordinary shares in issue	The number of ordinary shares in issue at the beginning of the year increased by shares issued during the year, weighted on a time basis for the year during which they have participated in the income of the group excluding treasury shares
